

Index

A

Acquisitions approach, 5, 226
Adjustment hazard function, 315
Age adjustments, 132
Age effect, 61
Aggregation bias, 56
Appraisal-based methods, 35
Appraisal prices, 71
Asking prices, 152

B

Basic builder's model, 166
Bid function, 37
Builder's model, 188

C

Carli, 14, 15
Carli index, 16
Chained Fisher index, 88
Chained matched model methodology, 8
Commercial property price, 214
Commercial property price indexes, 184
Consumer durables, 239
Consumer Price Index (CPI), 182
CPI Manual, 16

D

Data source, 204
Depreciation problem, 8
Durables Augmented System of National
Accounts (DASNA), 6
Dutot, 15
Dutot index, 16
Dutot type, 13

F

Fisher, 54
Fisher index, 88
Fisher property price index, 213
Fixed base Fisher index, 88
Functional forms, 21

G

Generalized Additive Model (GAM), 42
Granger-cause, 148

H

Hedonic approach, 36
Hedonic imputation indexes, 100
Hedonic imputation regression models, 100
Hedonic methods, 20, 55
Hedonic price method, 36
Housing price index, 19

I

Imputed hedonic indexes, 43, 45
Imputed rent approach, 5

J

Jevons, 15
Jevons indexes, 15

L

Land and structures, 21
Land and structures price indexes, 103
Laspeyres, 53
Light bulb depreciation, 246

Linear time dummy hedonic regression model, [97](#)

M

Matching estimation, [68](#)
 Mix adjustment methods, [35](#)
 Multiple geometric depreciation rates, [196](#)
 Multiple straight line depreciation, [199](#)

O

Offer function, [39](#)
 One hoss shay, [246](#)
 Opportunity cost, [28](#)
 Opportunity cost approach, [238](#)

P

Paasche, [53](#)
 Payments approach, [286](#)

Q

Quality-adjusted price indexes, [43](#)
 Quantile hedonic approach, [159](#)

R

Real Estate Investment Trusts (REIT), [186](#)
 Real estate price index, [17](#)
 Renovations problem, [8](#)
 Rental equivalence, [27](#)
 Rental equivalence approach, [229](#)
 Repeat sales approach, [8](#)
 Repeat sales method, [56](#)
 Residential property price indexes, [128](#)
 Residential Property Price Indices Handbook, [35](#), [127](#)

Rolling window hedonic regressions, [115](#),
[134](#)
 Rolling year indexes, [89](#)

S

Sales Price Appraisal Ratio (SPAR), [10](#), [73](#)
 Sample selection bias, [66](#)
 Scanner data, [30](#)
 Single geometric depreciation rate, [188](#)
 Smoothing problems, [72](#)
 Standard hedonic regression model, [130](#)
 Standard repeat sales model, [131](#)
 State-dependent, [313](#)
 Stock market data, [214](#)
 Straight line depreciation, [244](#)
 Stratification methods, [18](#)
 System of National Accounts (SNA), [3](#), [181](#),
[184](#)

T

Tax assessment, [207](#)
 Time-dependent, [313](#)
 Time dummy hedonic indexes, [43](#)
 Time dummy hedonic regression models, [92](#),
[97](#)

U

Unit value bias, [18](#)
 User cost approach, [232](#)
 User costs, [27](#)

W

Willingness to pay, [39](#)
