# Index

## A

A-weighting, 208  
Absolutely integrable, 29  
Absorption coefficient, 44, 47  
Acoustic acceleration, 152  
Acoustic energy density, 39  
Acoustic holography, 155  
Acoustic kinetic energy density, 39  
Acoustic potential energy density, 39  
Acoustic pressure, 36  
Acoustic velocity, 36  
Active intensity, 40  
Active sound field, 45  
Actuators, 18  
Adaptive feed-forward control, 76  
Additive filtered error, 138  
Adjoint LMS algorithm, 135  
Airborne noise, 6  
Airborne path, 6  
Amplitude, 26  
Anti-noise, 3  
Arithmetic mean of continuous signals, 27  
Arithmetic mean of discrete signals, 30  
Assurance of properties, 179  
Auto correlation matrix, 168  
Auto correlation of continuous signals, 28  
Auto correlation of discrete signals, 30  
Auto spectral density of continuous signals, 29  
Auto spectral density of discrete signals, 31  
Auxiliary coefficient, 137

## B

Basic system, 18  
Beamforming, 155  
Blade passage frequency, 8  
Boundary, 156  
Boundary conditions, 37

Boundary element method, 149  
Bulk modulus, 37

## C

Canceling signal, 3, 76  
Causal controller, 76  
Change in density, 36  
Change in temperature, 36  
Coherence analysis, 164  
Coherence function, 166  
Complex acoustic pressure, 38  
Complex acoustic velocity, 39  
Complex compliance matrix, 159  
Complex quadratic form, 73  
Complex wave number, 46, 48, 86, 154  
Condenser type microphone, 50  
Conjugate gradient, 161  
Conjugated gradient least square, 161  
Continuity equation, 36  
Continuous-time signal, 26  
Control phase, 112  
Control profit, 4  
Control signal, 76  
Controller, 76  
Correlation analysis, 168  
Cost function, 106  
Cost function parameters, 73  
Cross correlation matrix, 168  
Cross correlation of continuous signals, 28  
Cross correlation of discrete signals, 30  
Cross spectral density—continuous signals, 29  
Cross spectral density—discrete signals, 31

## D

D'Alembert's principle, 10  
Decay coefficient, 42  
Design step, 181
