Advances in Research on Neurodegeneration, Volume 10

2003. Approx. 200 pages.
Hardcover **EUR 108,-**
(Recommended retail prices)
Net-prices subject to local VAT.
ISBN 3-211-83908-9
(Special Edition of
"Journal of Neural Transmission", Suppl. 65, 2003)

From the contents:

Stereotaxic intrastriatal implantation of human retinal pigment epithelial (hRPE) cells attached to gelatin microcarriers: a potential new cell therapy for Parkinson's disease • Self-tolerance in the immune privileged CNS: lessons from the entorhinal cortex lesion model • Arguments for the use of dopamine receptor agonists in clinical and preclinical Parkinson's disease • Animal models of Parkinson's disease in rodents: an update • General aspects of neurodegeneration • Progressive neurodegeneration in *Drosophila*: a model system.- Gene therapy for Parkinson's disease.- Effect of advanced glycation endproducts on cell cycle and their relevance for Alzheimer's disease • New concepts and tools in imaging for the study of neurodegenerative disease • The role of acetylcholine and dopamine in dementia and psychosis in Parkinson's disease • The neuromelanin of human substantia nigra: structure, synthesis and molecular behaviour

W. W. Fleischhacker,
D. J. Brooks (eds.)

Neuropsychopharmacology

2003. VII, 117 pages. 17 figures.
Hardcover **EUR 89,-**
(Recommended retail prices)
Net-prices subject to local VAT.
ISBN 3-211-83903-8
(Special Edition of
"Journal of Neural Transmission", Suppl. 64, 2003)

From the contents:

Therapeutic implications of constitutive activity of receptors: the example of the histamine H3 receptor • The role of peptides in treatment of psychiatric disorders • Pharmacological approaches to migraine (H.-Ch. Diener) • Advances in the pharmacological management of Parkinson disease • Depression and antisocial personality disorder: two contrasting disorders of 5HT function • Future directions in substance dependence research • New developments in the pharmacotherapy of schizophrenia

W. W. Fleischhacker,
D. J. Brooks (eds.)

Stroke-Vascular Diseases

2002. V, 147 pages. 16 figures.
Hardcover **EUR 89,-**
(Recommended retail prices)
Net-prices subject to local VAT.
ISBN 3-211-83867-8
(Special Edition of
"Journal of Neural Transmission", Suppl.63, 2002)

**New Family Interventions
and Associated Research in
Psychiatric Disorders**

Gedenkschrift in Honor of Michael J. Goldstein

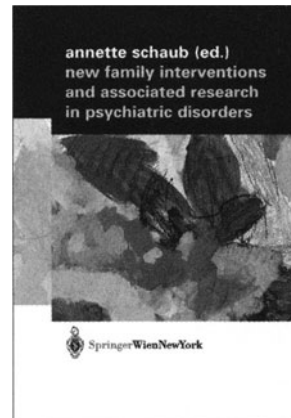

2002. VI, 281 pages. 16 figures.

Softcover **EUR 39,-**

(Recommended retail price)

Net-price subject to local VAT.

ISBN 3-211-83700-0

This book is dedicated to the memory of Michael J. Goldstein, one of the pioneers in psychosocial interventions in psychiatry. The structure of this book follows Goldstein's footsteps in this domain and is subdivided into family factors as well as intervention strategies for severe mental illness. Recent research on high expressed emotion (HEE) in schizophrenia (e.g., early psychosis) and borderline disorder, patients' perspectives of HEE as well as other variables predictive for relapse in recent-onset schizophrenia are covered in this book.

Family treatment strategies in schizophrenia, depression, bipolar disorder, substance use disorders and illness management programs as well as pharmacological treatment strategies are illustrated and current studies presented. The book brings together basic research and therapeutic applications stimulating further research on the complex interactional components that influence the course of psychiatric illness and on treatment designed to ameliorate the symptoms, stigma, and disability experienced by patients with severe mental illness.

Opiatabhängigkeit

Interdisziplinäre Aspekte für die Praxis

2003. XI, 254 Seiten. 17 Abbildungen.

Broschiert **EUR 48,-**, sFr 77,-

ISBN 3-211-83793-0

In den letzten fünf Jahren ist das Wissen sowohl über Entstehung als auch über Behandlung der Suchterkrankung „Opioidabhängigkeit“ beträchtlich angewachsen. Neben der klassischen Grundlagenforschung, Pharmakotherapie, somatischer und psychiatrischer Komorbidität sowie Harm Reduktion, gewann der interdisziplinäre Aspekt zunehmend an Bedeutung.

Dieses Fachbuch gibt erstmals einen aktuellen und praxisrelevanten Überblick zu den pharmakologischen, medizinischen, psychotherapeutischen sowie rechtlichen Grundlagen dieses Erkrankungsbildes. Ein besonderer Schwerpunkt wird dabei auf die Interdisziplinarität der bestehenden Erkrankungs- und Behandlungskonzepte gelegt. Die Herausgeber und Autoren berichten dabei praxisbezogen aus ihrer langjährigen Erfahrung in der Arbeit mit Suchterkrankten.
