

## Subject Index

- Acidotic damage, antiacidotic therapies 110
- Acute brain insults 112–120
  - aneurysm surgery 114
  - brain trauma 117
  - cardiovascular surgery 113
  - carotid surgery 113
  - intraoperative brain protection 113
  - subarachnoid haemorrhage 115
  - stroke 116
- Acute retroviral syndrome 158
- Adenosin 104
- Aggressive conduct disorder in patients with mental retardation 274
  - patient data 274
  - postoperative psychiatric follow-up 275
- AIDS in neurosurgery 155
  - algorithms for evaluation of AIDS patients 176
  - cerebrovascular diseases 168
  - cryptococcal infection, meningitis 163
  - distal symmetric peripheral neuropathy 173
  - evaluation of the symptomatic patient 172
  - fungal infections 165
  - impact of AIDS on neurosurgical practice 178
  - incidence and epidemiology 157
  - inflammatory demyelinating polyradiculoneuropathy 173
  - intracranial mass lesions 162
  - metastatic neoplasms 168
  - mononeuropathy multiplex 173
  - multiple CNS diseases 169
  - neoplasms 165
    - neurological manifestations 158
    - nonviral infections 163
    - peripheral neuropathic syndromes 172, 173
    - primary CNS lymphoma (PCNSL) 165
    - progressive multifocal leucencephalopathy (PML) 169
    - progressive polyradiculopathy 173
    - toxoplasmosis 163
    - viral infections 169
- AIDS-related complex 159
- AIDS, CNS diseases 160–162
- AIDS, neurological complications
- Allopurinol in ischemia 106
- Amygdalotomy 266
- Anaplastic astrocytoma 15
- Anterior capsulotomy (AC) 251
- Anterior meningocele 224
  - anterior lumbar meningoceles 225
  - anterior sacral meningocele 224
  - anterior thoracic meningoceles 225
- Antioxidants 106, 108
- Antioxidant therapy 104
- Arachidonic cascades 98
- Artificial hibernation 91
- Ascorbic acid 106
- Astrocytic tumours 12–18
  - dual lineage theory 14
- Astrocytomas 14, 15
  - fibrillary 14
  - gemistocytic 14
  - protoplasmatic 14
- A2B5 antibody 14
  
- Bailey and Cushing (1926) 45**
- Barbiturates, cerebral protection 89

- Basic fibroblast growth factor (bFGF) 14  
 Biological brain tumour markers 3–41  
 Brain insult pathophysiology 80  
     secondary brain damage 84  
     secondary insults 86  
 Brain protection 113  
 Brain protection 78–125  
     historical aspects 78  
     pre treatment 79  
     post treatment 79  
 Brain tumour classification 4, 5  
     Bailey and Cushing classification (1926) 4  
     Cox (1926) 4  
     Kernohan (1949) 4  
     Kleihues (1993) 5  
     Russel and Rubinstein (1977) 5  
     WHO, Zülch (1979) 5  
     Zülch (1965) 5  
 Broders (1926) 45  
 Bromodeoxyuridin (BUd) labelling method 7  
 Bulbocavernous reflex 202  
  
 Cajal Santiago Ramon y 6  
 Calcium entry blockers 102  
 Calmodulin dependent protein kinase II  
 Calpain 99  
 Capillary haemangioblastomas 30, 31  
 Cardiovascular surgery and brain protection 113  
     cold cerebroplegia 113  
     complications of hypothermia 113  
     moderate hypothermia 113  
     profound hypothermia 113  
     retrograde cerebral perfusion 113  
     selective carotide perfusion 113  
     selective perfusion of cooled blood 113  
 Caudal lipoma 209  
 Ca<sup>++</sup> channels 92  
     receptor operated channels (ROCs) 92  
     voltage operated channels (VOCs) 92  
 Ca<sup>++</sup> damage in CNS injuries 100  
  
 CD44 antigen, receptor for hyaluronic acid 25  
 Central neurocytoma 25, 26  
 Cerebral blood flow (CBF) 81  
     CBF, critical threshold 81  
 Cerebral mean rate of oxygen consumption (CMRO2) 82  
 Chiari malformation 184  
 Chordomas 32  
 Chorio-carcinomas 32  
 Choroid plexus tumours 21, 22  
 Chromogenes 7  
 Chromosomal abnormalities in brain tumours 11  
 Coons Albert 7  
 Cyclin 10  
 Cytosolic Ca<sup>++</sup> mediated enzymes 97  
  
 Deferoxamine 107  
 Dermal sinus 184, 227  
 Desmoplastic infantile ganglioglioma 23  
 Diastematomyelia and diplomyelia 218  
     clinical manifestations 218  
     neurological manifestations 219  
     orthopedic syndrome 218  
     radiological investigations 219  
     results 224  
     surgical indications and treatment 219  
 Dysembryoplastic neuroepithelial tumour (DNT) 23, 25  
  
 Embryonal tumours 27, 28  
 Ependymal tumours 21  
     cellular ependymoma 21  
     clear ependymoma cell 21  
     papillary ependymoma 21  
 Epidermal growth factor receptor (EGFR) 17  
 Etomidate, cerebral protection 90  
 Excitatory aminoacid (EAA) 92  
 Excitatory aminoacid antagonists 102  
  
