Keyword Index

A

Accident analysis 185
Adaptive economic agents 141
Agent-based computational economics 141
Agent-based simulation 53, 67, 185
Artificial market 67
Artificial stock market 53

B

Business game 91
Business simulator 91

C

Codification strategy 123
Complex adaptive system 141
Complex networks 37
Complex systems 67
Cross-model validation 171

D

Distributed computation 3

E

Economics 3

F

Forward market 77

G

Gaming simulation 91

H

High-tech industry 25
Human-machine agent participation 53
Human-machine participation 91

I

Innovation 25

K

Knowledge accumulation 107
Knowledge management 123
Knowledge representation schemes 171
Knowledge sharing 107, 123

L

Learning mechanisms 171

M

Market-based model 77
Multiagent 91
Multiagent system 3, 77, 171

N

Network resource allocation 77

O

Object-oriented programming 171

P

Pedestrian flow 185
Personalization strategy 123
Price fluctuation 67

R

R&D 25
Rational expectations equilibrium 141
Re-combination ability 107
Resource allocation 25

S

Simulation 123
Stochastic process 37
