

Index

A

Actin, 99, 102
 α -Actinin, 117
Activity sensors, 332
Acto-myosin contraction, 261–262
Adherens junction (AJ), 46, 94
Adhesion, 226
Adhesion arm, 24
Adhesion-inhibitory antibody, 4
Adhesive strength, 342
Adhesome, 353
ADIP, 117
Adiponectin, 281
Afadin, 117
Akt, 131
Akt/ β -catenin signaling, 381
Alcadein, 293
Allosteric changes, 55
Alopecia, 141
Alpha-catenin, 43, 46
Alzheimer's disease (AD), 142
AMP-activated kinase (AMPK), 383
Amygdale, 143
Amyloid precursor protein (APP), 293
Apex–apex junction, 135
Apical constriction, 127
Apical junctional complex, 135
Apico-basal polarity, 125, 324
apoe (apolipoprotein E), 142
Apoptosis, 170
ARM repeats, 28
Armadillo proteins, 28
A* strand, 77
Atypical cadherins, 17
Atypical protein kinase C (aPKC), 126

Auditory epithelium, 133
Autism spectrum disorders, 239, 332
Axon formation, 326–327
Axon patterning, 327–328
Axonogenesis, 328

B

Bacterial toxins, 180
Barrier function, 49–51
Bax, 209
Beta-catenin, 43, 59
Boundary formation, 52
Bovine herpes virus, 140

C

CA1, 142
CA3, 132
Ca²⁺ dependent, 165
Ca²⁺-dependent cell adhesion, 5
Cadherin, 116, 117, 119, 120, 122–129,
131–135, 137–145
diversity, 42
extracellular domain, 94–97
intracellular domain, 97–99
introduction, 41–43
nomenclature, 14
refinement, 330
regulation, 53–57
subtype switching, 318
switch, 373
Cadherin-13, 277–285
Cadherin-16, 300–301
Cadherin-17, 298–300

- Cadherin-23, 85, 350
 Cadherin major branch (CMB), 15
 Cadherin-related (CDHR) proteins, 25
 Cadherin-related major branch (CrMB), 15
 Cajal–Retzius (CR) cell, 137
 Calcium, 45
 Ca²⁺ ligands, 73
 Calsyntenins, 27, 293
 Calyceal processes, 355
 Cancer, 144, 284
 immunotherapy, 383
 therapeutics, 383
 Canine distemper virus, 140
 Ca²⁺-switch, 168
 Cardiomyopathies, 181
 Cataract, 141
 Catch bond, 104
 Catenins, 6, 28, 42, 56, 196
 α -Catenins, 32, 117
 α E-Catenins, 102–105
 β -Catenins, 30, 99–102, 117
 β -Catenin subfamily, 30
 δ -Catenins, 30
 CCCTC-binding factor (CTCF), 206
 CD155, 120
 Cdc42, 126
 CDH13, 19
 CDHR5, 27
 CDH(R)23, 27
 Cell–cell adhesion molecules (CAMs), 116
 Cell–cell contact, 125
 Cell-cycle, 101
 Cell communication, 51
 Cell density, 106
 Cell movement, 129
 Cell planar polarity, 347
 Cell polarity, 324
 Cell proliferation, 131
 Cell-rearrangements, 48
 Cell sorting, 47, 52
 CELSR/flamingo, 21, 22, 134, 252, 266
 CELSR1, 256–263
 Cerebral cortex, 201, 211
 Checkerboard-like cell arrangement, 133
 Cilia, 254, 256
 Ciliary epithelium, 135
Cis-dimer, 120
Cis interactions, 81–85, 165
 Classical cadherins, 17, 196
 Claudin, 127
 Clathrin-dependent endocytosis, 129
 Cleft lip/palate, 141
 Clustered Pcdh, 197
 Clustered protocadherins, 24, 75, 86
 Cochlea, 355
 Collective movement, 316
 Combinatorial code, 330
 Compaction, 48, 53
 Constant regions, 201
 Contact inhibition, 60, 61, 129
 Contextual fear memory, 143
 Convergent-extension, 230, 347
 Core functions, 43–46
 Cortical tension, 52
 Corticotropin-releasing hormone
 receptor 1, 143
 Crb3, 127
 Crystal structure, 45
 c-Src, 131
 Cutaneous syndactyly, 141
 Cyclins D2 and E, 131
 Cytoplasmic domains, 163
 Cytoplasmic functions, 43
 Cytoskeletal attachment, 48
 Cytoskeleton, 43, 46, 50, 58, 354
- D**
 Dachous (Ds), 85, 252, 263–265, 268
 7D cadherins, 17
 DCHS1 (Dachous 1, CDHR6), 25, 265–268
 3D domain swapping, 77
 Deafness, 353
 Delta-catenin, 31
 Delta-catenin subfamily, 30
 Delta-protocadherins (δ -Pcdh), 22
 Desmocollins, 8, 17
 Desmoglea, 160
 Desmogleins, 8, 17
 Desmoglein 2 (Dsg2), 379
 Desmoglein 3 (Dsg 3), 379
 Desmosmal cadherin ectodomains, 74
 Desmosomal cadherins (DCs), 17, 159
 Desmosomes, 125, 159, 378
 assembly, 168
 junctions, 84
 Development, 175
 Differentiation, 173, 325
 Diffusion trap, 84
 Dishevelled, 134, 261
 DNAX accessory molecule 1 (DNAM1 or
 CD226), 120
 Dnmt3b, 206
 Dorsal telencephalon, 142
 Downregulation, 170
 E-cadherin, 369

