

Bibliography

Works by E. Husserl

- Philosophie der Arithmetik. Logische und psychologische Untersuchungen, Bd. I, Pfeffer, Halle a.d.S. 1891. English translation: Willard D (ed) (2003) Philosophy of arithmetic, psychological and logical investigations with supplementary texts from 1887–1901. Kluwer, Dordrecht
- Logische Untersuchungen, Bd I: Prolegomena zur reinen Logik, Max Niemeyer, Halle, 1900 (²1913). Bd II: Untersuchungen zur Phänomenologie und Theorie der Erkenntnis, Max Niemeyer, Halle a.d.S, 1901 (²1913–1921). English translation: Findlay JN (ed) (1970) Logical investigations. Routledge, New York
- Ideen zu einer reinen Phänomenologie und phänomenologischen Philosophie, Jahrbuch für Philosophie und phänomenologische Forschung I, 1913, 1–323 [as a separate volume: Niemeyer, Halle a.d.S 1913; ²1922; ³1928]
- English translation: Ideas pertaining to a pure phenomenology and to a phenomenological philosophy. First Book: Kersten F (1982) General introduction to a pure phenomenology. In: Edmund Husserl, Collected works vol. II. Springer, Berlin
- Jahrbuch für Philosophie und phänomenologische Forschung X (1929) Formale und transzendente Logik. Versuch einer Kritik der logischen Vernunft [as a separate volume: Niemeyer, Halle a.d.S 1929]

* * *

- Husserliana, Gesammelte Werke. I–XXVI: Martinus Nijhoff, Den Haag 1950–; XXVII–XXXVII: Kluwer, Dordrecht 1989–; XXXVIII–: Springer, New York, 2005
- Vol. III: Ideen zu einer reinen Phänomenologie und phänomenologischen Philosophie. Erstes Buch; Allgemeine Einführung in die reine Phänomenologie. Neue, auf Grund der handschriftlichen Zusätze des Verfassers erweiterte Auflage (W. Biemel, ed.), 1950
- Vol. XII: Philosophie der Arithmetik. Mit ergänzenden Texten (1890–1901) (L. Eley, ed.), 1970
- Vol. XVII: Formale und transzendente Logik. Versuch einer Kritik der logischen Vernunft (P. Janssen, ed.), 1974
- Vol. XVIII: Logische Untersuchungen. Erster Band: Prolegomena zur reinen Logik (E. Holenstein, ed.), 1975
- Vol. XIX/1: Untersuchungen zur Phänomenologie und Theorie der Erkenntnis. Erster Teil (U. Panzer, ed.), 1984
- Vol. XIX/2: Untersuchungen zur Phänomenologie und Theorie der Erkenntnis. Zweiter Teil (U. Panzer, ed.), 1984
- Vol. XXII: Aufsätze und Rezensionen (1890–1910) (B. Rang, ed.), 1979

- Husserliana, Materialienbände. I–VII – : Kluwer, Dordrecht 2001 – ; VIII – : Springer, New York 2006
- Vol I: Logik: Vorlesung 1896 (E. Schuhmann, ed.), 2001
- Vol II: Logik Vorlesung 1902/03 (E. Schuhmann, ed.), 2001

