

Index

A

Action, 160, 205
Action operator, 28
Advanced Green function, 35
Anderson model, 15, 45
Annihilation operator, 2, 3
Anomalous Green function, 145
Anti-bonding state, 190

B

Bare locator, 67
Berry phase, 208
Bogoliubov-Valatin transformation, 136
Bonding state, 190
Born-Oppenheimer, 210
Born-Oppenheimer approximation, 135, 137, 146
Bose-like transition, 8
Bosonic mode, 107
Boundary conditions, 29

C

Canonical transformation, 109, 110
Charge transport, 41
Chemical potential, 13
Closure relation, 3, 8
Conjugate indices, 24
Contour ordering, 28
Cooper pair shuttle, 133
Coulomb interaction, 2
Creation operator, 2
Current, 42

D

Density of occupied states, 42, 47
Density of states, 47
Density of unoccupied states, 42
Diagram technique, 55
Disturbance potential, 28
Dressed locator, 67
Dyson equation, 52
Dyson-like, 33

E

Eigenenergies, 2
Eigenstates, 2
Electron energy, 13
Electron spin resonance, 108, 115
End-factor, 25, 67
Equation of motion, 14, 15, 25, 55, 209
Exchange interaction, 2

F

Fano resonance, 187
Fano-Anderson model, 58
Fermi operator, 3
Fermi-like transition, 8
Feynman's theorem, 111
Fock states, 4
Fourier transform, 26
Free electron-like, 13
Functional derivative, 66, 161, 209
Functional differentiation, 208
Functional differentiation operator, 32, 68

G

Greater Green function, 33
Green function, 23

H

Hamiltonian, 3
 Hubbard I approximation, 67, 78, 92
 Hubbard operator Green functions, 24
 Hubbard operators, 8
 Hubbard-Stratonovich transformation, 208

I

Imaginary time, 28
 Interference, 119
 Inverse locator, 32

J

Josephson current, 133, 137
 Josephson frequency, 135
 Josephson junction, 133

K

Keldysh contour, 205
 Kinematic interactions, 161
 Kinematic shift, 69

L

Landau-Lifshitz-Gilbert, 210
 Langevin equation, 203
 Langevin term, 210
 Larmor frequency, 210, 213, 217
 Leakage current, 174
 Lesser Green function, 33
 Localized levels, 2
 Locator, 32

M

Many-body description, 7
 Many-body eigenstates, 2
 Many-body operator, 3
 Many-body representation, 3
 Markovian approximation, 16
 Mean field theory, 53, 60, 67
 Molecular quantum dot, 107
 Multi-indices, 24

N

Nanomechanical oscillator, 133
 Negative differential conductance, 167
 Nutation, 215

O

Occupation number formalism, 13
 Occupation numbers, 14
 One-electron states, 5, 158, 190
 One-loop-approximation, 68, 70, 71, 77, 91, 92, 156
 Outer products, 3

P

Pauli spin blockade, 17, 18, 171
 Population number, 93
 Propagator, 24

Q

Quasi-particle, 136

R

Retarded Green function, 35
 Rotating reference frame, 116

S

Scanning tunneling microscopy, 107, 187
 Self-consistent Hartree-Fock approximation, 27
 Self-energy operator, 32, 67
 Single electron transition, 3
 Single-level system, 15, 91
 Singlet state, 7, 173, 190
 Singlet-triplet splitting, 190, 196
 Source fields, 30, 65, 161
 Spin current, 117, 122
 Spin operator, 2
 Spin-spin interactions, 4, 171
 Stationary conditions, 16

T

T -matrix, 50, 51
 Three electron states, 6
 Three-operator Green function, 31
 Torque, 214
 Transfer Green function, 43
 Transition energy, 16, 26, 162
 Transition matrix elements, 3
 Triplet states, 6, 172, 190
 Tunneling interaction, 2

Two electron states, 6
Two level system, 4
Two-electron Green function, 59

V

Vibrational mode, 107, 133
Vibron, 107, 134

W

Wess-Zuminov-Witten-Novikov, 208

X

X-operator commutator relations, 8
X-operator multiplication, 8
X-operators, 8