E

E-cadherin (CDH1), 14, 19, 366
 EC repeats, 14, 196
 Ectodermal dysplasia–syndactyly syndrome-1 (EDSS1), 141
 Ectodermal dysplasia syndrome, 141
 Ectodomain, 264–265
 Edelman, G.M., 4
 Electromotility, 344
 Endocytosis, 53, 97, 179
 Endothelial nitric oxide synthase, 131
 Enteric nervous system, 290
 Ependymal cell, 142
 Epidermal blistering, 178
 Epidermal growth factor receptor (EGFR)-mediated signaling, 378
 Epilepsy, 240
 Epithelial cell, 125
 Epithelial-to-mesenchymal transition (EMT), 238, 317, 369
 Epithelial remodelling, 348
 ERK, 131
 Evolution, 21
 Evolutionary history of β -catenin, 30
 Extracellular cadherin (EC) domains, 72, 265
 Extracellular domains, 45

F

Facial branchiomotor (FBM) neurons, 266
 F-actin polymerisation, 353
 Fascia adherens, 46
 Fasciculation, 233
 Fat, 9, 85, 252, 263–265, 268
 FAT4 (CDHR11), 25, 265–268
 FAT-like, 26
 FGD-related Cdc42 GEF (FRG), 126
 Fiber cell, 136
 Fibrofatty replacement, 182
 Flamingo/starry night, 252, 253, 257–259
 Flexibility, 166
 Focal adhesion kinase (FAK), 201
 Four-jointed, 264
 Frizzled (Fz), 134, 257, 266

G

Gastric cancer, 299
 Gastrulation, 316–318
 Gating spring, 351
 GDNF family ligands, 288
 Geiger, B., 6
 Gene cluster, 171

Genetic mutations, 367
 Giant cadherins, 85–86
 Glia-dependent migration, 137
 Glia-independent migration, 137
 Growth factor receptors, 59

H

Hair bundles, 346
 Hair cells, 342
 Hair follicles, 259
 Hedgehog signaling, 385
 Herpes simplex viruses (HSV), 140
 Herpes virus, 140
 Heterophilic interactions, 330
 Heterotypic cell–cell adhesion, 116
 Hippocampus, 132
 Hippo signaling pathway, 60
 Hippo tumor suppressor signaling pathway, 371
 Hirschsprung’s disease, 291
 Holtfreter, J., 3
 Homophilic, 45, 167, 197, 227
 Homotypic cell–cell adhesion, 116
 Hydrocephalus, 142
 Hyperadhesion, 164
 Hypermethylation, 367

I

IgA pemphigus, 180
 Inner ear, 344
 Integrin, 129
 Interdomain linkers, 77
 Intrinsic disorder, 164
 Intrinsically disordered proteins (IDPs), 228
 Invasion, 371
 Involution, 317