Works by Other Authors

- Bolzano B (1810) *Beyträge zu einer begründeteren Darstellung der Mathematik*. Erste Lieferung. Caspar Widtmann, Prague. Reprint: Wissenschaftliche Buchgesellschaft, Darmstadt 1974
- Bolzano B (1969) *Wissenschaftslehre*. Versuch einer ausführlichen und größtenteils neuen Darstellung der Logik mit steter Rücksicht auf deren bisherige Bearbeiter, Bd 1–4, Seidel, Sulzbach 1837. In: Berg J et al (ed), *Bernard Bolzano-Gesamtausgabe [BGA]*, Frommann (Holzboog), Stuttgart-Bad Cannstatt 1969 ff, series 1, vols 11–14 Translation of selected parts: George R (ed, trans.) (1972) *Theory of science*. Oxford and Berkelay/Los Angeles
- Bolzano B (1975) *Paradoxien des Unendlichen* (post., Leipzig 1851), Meiner, Hamburg. English translation: Russ S (2004) *The mathematical works of Bernard Bolzano*. Oxford University Press, Oxford
- Bolzano B, *Reine Zahlenlehre*, in: BGA 2A, 8
- Bolzano B, *Lehrbuch der Religionswissenschaft*, ein Abdruck der Vorlesungshefte eines ehemaliger Religionslehrers an einer katholischen Universitaet, von einigen seiner Schuler gesammelt und herausgegeben, Sulzbach, 1834. Drei Theile in 4 Bände [Kritische neu Ausgabe in: BGA(1 6-8)]
- Boole G (1847) *The mathematical analysis of logic*. Macmillan, Cambridge
- Boole G (1854) *An investigation of the laws of thought*. Macmillan, Cambridge
- Brentano F, *Psychologie vom empirischen Standpunkt*. Duncker & Humblot, Leipzig 1874. Second edition (ed: Kraus O), Meiner, Leipzig 1924
- Cantor G, *Über unendliche lineare Punktmannigfaltigkeiten*, 1–6, *Mathematische Annalen* 15 (1879), 1–7; 17 (1880), 355–358; 20 (1882), 113–121; 21 (1883), 51–58 and 545–586; 23 (1884), 453–488
- Cantor G (1883) *Grundlagen einer allgemeinen Mannigfaltigkeitslehre*. Teubner, Leipzig
- Cantor G, *Mitteilungen zur Lehre vom Transfiniten*, *Zeitschrift für Philosophie und philosophische Kritik*, 91 (1887), 81–125; 92 (1888), 240–265
- Cantor G (1991) *Briefe* (eds: Meschkowski H, Nilson W). Springer, Berlin
- Cantor G, *Beiträge zur Begründung der transfiniten Mengenlehre* I, II, *Mathematische Annalen* 46 (1895), 481–512; *Mathematische Annalen* 49 (1897), 207–246. English translation: Cantor G (1955) *Contributions to the founding of the theory of transfinite numbers* (ed. & trans: Jourdain Ph E). Dover, New York
- Cantor G (1932) *Gesammelte Abhandlungen mathematischen und philosophischen Inhalts* (ed: Zermelo E). Springer, Berlin
- Dedekind R (1872) *Stetigkeit und irrationale Zahlen*. Vieweg, Braunschweig (reprint: Vieweg & Sohn, Braunschweig 1969)
- Dedekind R (1888) *Was sind und was sollen die Zahlen*. Vieweg, Braunschweig 1888 (reprint: Vieweg & Sohn, Braunschweig 1969). English translation: Dedekind R (1963) *Essays on the theory of numbers* (ed & trans: Beman WW), Dover, New York 1963
- Dedekind R, *Letter to Keferstein* (1890), in: Van Heijenoort, 1997
- Dedekind R (1931) *Gesammelte mathematische Werke* (eds: Fricke R, Noether E, Ore O). Vieweg, Braunschweig
- Frege G (1969) *Nachgelassene Schriften* (eds: Hermes H et al). Meiner, Hamburg
- Frege G (2007) *Begriffsschrift und andere Aufsätze*. Mit E. Husserl und H. Scholz' Anmerkungen (ed: Angelelli I). Olms, Hildesheim

