Subject Index

- activation parameters 148
- behavior, thermal 148
- blends 55
- charge, surface 1
- composite 102
- , polymer 85
- conducting polymer 157
- core-shell structure 85
- crystal, liquid 148
- crystalline structure 119
- crystals, polymer liquid 38
- current, photo-induced 66
- decomposition, spinodal 66
- defect morphology 66
- deformation, large 12
- depolarization 66
- deposition 91
- derivates, perylene 143
- dielectric properties 163
- relaxations 148
- dispersed liquid crystal,
polymer- 133
- distribution of polarization 23
- elastomer 133
- electric poling 60
- electro-optic layer 133
- emulsion polymerization 85
- entanglement-network 12
- ESR — electron spin
resonance 157
- film, organosilicon 91
- films, Langmuir-Blodgett 47
- , multilayers 23
- , polymer 66, 102
- , protein 47
- fluoride, polyvinylidene
(PVDF) 23
- gas permeation 111
- generation, third harmonic 143
- glass transition 148
- grafted polymer layers 38
- harmonic generation, third 143
- interdiffusion 55
- interfaces 55
- interfacial layer 85
- Langmuir-Blodgett films 47
- laser recording 157
- layer, interfacial 85
- layers, plasma polymerized 119
- , polymer 127
- light modulator, spatial 133
- limitations, spatial 148
- liquid crystal 148
- —, polymer-dispersed 133
- liquid-crystalline polymers 127
- low-dimensional systems 38
- membrane 111
- , polymer 133
- membranes 47
- metal particles 102
- model, van der Waals-network 12
- modulator, spatial light 133
- monomolecular polymer layers 38
- Monte-Carlo simulation 66
- morphology, defect 66
- multilayer films 23
- network 119
- , entanglement 12
- neutron reflectivity 55
- NMR, ¹³C CP/MAS 60
- NMR, solid-state ¹H 60
- nonlinear optical properties 143
- optical properties, nonlinear 143
- order, orientational 127
- ordering, orientational 38
- organosilicon film 91
- orientation 66
- orientational order 127
- ordering 38
- parameters, activation 148
- particles, metal 102
- permeation, gas 111
- perylene derivatives 143
- phase transition 38, 163
- photo-induced current 66
- plasma polymer 102
- polymerization 91, 111
- polymerized layers 119
- polarization, distribution of 23
- poly(bis-ethylthio-acetylene)
(PETAC) 157
- poly(N-vinylcarbazole) (PVCa) 66,
119
