

# Index

## A

Asymptotic turnpike property, 93  
Aumann–Gelfand integral,  $X$  over set  $A$ , 4  
Aumann integral, 9, 10

## B

Baire category, 93  
Banach space, 100  
Bermudan derivatives, 58, 59  
Bolza problem, 92

## C

Cardinality, 96  
 $cc$  (E), 3  
 $ck$  (E), 3  
Closed convergence topology, 34, 35, 39, 41, 45  
Compact metric space, 92  
Conditional expectation, level sets, 11, 12, 13, 14, 19  
 $cwk$  (E), 3

## D

Demand function, 34–37, 41, 43–45  
Discrete-time optimal control system, 92

## E

Estimate error, 34, 35, 41, 45  
Expectation of random fuzzy convex integrands, 18

Expectation of the level sets, 11, 12  
Expected value (or expectation), 26

## F

F-measurable, 3  
Fuzzy conditional expectation, 18, 19, 26  
Fuzzy convex upper semicontinuous variable, 8  
Fuzzy expectation, 18, 19  
Fuzzy martingale, 26  
Fuzzy set valued random variables, 2  
Fuzzy submartingale, 26  
Fuzzy supermartingale, 26

## G

Gelfandintegrable selections, 4  
( $v$ )-Good program, 93

## H

Hörmander type diffusion process, 61, 78–81

## I

Infinite horizon optimal control problem, 93  
Infinite interval, 92  
Integrability theory, 3, 34  
Integrably bounded mappings, 4  
Integrand martingales, 27  
Inverse demand function, 35, 36, 38, 41, 45, 52

**K**

$K^*$ -valued random set, 5

**L**

Lagrange problem, 92

Least square regression methods, 58

Local  $C^1$  topology, 35, 41–43, 45

Local uniform topology, 41, 45

Lower semicontinuous integrand martingale,  
27

**M**

Martingales, 27

Monte Carlo methods, 58

**N**

Normal integrand, 4

**O**

Optimal control problem, 92

Overtaking optimal program, 98, 99

**P**

Perturbation, 98

Preference relation, 34, 35, 38, 42, 43, 45

( $\Omega$ )-Program, 92

p-transitive, 34, 36, 38, 42, 43

**R**

Random fuzzy convex upper semicontinuous  
integrands, level sets, 9, 12

Random fuzzy convex upper semicontinuous  
variable, level sets, 8–9

Random lower semicontinuous integrands, 8

Random systems of piece-wise polynomials,  
60

Random upper semicontinuous integrands, 8

Re-simulation, 71–73

Revealed preference theory, 34

**S**

Scalarly F-measurable mapping, 3, 4

Scalarly integrable, 4

Sequential weak\* lower limit  $w^* - li X_n$ , 6

Sequential weak\* upper limit  $w^* - ls X_n$ , 6

Support function, 3

**T**

Turnpike phenomenon, 93

**W**

Weak axiom of revealed preference, 34

Weakly compactly generated (WCG), 6

Weak star ( $w^*$  K for short) converges, 6

$w^*$ -topology, 3