J

Junctional adhesion molecule (JAM), 127

K

Kallikreins (KLKs), 379
 Kemler, R., 6
 Kidney, 265
 Kidney development, 292
 Kif3a, 134
 Kinocilium, 133
 Ksp-cadherin, 300

L

LI-cadherin, 298
 Lis1, 134
 LMO7, 117
 Long term potentiation (LTP), 332
 Loss of cadherin adhesions, 324
 Loss of heterozygosity (LOH), 367

M

MARCKS, 201
 Matrix metalloproteinase, 199
 Matrix metalloproteinase 9, 144
 Measles virus, 140
 Mechanical force, 106
 Mechanoelectrical transduction (MET), 344
 Mechanosensors, 372
 MEK, 131
 Membrane palmitoylated protein 3 (MPP3), 122
 Metastasis, 364
 Metazoan genomes, 15
 Metazoans, 15
 Methylation, 205
 MF synapse, 132
 Microenvironment, 372
 MicroRNAs (miRNAs), 368
 Microtubule dependent, 169
 Midbrain, 142
 Midline, 160
 Migration, 371
 Morphogenesis, 47–49
 Motor neurons, 329
 Motor neuron pool, 329
 Motor pool, 75
 Multiple PDZ domain protein (MUPP1/MPDZ), 122
 MUPCDH, 27
 Mutations, 180
 Myosin, 261–262, 266

N

N-cadherin, 19
 Nectins, 46, 51, 116, 117, 119, 120, 122–129, 131–135, 137–145
 Nectin-like molecules (Necls/CADMs), 120
Nematostella vectensis, 15
 Neural crest cell migration, 318–319
 Neural disorders, 332–333
 Neural progenitor cell maintenance and differentiation, 321–328, 330, 331
 Neural progenitor cells, 265

Neural tissue morphogenesis, 316–320
 Neural tube, 127
 closure, 266
 formation, 261–262
 Neurocristopathies, 319
 Neuroendocrine cancers, 290
 Neuroepithelial cells, 127, 324
 Neuroepithelial progenitors, 321
 Neuronal-cadherin (N-cadherin), 373
 Neuronal clustering, 329–331
 Neuronal migration, 267
 Neuron-restrictive silencer factor (NRSF), 206
 Neurons, 24
 Neurulation, 232, 318
 NK cell, 144
 Nonmetazoan, 33
 Nonsensory supporting cells (SCs), 133
 Notch, 376
 Notch signaling, 385

O

OB-cadherin, 375
 Occluding junctions, 50
 Ocular lens, 136
 Oncogenic signaling pathways, 374
 Optic fissure, 320
 Optic tectum, 236
 Organ of Corti (OC), 133
 Oriented cell division (OCD), 265
 Otic placode, 262
 Oviduct, 254, 256, 262–263
 Ozawa, M., 6

P

p120-catenin, 44, 54, 56
 p120^{ctn}, 117
 p190RhoGAP, 126
 p27Kip1, 131
 p38MAPK signalling, 179
 Pals1-associated tight junction protein (PATJ), 122
 Par-6 (PARD6A in mammals), 126
 Partitioning defective 3 homologue (Par-3/PARD3 in mammals), 122
 P-cadherin, 259
 Pcdh 15, 27, 85, 350
 α -Pcdhs, 200
 γ -Pcdhs, 200
 Pemphigus, 177
 Peste des petits ruminants virus, 140
 Peyer's patch formation, 292

Pharmaceutical intervention, 382
 Phosphorylation, 56, 98, 99, 170
 Photoreceptor cells, 355
 Phylogenetic analysis, 31
 Pigment and nonpigment cell, 135
 Placental-cadherin, 374
 Plakoglobin, 30, 381
 Plakophilins, 31
 Planar cell polarity (PCP), 125, 252, 348
 Plaques, 162
 Platelet-derived growth factor (PDGF), 129
 PMP-22 (PERP), 382
 Poliovirus, 140
 Poliovirus receptor (PVR), 120, 140
 Ponsin, 117
 Postsynaptic density (PSD), 207
 Prickle, 134
 PRKCA1 (PICK1), 122
 Projection neuron, 137
 Proliferation, 105, 321
 Prometastatic processes, 364
 Promoter choice, 204
 Protein clustering, 169
 Protein kinase C (PKC), 166, 201
 Protein processing, 368
 Protein tyrosine phosphatase, nonreceptor
 type 13 (PTPN13), 131
 Protocadherin (Pcdh), 8, 22, 196, 223
 Pseudorabies virus, 140
 PTP μ phosphatase, 131
 Puncta adherentia junctions (PAJs), 118
 Purkinje cell, 204
 Pyk2, 201