- Frege G (1881) Booles rechnende Logik und die Begriffsschrift. In: Frege 1969, 9–52
- Frege G (1882) Ueber den Zweck der Begriffsschrift. In: Frege 2007, 97–106
- Frege G (1879) Begriffsschrift – Eine der arithmetischen nachgebildete Formelsprache des reinen Denkens. Nebert, Halle a.d.S.
- Frege G (1884) Die Grundlagen der Arithmetik. Eine logisch-mathematische Untersuchung über den Begriff der Zahl. Köbner, Breslau
- Frege G (1885) Ueber formale Theorien der Arithmetik. In: Frege 1990, 103–111
- Frege G (1891) Function und Begriff und Gegenstand. Pohle, Jena
- Frege G (1892) Über Begriff und Gegenstand. Zeitschrift für Philosophie und philosophische Kritik 16:192–205
- Frege G, Grundgesetze der Arithmetik, begriffsschriftlich abgeleitet, Band 1, Pohle, Jena 1893; Band 2, Jena 1903
- Frege G (1899) Ueber die Zahlen des Herren H. Schubert. In: Frege 1990, 240–261
- Frege G (1894) Rezension von: E. G. Husserl, Philosophie der Arithmetik, I. In: Frege 1990, 179–192
- Frege G (1918) Der Gedanke, in: Beiträge zur Philosophie des Deutschen Idealismus I/2
- Frege G (1923) Gedankengefüge. In: Beiträge zur Philosophie des Deutschen Idealismus III/1
- Frege G (1976) Wissenschaftlicher Briefwechsel (eds: Gabriel G et al). Meiner, Hamburg
- Grassmann H (1844) Die Wissenschaft der extensiven Größe oder die Ausdehnungslehre, eine neue mathematische Disciplin dargestellt und durch Anwendung erläutert. I. Teil. Die lineale Ausdehnungslehre ein neuer Zweig der Mathematik dargestellt und durch Anwendungen auf die übrigen Zweige der Mathematik, wie auch auf die Statik, Mechanik, die Lehre von Magnetismus und die Krystallonomie erläutert. Wiegand, Leipzig
- Hankel H (1867) Theorie der complexen Zahlensysteme. Voss, Leipzig
- Hilbert D (1899) Grundlagen der Geometrie. Teubner, Leipzig
- Hilbert D (1900a) Über den Zahlbegriff. Jahresbericht der Deutschen Mathematiker-Vereinigung 8:180–184
- Hilbert D (1900b) Mathematische Probleme. Nachrichten von der Königlichen Gesellschaft der Wissenschaften zu Göttingen 3:253–297. Reprint in: Hilbert D, 1965
- Hilbert D (1905) Über die Grundlagen der Logik und der Arithmetik, in: Verhandlungen des Dritten Internationalen Mathematiker-Kongresses in Heidelberg vom 8. bis 17. August 1904, Teubner, Leipzig, pp 174–185. English translation: van Heijenoort J, 1967, 129–138
- Hilbert D (1918) Axiomatisches Denken. Mathematische Annalen 78:405–415. Reprint in: Hilbert D, 1965
- Hilbert D (1923) Die Logische Grundlagen der Mathematik. Mathematische Annalen 88:151–165
- Hilbert D (1926) Über das Unendliche. Mathematische Annalen 95:161–190
- Hilbert D (1935) Gesammelte Abhandlungen. Dritter Band: Analysis, Grundlagen der Mathematik, Physik, Verschiedenes. Springer, Berlin (Reprint: AMS Chelsea Publishing, New York 1965)
- Kerry B, Über Anschauung und ihre psychische Verarbeitung (I–VIII), Vierteljahrsschrift für wissenschaftliche Philosophie, IX (1885) – XVI (1891)
- Kraus O (1919) Franz Brentano. Zur Kenntnis seines Lebens und seiner Lehre, Beck, München (includes: E. Husserl, Erinnerungen an Franz Brentano)
- Leibniz GW (1684) Meditationes de cognitione, veritate et ideis. In: Akademieausgabe, VI.4A, N. 141, Akademie-Verlag, Berlin 1999

collective vii, 9, 11n
 composition of, 67
 elementary, 71
 form of, 64, 65, 67, 159
 instantiation of, 67
 kind of (*Verknüpfungsart*) 65–67
 material/formal mode, 65, 66
 material/formal type, 65, 66
 members of, 63
 reducibility/irreducibility, 71
 simple/complex, 66
 sphere (*Bereich*) of, 67
 compatibility (*Verträglichkeit*) 117–119, 127
 completeness, viii, 29, 129, 171, 177, 179, 210
 essential, 171
 improper (*unechte*) 170
 Hilbert's axiom of xvii, 170, 177, 179, 211, 212
 semantic, 168n, 179, 180, 196, 200, 211
 syntactic, 167–169, 171n, 176, 177, 182, 193, 199, 200, 211
 computistics (*Rechenkunst*) 29, 43, 49
 concept
 analysis, 3n, 6, 7, 29, 30, 33
 content of → content
 extension of → extension
 genesis of → genesis
 conditional, 123, 132, 133, 135, 141, 143–145, 147
 consecutivity (*Abfolge*) xiii, 104, 105, 123–127, 146
 conservativity, conservative 164n, 165, 167, 170, 175, 178, 179, 181–184
 consistency, 153, 154, 156, 157, 165–169, 175, 178–180, 182
 content
 of a concept (*Inhalt*); conceptual c. 6, 7, 9, 10, 12, 16, 19, 24, 27, 41, 42, 45, 152
 of a proposition; propositional c. 105, 123, 125, 133, 134, 142
 dependent → dependent
 conjunction, 72, 112, 132, 133, 135–137, 144
 contradiction, 89, 141, 154, 162, 164–166, 170, 178, 180–182, 204
 logic of non-c. 111–114, 116, 117

