Subject Index

- aggregation 36
 analytical cell fabrication 1
 — ultracentrifugation 1, 30, 41, 57, 70, 76
 — ultracentrifuge 111
 associations, heterogeneous 12

 barrier, pressure 76
 bienzyme formation 30

 camera, video 111
 cell fabrication, analytical 1
 clupeine 36
 coalescence stability 76
 comparative studies 41
 constants, equilibrium 30

 deformation 84
 dehydrogenase, lactate 23
 demulsification 76
 detection, multiple 111
 digital image processing 57
 discontinuous/continuous equilibrium 84
 dispersions 111
 dissociation, enzyme 30
 distribution, molar mass 62, 111
 —, molecular mass 57
 —, molecular weight 36
 — of sedimentation coefficients 70
 —, particle size 57, 111
 DNA 36

 emulsions 76
 enzyme dissociation 30
 equation, Flory-Huggins 92
 equilibrium constants 30
 —, discontinuous/continuous 84
 —, sedimentation 12, 62

 field, ultracentrifugal 84
 Flory-Huggins equation 92
- folding, protein 23
 formation, bienzyme 30

 gamma-crystallin 23
 gamma-globulin 23
 gels 84
 —, thermoreversible 102
 gelation, thermoreversible 92
 globule, molten 23
 glycoproteins 41

 heterogeneous associations 12
 history 1

 image-processing 111

 lactate dehydrogenase 23
 latex particles 70
 lipoproteins 1
 lyotropic salts 30

 macromolecules 111
 membrane proteins 12
 molar mass 41
 — distribution 62, 111
 molecular mass distribution 57
 — weight determination 12
 — — distribution 36
 molten globule 23
 multiple detection 111

 network, physical 92, 102

 optics, Schlieren 111

 partial specific volume 41
 particle size distribution 57, 111
 parts, soluble 102
 physical network 92, 102
 polymer solutions 62
 pressure barrier 76
- , swelling 84, 92, 102
 processing, digital image 57
 protamine 36
 protein folding 23
 —, membrane 12

 salts, lyotropic 30
 scanner, UV 57
 Schlieren optics 111
 SDS-PAGE 41
 sedimentation coefficients, distribution of 70
 — equilibrium 12, 62
 — velocity run 36
 self-association 12
 soluble parts 102
 solutions, polymer 62
 stability, coalescence 76
 studies, comparative 41
 swelling pressure 84, 92, 102
 —, degree of 54

 technology 1
 thermoreversible gel 102
 — gelation 92

 ultracentrifugal field 84
 ultracentrifugation 23, 92, 102
 —, analytical 1, 30, 41, 57, 70, 76
 ultracentrifuge 36, 62
 —, analytical 111
 UV scanner 57

 velocity run, sedimentation 36
 video camera 111
 volume, partial specific 41

 weight determination, molecular 12