R

Rac1, 126
 Radial glial cells (RGCs), 137
 Radial glial fiber, 137
 Raf, 131
 Rap1, 127
 Ras, 120
 RE-1 silencing transcription factor
 (REST), 206
 Reelin, 137
 RET (CDHR16), 27, 285
 RET signaling, 288–289
 Retinal-cadherin (R-cadherin), 377
 Retinal ganglion cells, 327
 Retinal morphogenesis, 320
 Rho GEF, 127
 Rho kinase, 127
 Rho1, 127

RhoA, 126
 Rosettes, 323

S

SAM syndrome, 181
 Schizophrenia, 333
 Secretase, 200
 Selectivity and sorting, 51–53
 Self-avoidance, 213
 Sensory hair cell, 133
 Seven-pass transmembrane (7-TM) cadherins,
 252, 263, 266–269
 SH3P12, 126
 Shroom, 127
 Signaling, 49, 57–61
 Signalling pathways, 171
 sorbs1, 126
 Specific adhesion hypothesis, 3
 Sprouty, 131
 Stereocilia, 256, 265, 349
 Stereociliary bundle, 133
 Stereociliogenesis, 355
 Sternum, 266
 Strain, 101
 Strand-swap binding, 77–79
 Stratum lacunosum moleculare, 142
 Stratum lucidum, 132
 Stress-induced cognitive dysfunction, 143–144
 Subcortical band heterotopia, 143
 Suzuki, S.T., 8
 Synapse, 51, 331–333
 Synapse formation and function, 331–332
 Synaptic junctions (SJs), 132
 Synaptic plasticity, 295
 Synaptic vesicle, 133
 Synaptosome, 207
 SynCAM1, 120

T

T cell, 144
 T cell immunoreceptor with Ig and ITIM
 domains (TIGIT), 120
 Tactile (CD96), 120
 Tage4, 120
 Takeichi, M., 5
 T-cadherin, 81, 277–285
 Tension, 96
 TGF- β signaling, 376
 Tight junctions (TJs), 125
 Tip-link, 75, 351
 Townes, P.L., 3

Trans interactions, 94
 Transcription factors, 172, 367
trans-dimer, 120
 Transgenic mice, 173
Trichoplax adhaerens, 15, 31
 Trp2, 77
 Trp4, 78
 Truncated-cadherin (T-cadherin), 377
 Tumor microenvironment, 375
 Tumorigenic stem cell populations, 384
 Tumor-suppressing activities, 379
 Turnover, 99
 Type-I cadherins, 17, 74
 Type-II cadherins, 17, 74
 Type-III cadherins, 21
 Tyrosine kinase receptor signaling
 pathways, 385

U

Ubiquitinated, 235
 Urmetazoan, 21
 Usher syndrome, 349
 Uvomorulin, 5

V

Valve, 262, 267
 Van Gogh/ Strabismus, 257
 Vang-like (Vangl), 134
 Vascular endothelial- (VE-) cadherin, 376

Vascular endothelial growth factor
 (VEGF), 131
 Vascularization, 376
 Vav2, 126
 VE-cadherin, 78
 VEGFR2, 376
 Vertebrates, 15
 Vinculin, 104, 117

W

Whole-genome duplications (WGD), 15, 33
 Willin, 122
 Wing Hairs, 253–255
 Wnt, 214
 β -catenin, 174
 pathway, 59
 signaling, 385
 Wound healing, 176

X

X-Dimers, 79–81

Z

Zebrafish, 175
 Zipper model, 6
 Zonula adherens, 46
 Zyxin, 122
