

Subject index

- Σ operator 100
- a*-algebra 90, 92, 97
- Abduction 243
- Abductive problem 251
- Abstract data type 24, 165
- Abstract linear lifting 40
- Abstract structures 34, 37
- Accumulation 137
- A-clause 200
- Active path 237
- Algebraic specification 145
- Amalgamation 23
- Antecedent 200
- Attribute covering 172
- Automated deduction 24

- Backward mapping 58
- Big number 68
- Binary choice strategy 128, 130, 136
- Binomial coefficients 85, 91
- Boyer–Moore theorem prover 135

- Canonical form 92
- Canonical simplifier 95, 97
- Chinese remainder algorithm 68, 76
 - parallel 75 f
 - pure 77, 81 f
 - stepwise 77 f, 81 f
- Class 121, 186
 - implementation 150
 - parametric 122
 - specification 148
- Component formula 200
- Computer aided instruction 245

- Conflict resolution 168 f
- Connection 235
- Connection method 231, 236
- Convolution problem 94
- Covariant redefinition 180
- Creativity spiral 6

- Deduction 15
 - automated 24
 - natural 15
 - tree 220
- DefiniteSum operator 100
- Definition space 38
- Diagnostic modeling system 248
- Difference field 96
- Direct implementation 131
- Divides, definition of 11
- Division by zero 22

- Elementary geometry 248
- Encapsulation 145
- Enhanced strict inheritance 180 f, 185
- Equational logic 12
- Equational reasoning 128
- Equational specification 126
- Equivalence 87
- Euclid 5
- Euclidean algorithm 11, 23
 - extended 40
- Execution space 38
- Expert module 248
- Expression 87
 - elementary 92
 - recurrence 88
- Extension step 237 ff

- Factorization 42, 46
 - greatest-factorial 103
- Farey fraction set 57, 69
- Finite sum 114
- Forward chaining 246
- Forward mapping 56

- Generalized residue class 57
- Generative problem 251
- Genericity 145
- Geometric series 95
- Gosper's algorithm 86
- Gould's table 86
- Greatest common divisor 5 f, 68
- Ground structures 37 f

- Hadamard-product 91
- Harmonic number sequence 86
- Hensel algorithm 33, 43
 - extended 44, 46
- Hensel code 39, 56, 59, 69
 - operations with 59–62
 - pseudo- 60, 63
- Hensel lemma 40 f
- Holonomic power series 101
- Hypergeometric 92
 - differential equations 101
 - generating function 101
 - sequences 102

- Indefinite symbolic summation 94
 - algorithm 106
- Indexed variable 114
- Induction prover 17
- Inheritance 34, 113, 151, 218
 - enhanced strict 180 f, 185
 - reusing 152
 - specialization 154
 - structured 157
- Intelligent tutoring system 245, 247
 - Geometry Tutor 248
 - LMS/Pixie 246

- Knuth–Bendix completion 13, 128

- Legendre polynomial 42
- Linear algebraic equations 246

- Linearization order 169
 - global type order 169
 - inheritance order 184
 - local type order 169

- Metaobject protocol 185
- Mathematics 3
 - algorithmic 10
 - experimental 5
- Matrix 37, 233
 - complementary 235
 - in normal form 234
 - propositional 233
- Method combination 121
- Method lookup 183
- Multiplicity 236

- Natural deduction 15
- Newton's method 23, 42
- n -th root 42, 48

- Object 171
 - indexed 113 f
- Object-oriented 24, 112, 145, 165
 - design 218
 - programming 33, 165

- p -adic arithmetic 53
- p -adic construction 23, 40
- Parallel p -adic computations 74
- Parametric structures 36 f
- Place 128
- Polymorphism 113
- Power series
 - holonomic (D-finite) 101
 - truncated 33
- Problem solving 3, 249
- Programming language
 - Ada 134
 - BETA 146, 156
 - C++ 133, 146, 167, 169
 - CLOS 112, 146, 179, 185, 218
 - Eiffel 146, 167
 - Modula-3 167
 - OBJ 146
 - OOZE 146
 - POOL 146

- Prolog 131
 - Smalltalk 146
 - Prototype 131, 133

 - Rational number 54
 - p -adic representation 55
 - Reasoning 4, 14
 - equational 127 f
 - Recursive reduction strategy 129, 136
 - Representation mapping 134
 - Rewriting 127, 131, 136

 - S-clause 200
 - Separation step 237
 - Sequence 87
 - admissible 91
 - algebra 89
 - domain 87, 90
 - hypergeometric 91 f
 - Sequent 199
 - atomic 200
 - basic-valid 203
 - construction rules 208
 - elementary 200
 - empty 200
 - open 200
 - Sequent calculus 198, 218, 249
 - Sigma notation 114
 - Sigma sum 115
 - Signature, constructor based 127 f
 - Simplification 84, 87, 94
 - canonical 84, 87, 98
 - indefinite 85
 - Spanning set of connections 235
 - Specification 128
 - algebraic 145
 - axiomatic 25
 - class 148
 - constructor based 128
 - equational 126

 - Static analysis 190, 192
 - Static type checking 188
 - Static type inference 188
 - Student module 248
 - Substitutability 166, 171
 - Subtyping 24, 168, 171
 - Succedent 200
 - Summation 84, 111
 - binomial 91
 - definite 99
 - harmonic number 95
 - identities 86
 - indefinite 85, 94, 98
 - problem 94, 106
 - symbolic 89, 94, 98
 - Symbolic computation system
 - Derive 21
 - Macsyma 21, 249
 - Maple 45, 101, 249
 - Mathematica 8
 - Reduce 21
 - SACLIB 164

 - Tableaux proof method 231
 - TASSO 22, 236
 - TASSO-D 24 f
 - TASSO-L 24, 179, 185, 189
 - Telescopic relation 91
 - Telescopic sum property 90
 - Term algebra 90, 93
 - Theorem proving 134
 - Truncated power series 33
 - Truncation step 237

 - Validity problem 203
 - Verificative problem 251

 - Zeilberger algorithm 97
-