 principle of (non-)c. 73, 74, 136
 countersense (see also: contradiction) 116, 117, 159

D

decidability, decidable, viii, 48, 171–173
 deduction, 49, 71, 74, 77–79, 104–106, 164, 166, 170, 175, 193
 natural, 147
 definiteness (→ also: axiom-system; manifold) xvii, 151, 167–171, 173, 175–178, 180, 182, 183, 192–194, 199, 203, 210–212
 definition, 102, 103, 113, 126
 formal, 49, 94
 dependent
 content, 115
 meaning, 114
 science, 101
 derivability (*Ableitbarkeit*) xiii, 104–106, 118–125, 146, 147, 156, 167, 195, 196
 enthymematic, xiii, 120, 121
 exact, 121–123
 formal (logical) 120
 disjunction, 72, 73, 112, 133, 135, 136, 140
 division (operation of) 47, 48, 43, 55

E

equality
 extensional, 71, 84, 85
 general concept of (*Gleichheit*) 13, 14, 23, 49, 69
 Kleene- 55
 numerical → one-to-one correspondence vs identity, 14
 equinumerosity, vi, 13–16, 18, 19, 21, 24
 equivalence
 between sets, 88
 class, 18, 19, 21, 190, 197
 congruence, 190
 elementary, 197
 relation, 18, 20, 23, 71, 190, 195
 second-order (monadic) 194, 197
 theory of, 16–21, 24, 82
 -types, 197, 198
 equivalences, 62, 66, 67, 69, 70
 between concepts, 68, 69
 between judgements, 69

between sign complexes, 28, 41
 immediate, 74, 80
 evidence, 100, 108
 self, 102
 expansion (\rightarrow also: extension)
 of a domain (field, structure) 156, 161,
 162, 164, 175, 183, 184, 200–203,
 209, 210
 of a theory, 156, 165, 167, 170, 175,
 181, 182, 208
 — conservative \rightarrow conservativity
 of the concept of number, 27, 161, 162
 symbolic, 34, 37
 exponentiation (operation of) 38–41, 49, 53
 extension
 conservative \rightarrow conservativity
 of a concept (*Umfang*) vi, 7, 10, 13,
 16, 19, 21n, 23–26, 34, 83, 84,
 96, 115, 195
 of a structure, 183–185
 of a theory, 177, 178, 209, 210

F
 formal
 algorithmic method, 44, 48, 75, 155, 205
 language \rightarrow language, formal
 laws (rules) 27, 41, 42, 44, 49, 76–79,
 112, 158, 163, 164, 167, 189
 logic \rightarrow logic, formal
 manifold \rightarrow manifold, formal
 mathematics, formal sciences, xi, xii,
 xvi, xvii, 1, 2n, 72, 74, 102,
 153–155, 157, 159
 theory (system) \rightarrow theory, formal
 formalization, xv, 2n, 49, 67, 155–157,
 164, 165
 function
 Ackermann's f. 50
 addition of, 57
 β -function, 60n
 composition (substitution) of, 56
 computable, 47, 48, 50, 54–56, 60, 98, 212
 definition by primitive recursion, 50, 56
 definition by unbounded minimization, 56
 inverse (see: inversion; operation,
 inverse)
 pairing f. 57, 58
 partial numerical f. 47n, 55

 partial μ -recursive, 56
 primitive recursive, 58
 restricted composition of, 57
 total recursive, 58

G
 game, 41, 75, 79, 80
 of chess, 79
 genesis, 6–8
 geometry xv, 100, 101, 157, 158, 162,
 180, 191–194, 205
 ground-consequence \rightarrow consecutivity

