

List of Figures

Fig. 1. Classification scheme of purposes of appraisal.....	26
Fig. 2. PE ratio for different aggregation methods.....	41
Fig. 3. Premiums and discounts in the eyes of analysts and investors	43
Fig. 4. Comparable company selection (in the eyes of analysts and investors).....	48
Fig. 5. Valuation model choice (in the eyes of analysts and investors).....	48
Fig. 6. Development of informational efficiency on the German stock market (in the eyes of analysts and investors).....	66
Fig. 7. The difference of market prices and intrinsic values of DAX-companies (in the eyes of analysts and investors).....	67
Fig. 8. Impact of similarity and pricing quality on the choice of the valuation models and the number of peer group companies needed	72
Fig. 9. Reference variables for enterprise and equity valuation	77
Fig. 10. The pointlessness of the price-sales ratio.....	79
Fig. 11. The translation of reference variables to respective free cash flows.....	80
Fig. 12. The “earnings – book value” relevance cube for going concern companies.....	86
Fig. 13. The “earnings/cash flows” relevance square.....	89
Fig. 14. The general value relevance of trailing and forward bases of reference ..	90
Fig. 15. The relationship between future similarity of companies and reference variable selection in two typical cases.....	93
Fig. 16. The use of income statement related bases of reference in classical single-factor models for four typical sales-cost scenarios	95
Fig. 17. Impact of valuation model choice on the number of comparable companies available	99
Fig. 18. The integrated process of comparable company valuation	101
Fig. 19. “Value – reference variables” associations	109
Fig. 20. The difficulty of determining the long-term growth rate (in the eyes of analysts and investors)	111
Fig. 21. Effect of the growth rate on the corporate value.....	111
Fig. 22. Development of the growth rate over time in different valuation models	115
Fig. 23. The relation between sales and operating profit.....	117
Fig. 24. The relation between sales growth and implicit EBIT growth.....	118
Fig. 25. Factors influencing the long-term growth rate (in the eyes of analysts and investors)	119
Fig. 26. Company-specific variables influencing the long-term growth rate (in the eyes of analysts and investors).....	119

Fig. 27. PE ratio and PEG ratio for different growth scenarios.....	121
Fig. 28. Growth sensitivity of the PE ratio and the PEG ratio	121
Fig. 29. Recursion value and reorganisation value.....	133
Fig. 30. The two-factor comparable company valuation model.....	135
Fig. 31. Effects of matching.....	160
Fig. 32. Matching protocol.....	162
Fig. 33. Development of the stock market and the economy in Germany during the sample period.....	164
Fig. 34. Plot of the PB-ROE Association.....	171

List of Tables

Table 1. Similarity requirements for selected single-factor models.....	52
Table 2. Sample composition.....	140
Table 3. Overview of the relevant value relevance studies.....	142
Table 4. Porter’s five forces analysis.....	150
Table 5. The rating by Creditreform.....	152
Table 6. Extracting the impact of earnings out of creditworthiness.....	154
Table 7. Basic descriptive statistics.....	163
Table 8. Correlations.....	165
Table 9. Value relevance of different accounting variables.....	167
Table 10. Incremental R^2 of equity value variables.....	168
Table 11. Incremental R^2 of enterprise value variables.....	168
Table 12. Convexity in the PB-ROE Association.....	171
Table 13. The general valuation roles of book value and earnings.....	173
Table 14. Impact of industry structure on the relative valuation roles of book value and earnings.....	174
Table 15. Impact of corporate asset heaviness on the relative valuation roles of book value and earnings.....	176
Table 16. Impact of creditworthiness on the relative valuation roles of book value and earnings.....	178
Table 17. Impact of earnings adjusted creditworthiness on the relative valuation roles of book value and earnings.....	179
Table 18. Complete regression model and robustness check on the relative valuation roles of book value and earnings.....	182
Table 19. Probit estimations on industry structure (D1) and creditworthiness (D3).....	183
Table 20. Matching success under common support.....	184
Table 21. Matching results (Epanechnikow Matching).....	185
Table 22. Mean comparison of the covariates after Epanechnikow Matching ...	186
Table 23. Matching results (Mahalanobis Distance).....	187
Table 24. Mean comparison of the covariates after Mahalanobis Matching	187
Table 25. Absolute percentage valuation errors of different CCV models.....	194
Table 26. Wilcoxon signed rank test for equal valuation errors.....	195