 Free radical reaction 104–105  
     therapy 108

 Rorke (1983) 27  
 Rosenthal fibres 17  
  
 Sacral agenesis 230  
 Scavengers 105  
 Scherer (1940) 46  
 Schwannomas, neurinomas 28, 29  
     Antoni A, B type tissues 29  
 Secondary brain damage 84  
     time window for treatment 84  
 Skin dimple 228  
 Spectrin 99  
 Spina bifida occulta, aperta, cystica 184  
 Spinal cord embryology 184  
     canalisation and retrogressive differentiation 189  
     caudal cell mass 189  
     deranged neurolation 185  
     dermal sinus 186  
     dermoid, epidermoid cysts 186  
     diastematomyelia 188  
     lipoma of the filum 190  
     myelolipoma 190  
     myelomeningoceles 185  
     neuroenteric cyst 188  
     neurolation 185  
     spinal lipomas 186  
     terminal myelocystocele 119  
     tight filum terminale syndrome 190  
 Spinal lipomas 205  
     anatomical classification 207  
     indications for surgery 206  
     late results in operated patients 215  
     surgical classification 209  
 Split cord malformations (SCM) 218  
     type I SCM 218  
     type II SCM 218  
 Stereotactic techniques in Psychosurgery 251  
 Subcaudate tractotomy (SCT) 255  
     surgical complications 259  
 Subependymal giant cell astrocytomas, tuberous sclerosis 18  
 Superoxide dismutase (SOD) 108  
 S-antigen expression, photoreceptor cell differentiation 26  
  
 Teratomas 32  
 Tethered spinal cord 184  
 Theory of fields, Willis, (1960) 47  
 Tight filum terminale 217  
 Tirilazad mesylate (U 74006 F) 109, 116  
 Tocopherol 109  
 Transmission electron microscopy (EM) 6  
 Traumatic brain insults 86  
     focal, global ischemia 87  
 Tromethamine (THAM) in ischemia 111  
 Tumour suppressor genes 11  
 Two hit hypothesis 11  
  
 Vimentin 13

Virchow Rudolf (1846) 6

WHO classification of brain tumors 45

Willis (1960) 47

Yolk sac tumours 32

Zülch (1979) 45

# Advances and Technical Standards in Neurosurgery

## Volume 20

1993. 96 figures. XIII, 308 pages.  
Cloth DM 240,-, öS 1680,-, approx. US \$ 160.00  
ISBN 3-211-82383-2

### *Advances:*

- R.D. Lobato: Post-traumatic Brain Swelling.
- K.-F. Lindegaard, W. Sorteberg, and H. Nornes: Transcranial Doppler in Neurosurgery.
- A.E. Harding: Clinical and Molecular Neurogenetics in Neurosurgery.

### *Technical Standards:*

- B. Williams: Surgery for Hindbrain Related Syringomyelia.
- J.-F. Hirsch and E. Hoppe-Hirsch: Medulloblastoma.
- F. Resche, J.P. Moisan, J. Mantoura, A.de Kersaint-Gilly, M.J. Andre, I. Perrin-Resche, D. Menegalli-Boggelli, Y. Lajat, and S. Richard: Haemangioblastoma, Haemangioblastomatosis, and von Hippel-Lindau Disease.

*Prices are subject to change without notice*

**Springer-Verlag Wien New York**

Sachsenplatz 4-6, P.O.Box 89, A-1201 Wien · 175 Fifth Avenue, New York, NY 10010, USA  
Heidelberger Platz 3, D-14197 Berlin · 3-13, Hongo 3-chome, Bunkyo-ku, Tokyo 113, Japan

# Advances and Technical Standards in Neurosurgery

## Volume 19

1992. 44 partly colored figures. XIV, 224 pages.  
Cloth DM 186,-, öS 1300,-, approx. US \$ 129.00  
ISBN 3-211-82287-9

### *Advances:*

J.W. Berkelbach van der Sprekel, N.M.J.Knufman, P.C. van Rijen,  
P.R. Luyten, J. A. den Hollander, and C.A.F. Tulleken: Proton  
Spectroscopic Imaging in Cerebral Ischemia, Where we Stand and what  
Can Be Expected.  
L. Steiner, C. Lindquist, and M. Steiner: Radiosurgery.  
F. Iannotti: Functional Imaging of Blood Brain Barrier Permeability by  
Single Photon Emission Computerised Tomography and Positron  
Emission Tomography.

### *Technical Standards:*

B. Jennett and J. Pickard: Economic Aspects of Neurosurgery.  
F. Gjerris and S.E. Børgesen: Current Concepts of Measurement of  
Cerebrospinal Fluid Absorption and Biomechanics of Hydrocephalus.  
F. Gentili, M. Schwartz, K. TerBrugge, M.C. Wallace, R. Willinsky, and  
C. Young: A Multidisciplinary Approach to the Treatment of Brain  
Vascular Malformations.
