

Table of Contents

	Page
Introduction.....	3
Chapter 1 : General Theory.....	7
1.1. Derivation of the basic formulae.....	7
1.2. Curved boundaries.....	14
1.3. Complementary conditions.....	15
1.4. The consecutive operations.....	15
1.5. Example of a linear parabolic equation...	17
1.6. Example of the boundary layer equation...	22
1.7. Example of a mixed type equation.....	27
1.8. Concluding remarks.....	30
References.....	34
Chapter 2 : Application to typical blunt-body problems	35
2.1. Motivation for investigating of blunt-body flows.....	35
2.2. Some characteristic features of blunt-body flows.....	36
2.3. Typical blunt-body problems.....	39
2.4. Mathematical methods for solving blunt-body problems.....	40
2.5. General equations for plane and axisymmetric flow as obtained by the use of the MOIR.....	41
2.6. The direct problem.....	61
2.7. The pressure problem.....	68

2.8. The inverse problem.....	71
References.....	78
Chapter 3 : Other selected problems.....	81
3.1. Introductory remarks.....	81
3.2. Specific shapes of the bodies.....	82
3.3. The asymmetric problem.....	89
References.....	97
