

Subject Index

a

ABR 2, 3
ABR abnormality 45
acoustic neurofibroma 33
acoustic tumor 40
adrenoleukodystrophy 57
AFD 25
AI 18
AMLR 87
anoxia 75
anticonvulsant 127
aphasia test 113
appropriate-for-date 25
articulation test 112
ascending auditory system 1, 2
asphyxia 30
auditory agnosia 101, 117, 120
auditory brainstem nucleus 8
auditory brainstem response 2, 98
auditory comprehension 53, 100
auditory cortex 3, 4, 83, 114, 130, 135
auditory cortex ablation 104
auditory middle-latency response (AMLR)
87, 108
auditory nerve 33
auditory nerve disease 38
auditory neuropathy 38
auditory perception 98
auditory radiation 83, 95
auditory verbal agnosia 127
auditory-evoked magnetic field 87
autosomal-dominant inheritance 40

b

basal ganglia 69
beaked nose 71

behavioral audiometry 27, 76
behavioral threshold 21
brain anomaly 120
brain malformation 124
brainstem auditory nucleus 13
brainstem lesion 45, 69

c

callosal auditory fiber 141
callosal section 137
CAP 34, 37
cerebellopontine angle tumor 34, 50
cerebral infarction 97
cerebral palsy 76
cerebrovascular accident 83
Charcot-Marie-Tooth 43
chloralose 16
cochlear implant 29
cochlear nerve 3, 14, 33
cochlear nucleus 3, 11, 13, 14, 33,
65
Cockayne's syndrome 68
compound action potential 33, 34
convergence nystagmus 80
corpus callosum 137
cortical anarthria 110
cortical deafness 95

d

degeneration of white matter 60
demyelination 57
development 21
dichotic listening test 80, 84
dipole 89
dipole localization 88

distortion-product otoacoustic emission
 (DPOAE) 39, 111
 dominance effect 142
 DPOAE 39

e

ear advantage 84
 ECD 89
 ECochG 3, 37
 electrocochleography 33
 electronystagmography 62
 environmental sound 84
 environmental sound perception test
 99, 113
 epilepsy 77
 epileptic aphasia 127
 epileptic auditory agnosia 125
 equivalent current dipole 93
 event-related potential 2

f

Field-potential 11
 Friedreich's ataxia 40, 43
 front temporal dementia 110, 111
 functional MRI 5

g

Gaucher's cell 64
 gaze paralysis 80
 gene mutation 61
 generators of the ABR 7
 gliosis 103
 Guillain-Mollaret's triangle
 54, 56

h

hemispheric asymmetry 15
 herpes encephalitis 117
 herpes simplex encephalitis 119
 Heschl's gyrus 103
 high-risk infant 29
 horizontal gaze-evoked nystagmus
 71
 horseradish peroxidase 11
 HRP 11, 13, 14
 hydranencephaly 120
 hyperbilirubinemia 30
 hypermyelination 57
 hypoxia 75

i

IC 8
 IID 132
 infantile Gaucher's disease 64
 inferior colliculus 3, 78
 inferior olivary nucleus 54
 interaural intensity difference (IID)
 129
 interaural time difference (ITD) 129
 ITD 132

j

Japanese macaque 19
 Jewett 4

k

K complex 108

l

Landau-Kleffner syndrome 125
 lateral gaze nystagmus 80
 lateral lemniscal nucleus 11
 left putaminal hemorrhage 84
 left-ear extinction 141
 Leigh's syndrome 73
 lemniscal nucleus 13, 14
 lesion effect 142
 lip reading 97
 long-latency response 4, 111
 low redundancy speech 52

m

magnetic encephalography 5, 87
 medial geniculate body 103
 MEG 5
 melody deafness 83
 Menière's disease 40
 meningitis 40
 mental retardation 77
 microcephaly 69
 midbrain 78
 middle latency response 2, 15
 middle-latency auditory magnetic field
 (MLAEF) 108
 midline transection of the brainstem
 12
 mitochondrial encephalomyopathy
 73
 MLAEF 87

- monosyllable 46
 monosyllable perception test 139
 monosyllable test 46, 95
 myelin islet 61
- n**
- N1 4
 NA 18
 near-drowning 75
 near-suffocation 75
 neonate 22
 NICU 30
 non-auditory-specific pathway 110
 nonsense monosyllable 83
- o**
- OAE 5
 olivary complex 14
 olivopontocerebellar degeneration 51
 organ of Corti 34
 otoacoustic emission 5
 ototoxic 24
 ototoxic drug 40
 outer hair cell 5
- p**
- P300 2, 137
 PA 18
 palatal myoclonus 54
 patchy demyelination 69
 Pelizaeus-Merzacher disease 61
 pendular nystagmus 62
 perinatal period 75
 persistent pulmonary hypertension 29
 phase reversal 11
 pinealoma 79
 positron emission tomography (PET)
 106, 109, 113
 postconceptional age 25
 PPHN 29
 preservation and isolation 108
 preterm infant 24
 primary auditory cortex 15, 95
 primary progressive aphasia (PPA) 114
 progressive deafness 29
 proteolipid protein 61
 pulmonary disorder 30
 pure word deafness 85
 pure-tone audiometry 98
 putaminal hemorrhage 106
- r**
- regional cerebral blood flow (rCBF)
 109
 residual hearing 101
 retinal pigmentation 71
 retrocochlear hearing loss 42
 retrograde degeneration 104
 right temporal lobe hemorrhage 85
 right-ear advantage 142
- s**
- sacculoinferior vestibular nerve 5
 semicircular canal 5
 sensory neural hearing loss 69
 SFD 25
 short sentence comprehension test
 39
 slow vertex response 2
 small-for-date 25
 sound image 131
 sound lateralization test 131
 sound localization 129
 sound spectrography 112
 SP 39
 speech audiometry 39, 61
 speech discrimination 79, 80
 speech discrimination test 98
 speech perception 45
 spike-and-wave complex 127
 spiral ganglion cell 34
 SQUID 88
 subcortical necrosis 103
 summing potential 39
 sunken eye 71
 superior olivary complex 11, 13, 53,
 68
 superior olivary nucleus 65
- t**
- temporal bone pathology 34
 TEOAE 40
 Token test 39, 47, 53, 95, 100, 113
 transient evoked otoacoustic emission
 40
 tympanometry 39
- u**
- unilateral auditory cortex lesion 93
 upper brainstem 78
 urethane 16

v

VEMP 5
verbal auditory agnosia 127
vestibular myogenic potential 5
vestibular nerve 33
vestibular nucleus 33, 65
vestibular nystagmus 71
vestibular schwannoma 33, 37

w

waves I and II 48
Wernicke's area 114
whole brainstem mapping 8
word deafness 83
word recognition test 39, 139