H
 Hume's principle, 24, 94

I
 identity, 10, 14, 172
 element, 189
 law, 140
 of indiscernibles, 12
 imaginary, xvi, xvii, 2, 3, 36, 151, 154,
 157–167, 170, 178, 181, 182, 212
 implication
 material (\rightarrow conditional)
 relation (inferability) 112, 128n,
 133, 140
 incompleteness
 Gödel's theorem, 110, 194, 198, 199
 of second-order logic, 195
Inbegriff, 6, 83, 84, 101n, 119
 incompatibility \rightarrow compatibility
 inconsistency \rightarrow consistency
 independent
 axiom, axioms, theory, 129, 155,
 169, 187, 206, 208
 meaning, 114, 115, 121
 premises, 122
 science, 101
 inference, XIII, 68–70, 73, 74, 100, 101,
 103, 105–108, 112, 120–122, 130,
 131, 146, 147
 conceptual, 128, 129, 135, 141,
 143, 145
 immediate, 68, 74
 propositional, 112, 128–131, 133–135,
 143–145
 inversion, 51, 53–55, 57–61, 63

L

language, 3n, 20, 26, 76, 116, 140, 141, 143
 first-order, 63, 167, 173, 184, 185, 196, 208, 210
 formal, xiii, 113, 116, 120, 143, 156, 168
 of a theory, 165–169, 176, 208, 210
 second-order, 143, 195, 196, 199, 200
 law, 109, 110, 117
 formal → formal
 Frege's basic Law V, 94
 logical → inference; → logic
 logarithm (operation of) 51, 53
 logic, xii–xv, 21, 27, 29, 42, 44, 63, 76, 83, 84, 97, 99–101, 110–116, 135, 145, 146, 156, 168n, 178, 211, 212
 algebra of l. → algebra
 first-order, 167, 168, 196, 200
 formal, xi, xiii, 76, 77, 110, 111, 116, 193
 of consequence, xiii, 112, 116
 second-order, 24, 143, 194–197
 traditional, 68, 73, 74, 108n, 132

M

manifold, xvi, 52, 83, 99, 109n, 111, 113, 113n, 114, 152, 157, 183, 184, 193–195, 198–200, 203, 207, 209, 211, 212
 algebraic, 186
 arithmetizability of, 150
 definite, 150, 152, 164, 167n, 177, 183, 185, 186, 188, 189, 192, 194, 211
 — absolutely definite, 174
 — completely definite, 208
 — Husserl-definite, 198–203
 expansion of, 183, 184
 Euclidean, 157
 formal, 198, 199
 formally defined, 156, 164, 208
 generalization of, 114, 200–203
 inductively generated, 173, 188
 mathematical (constructible) 150, 167n, 185–188
 specification of (→ also: specialization) 114
Menge, 6, 84, 88
 morphology, xiii, 111–118

multiplication (operation of) 39–41, 47, 48, 50, 53, 55, 98
 multiplicity → set

N

negation, 63, 112n, 133, 136
 normal form
 numerical construct in, 40, 46, 47, 52, 211
 proof in, 105
 number, 1–3, 5, 28, 62, 64, 75, 112, 157, 160–163, 165, 166, 172, 174, 175, 184, 189
 cardinal (*Anzahl*) 2, 6–8, 10–26, 29, 30, 81, 82, 87–92, 97, 109, 158, 159, 162, 211
 imaginary → imaginary
 infinite, 22, 91, 92
 natural (finite cardinal n.) 3, 5, 8, 12, 13, 17, 19–27, 34, 35–39, 77, 82, 87, 91–96, 99, 109, 110, 158, 160, 162, 164, 173
 qualified (*benannte*) 87
 quasi-n. 2
 system, 2, 3, 19n, 27, 30, 31, 36–40, 45, 46, 48, 54, 110, 191, 192, 205

