

Subject Index

A

Aggregation, 83–84, 95, 140
Amplitude contrast, 102
Antibiotic marker, 58
Artificial denaturation, 77
Assay, 138–139, 141, 145
Ataxin, 87, 94

B

Bacteriorhodopsin (BR), 35
 molecular structure, 37
 proton pump function, 36
Biocompatibility, 137
Biogenesis, 64
Biological membrane, 41
 protein, 41
Biomarkers, 119
Biozon plasma, 128

C

Cancer, 154, 167
 biliary, 122
 colon, 121
 thyroid, 122
Cell-free expression, 55
Cell-oxygen level, 126
Chaperon, 44–45, 96, 106
Chloroplast transformation technology, 55
Classifier, 123
Codon, 47, 63
Cold denaturation, 79–80
 effect of alcohol, 81
 melting temperature, 79
 method, 78
 stability curve, 79–81
Cross-correlation function, 16, 25
Cross-correlation spectroscopy, 16
Crossvalidation methods, 118–119
Cryotechnique, 105

Cytoskeletal filaments, 106
Cytotoxicity, 136, 138–139, 141, 145

D

Data set, 120
 training, 122
 validation, 122
Denaturation state, 77
Diathermy, 128, 130
Diffraction space, 102
DNA, 95, 109

E

Electron dose, 111
Electrostatic shielding, 109
Electrostimulation, 135, 165
Eukaryotic expression system, 51–52, 55
 insect cells, 55
 mammalian cells, 54–55
 yeast, 52–53

F

Fisher's linear discriminant (FLD), 119
Fluorescence, 4, 58
 autocorrelation function (ACF), 4–5
 correlation analysis, 2–3
 correlation spectroscopy (FCS), 2, 7–9
 decay time, 7
 enhancement in, 12
 geometrical factor, 7, 9
 intensity, 6
 microscopy, 109
 quantum yield, 2
Fluorophore, 4
 quenching of, 12
Förster Resonance Energy Transfer (FRET), 17, 19

- Frataxin, 78
 cyaY, 78
 hfra, 78
 ortholog, 77–78
 yfh I, 77–79
- FT-IR spectrometer, 32
- FT-IR spectroscopy, 31, 33
 acquisition time, 34
 step scan device, 34
 step scan parameters, 35
 step scan technique, 35
 step scan timing, 35
- Fusion tag, 63
- G**
- Genetic algorithm, 121
- Gen expression, 49, 54, 93
- Glycosylation, 46, 55
- H**
- High-frequency bio-oxidative therapy (HF-BOT), 126
- Hydrophobic surfaces, 84
- L**
- Lipid per-Oxidation Products (LOP), 128
- M**
- Microphotographs, 142
- Microscope
 fluorescence confocal, 4
- Mutagenesis, 58, 63
- N**
- Nanofilament, 144, 146
 inorganic, 134–135
- Nanomaterial, 133–134, 140
- Nanomedicine, 133
- Nanoparticles, 137–138
- Nanotubes, 137
 boron-nitride, 133, 135
 carbon, 134, 136–137, 140
- Neurodegeneration, 96
- Nuclear Magnetic Resonance (NMR), 78–79, 82, 116
- O**
- Oxidative stress, 136
- Oxidative treatment, 126
- Oxygen-hemoglobin dissociation curve, 129
- Ozone therapy, 130
- P**
- PCA (principal component analysis), 119, 121
- Phase contrast, 101
- Phase contrast transfer function (CTF), 102–103
- Phase plate, 101–103
- Phosphorylation, 94
- Photoelectrolyzer, 135
- Photostimulation, 130
- Photovoltaic cell, 135
- Plasmid, 52
- Platelet-derived growth factor (PDGF), 129
- Polymorphic polyglutamine (polyQ), 90, 92, 94, 96
- Prokaryotic expression system, 46, 51
- Protein, 33, 46
 clearance, 91
 complexes, 92
 expression, 46, 49, 51–54
 homologues, 59
 membrane, 44–46
 misfolding, 95
 receptor, 51
 structure determination, 31–32
 transcript, 60
 transporter, 46
- Protein-protein interaction, 94–95
- Proteolytic activity, 48
- Proteomic analysis, 61
- Pulsed Interleaved Excitation (PIE), 16, 21, 24
- Purkinje cells, 95–96
- R**
- Raster Image Correlation Spectroscopy (RISC), 26
 raster-scanned image, 26–27
- Reactive oxygen species (ROS), 127, 129–130
- Ribosome Nascent Chain (RNC), 43–44
- S**
- Sample preparation, 101
- Scanning FCS, 21
 line-scanning, 23
 scattering contrast, 102
 spatial information, 23
- Secretory pathway, 42
- Signal Recognition Particle (SRP), 43, 45
- SIMCA (soft independent modelling class analogies), 119–120
- Single particle analysis, 109
- Singlet excited state, 3

Sonication, [144](#)
Spectra, [4](#), [120](#), [123](#)
 emission, [4](#)
 excitation, [4](#)
Sterilization, [138](#)

T

TEM, [130](#)
 defocus phase contrast(DPC-TEM),
 [102–103](#)
 electron energy loss (EELS), [144](#)
 energy dispersion X-ray (EDX)
 spectroscopy, [144](#)

 hilbert differential contrast (HDC-TEM),
 [104–105](#), [109](#)
 zernike phase contrast(ZPC-TEM),
 [101](#), [103](#)

Tesla ozone generator, [126](#)

Thermostability, [59](#)

Time-resolved FT-IR, [31](#)

Triplet state, [4](#), [7](#)

Two-focus FCS, [23–24](#)
 confocal pinhole, [25](#)

U

Ubiquitination, [96](#)

Unfolding, [84](#)
