

Index

- Abramowitz functions, 114, 120
- accommodation coefficients, 72, 73
- aerosol, 139

- BBGKY hierarchy, 30, 31, 33–36
- BGK model, 110–113, 119, 122, 123, 127, 137, 138, 140, 152, 157
- Boltzmann inequality, 15, 21
- Boltzmann–Grad limit, 4, 9, 29, 35, 36
- boundary conditions, 10, 22, 69, 78, 83, 85, 89, 91, 92, 106, 108, 112, 113, 117, 126, 132, 136, 138, 140–142, 149, 150, 153, 157, 160, 161
- bulk velocity, 4, 16, 17, 20, 103, 105, 109, 113, 126, 134, 136, 137, 142, 143

- collision frequency, 45, 109–111, 113
- collision invariant, 42
- collision invariants, 12, 15, 105, 106, 108, 117, 125, 134, 135
- continuum mechanics, 136, 140
- continuum regime, 122, 123
- Couette flow, 113, 119, 121, 123, 138, 147, 154–157

- density, 2–8, 10, 12, 16, 17, 19, 20, 104, 105, 109–111, 115, 118, 123, 124
- distribution function, 2, 4, 6, 12, 23
- drag, 116, 119, 123, 139, 140

- energy density, 17
- energy flow, 17, 18

- entropy, 2, 22, 74, 84, 86, 88
- ES model, 110, 138
- existence, 3, 4, 29, 30, 36–39, 51, 55, 63, 65, 66, 74, 75, 78, 84, 85, 90, 92, 94, 97–99

- flow past a body, 139, 143
- flow rate, 124, 126–128, 137, 138, 140, 147–149, 151, 155, 156, 160

- gas, 1–4, 10–12, 16, 17, 21, 22, 25
- gas constant, 20
- Green’s function, 132–134

- H-theorem, 2, 21, 22
- heat flow, 2, 4, 18, 20, 108, 119, 134–136, 140, 142
- heat transfer, 112, 119

- internal energy, 12, 18, 20

- kinetic theory, 3, 16, 20
- Knudsen layers, 107, 108, 120, 124, 126, 136
- Knudsen number, 104, 112, 121–124, 126–128, 140, 147, 149, 156, 160

- linearized Boltzmann equation, 50, 55, 60, 103–105, 108, 111, 116, 122, 126, 131, 133, 136, 139, 141–143, 145, 148, 149
- linearized collision operator, 41, 43, 56, 103, 112, 113, 123, 132

- Mach number, 140

- mass flow, 17
- Maxwellian distribution, 22, 103, 111–113, 117, 118, 124, 132, 138, 140, 141
- mean free path, 25, 105, 107, 108, 114, 134–138, 140, 145, 147, 152
- MEMS, 145, 149, 160
- microchannel, 149–154
- molecules, 1–5, 7, 9–12, 22, 25, 26, 105, 111, 113, 123, 124, 126, 127
- momentum density, 17
- momentum flow, 17, 18

- Navier–Stokes equations, 136, 140, 161

- phase space, 5, 12, 16, 17
- Poiseuille flow, 115, 123–125, 127, 131, 137, 138, 140, 146–149, 151, 154, 155, 157, 160
- pressure, 1, 2, 4, 8, 20, 25, 110, 111, 123–127, 134–136, 142, 145, 146, 148, 149, 156–161
- pressure sensor systems, 149

- Reynolds equation, 146, 148–154, 156, 160, 161

- scattering kernel, 71–74
- specular reflection, 5, 10, 19, 22, 23, 70, 73, 91, 141
- Stokes equations, 140, 142, 143
- Stokes paradox, 140, 143
- stress tensor, 18, 20, 108, 120, 134
- stresses, 2, 4, 18

- temperature, 1, 2, 4, 8, 20, 25, 105, 108–111, 115, 118, 123, 124, 134, 136, 141, 142
- temperature jump, 136

- uniqueness, 3, 4, 30, 36, 37, 39, 82, 99
- validity, 3, 4, 29, 30, 32, 34–36
- variational method, 115, 116, 119–123, 128, 137–140, 157
- variational principle, 115, 117
- wall, 1, 22