O

one
 (numerical concept: *Eins*) 25–27, 38, 87, 93
 vs many, 6, 10–12, 20, 30, 88, 93
 one-to-one correspondence, 13, 15–17, 19, 21, 23, 24, 31n, 82, 91, 92, 94
 operation, operations, 2, 28, 30, 37, 38, 55, 61–71, 112n, 162–166, 170, 172, 174–176, 185–190, 209–212
 arithmetical, xiii, xvi, 27–30, 39–41, 44–48, 50–52, 54, 55, 63, 98, 129, 160, 163n, 211, 212
 — elementary, 47, 51, 52, 57, 60, 77, 109, 160
 — higher, 47, 49, 51, 109
 Boolean, 191
 composition (mixing) of, 49, 52, 53, 55
 conceptual (on concepts) 29–31, 42–44, 47
 field of, 207

- forms (general, specific) of, 16, 161, 163, 212
 - inverse, 2, 51, 53, 162
 - iteration, 50
 - laws (properties, rules) of, 27, 28, 37, 41, 42, 52, 129, 175, 189, 208, 210
 - on sets, 84–86
 - on structures, 193
 - partial, 48
 - succession of, 51
 - system of, 150, 163, 172, 186–191, 203
 - with signs, 42, 43
- P**
- Peano's axioms, 94n, 96, 177
 - permanence, 162–167
 - predication, 24, 128, 141, 143, 144
 - presentation, 5, 6n, 10n, 14, 20, 22, 30–34, 39, 40, 49, 120
 - general, 32
 - proper (authentic) 7n, 16, 30–32, 34, 82
 - improper (symbolic) 3, 7n, 16, 30–34, 82, 83
 - principle
 - Grundgesetze* (basic p., basic laws) 77, 79, 107, 129–131
 - of construction, 34, 36–38, 109
 - of contradiction → contradiction
 - of permanence → permanence
 - ordering p. 18, 33
 - psychologism, v, vii, xii, 1, 101
 - psychology, 22, 33, 101
- Q**
- quantifiers, 133–135
- R**
- reduction to normal form (→ normal form)
 - relative product (operation of) 95
 - representation → presentation
 - restriction, 2n, 41, 156, 158, 164, 165, 167
 - of a domain (structure) 185, 200
 - root extraction (operation of) 51, 53
 - rules of a game → game
- S**
- sensuous
 - sets, 33
 - method of derivation, 43, 44
 - set (*Menge*) xii, 1, 6–12, 15, 16, 18–22, 25–27, 29–31, 33–36, 47, 81–86, 88, 89n, 91, 112, 113n, 195
 - infinite, 16, 33, 34, 91
 - sign, 19n, 25, 27–29, 32, 37–46, 75, 78–80, 129, 212
 - system, 44, 75, 129
 - specialization, 30, 144, 157, 183, 207
 - subtraction (operation of) 47, 48, 43, 55
 - subordination, 130, 141, 143, 144
 - substitutivity
 - salva congruitate, 115
 - salva veritate, 13, 14
 - subsumption, 25, 141, 143
 - successor (operation) 36, 38, 50, 91, 94
- T**
- theorem, 21n, 24n, 78, 101, 102, 108, 130, 137, 155, 156, 192
 - Dedekind's categoricity t. 199
 - fundamental t. of finite arithmetic, 82
 - Gödel's incompleteness t. 194, 198, 199
 - Normalization (cut-elimination) 147
 - of Cantor-Schröder-Bernstein, 90
 - of Frege, 94n
 - of semantic completeness, 179, 196, 200
 - Theorienlehre* → theory of theories
 - theory, 102–104, 107, 111, 113, 131, 147, 155, 156, 180
 - algebraic → algebra
 - formal (→ also: axiom-system) xiii, xvi, 64, 67–69, 81, 102, 113, 114, 151, 155–158, 163, 173, 176, 180, 193, 194
 - of conceptual inferences → inference
 - of equivalence → equivalence
 - of manifolds → manifolds
 - of operations → operation
 - of permanence → permanence
 - of propositional inferences → inference
 - of science xiv, 100
 - of semantic categories, 146
 - of theories xiii, 113, 114, 151, 154, 157
 - RCF of real closed fields, 172, 173
 - set-theory, 1, 22, 31n, 81, 89, 112, 156, 168n, 195

U

undecidability → decidable

unity (Einheit) 3, 7, 25, 26, 28n, 29,

36, 86, 87, 112

qualified (*benannte*) 87

Urteilsstrich, 133

V

variation, 115, 118, 145

Z

zero, 25–27, 94, 95
