

Index

A

- Ackermann, R., 291
Adequacy, *see* Empirical, adequacy
Aim of science, 77, 289, 291, 302, 311
Albert, R., 346–348
Allamel-Raffin, C., 7, 15, 41, 93, 169, 243
Allen, G. E., 74
Amalgamation, 12–13, 45–46, 220–224
– of evidence, 220–222
– function, 13, 22, 46, 220–222
– problem, 12, 45
Argumentation, 15, 41, 169–170, 172–173, 176, 178–179, 186
Argumentative line, 14, 46–48, 227–235, 243–244, 251–253, 255, 257–259
Argumentative module, 11, 234, 236, 245, 258
Aristotle, 61, 305
Artifact(s) (or artefact(s)), 5, 29, 56, 63, 67, 69, 71–72, 76–77, 92, 105, 111–113, 117, 119, 138, 171, 174, 195, 210, 212, 218, 232, 242, 293–294, 308, 329–357
Aspect, A., 151–152, 157–159, 161–162, 164
Auxiliary assumptions, *see* Background assumption(s)
Avery, O., 207–208
Axiom or axiomatic or axiomatization system, 63, 189–191, 193–195, 198, 301

B

- Babylonian (– structure, – approach), 42–43, 64–65, 67, 189–204, 338–339
See also Euclidean structure
Bachelard, G., 250

- Background assumption(s) and knowledge, 8, 28–30, 45, 73, 123, 127, 131, 133–134, 138–140, 142, 144, 209–210, 212–214, 217–221
Background theory, 30, 113, 125, 130–132, 138–139, 217
Bacon, F., 158, 338
Baconian, 353
Bacteria, 30, 37–38, 107, 109–110, 113–115, 119, 122–124, 129, 131–132, 137, 139, 141
Bacterial endocytosis, 36, 106
Bailer-Jones, D. M., 302, 305
Bak, P., 343–345, 349, 352–353
Barabási, A. -L., 343, 345–346, 348–350, 353
Barlow, R. E., 65
Barnes, B., 317
Barthes, R., 178–179
Bayesian or Bayesianism, 9, 80, 222–224
Bell, J. S., 40, 148, 151, 158–160, 162, 164
Bell's inequalities, 18, 39–40, 147–166
Bénabou, J., 201–204
Beurton, P., 96
Blondlot, P. -R., 8
Bogen, J., 305
Bohm, D., 150
Bohr, N., 39
Bonventre, P. F., 132
Boon, M., 3–4, 11, 15, 24, 26, 35, 51–54, 289
Bootstrapping, 68, 70
Bossert, W., 89
Boue, A., 98
Boue, J., 98
Bourbaki, N., 43–44, 195–204
Box, G., 209
Boyd, R., 80
Brewer, M., 61
Bridgman, P. W., 338

- Bubble chamber, 46–47, 54, 230, 233, 235, 237, 318–319, 323
- Buchanan, M., 346
- Buchwald, J., 250
- Burian, R. M., 95
- C**
- Calcott, B., 93, 284
- Calibrating re-description, 11, 48, 228, 251, 255, 261–262, 264
- Calvin, W., 341
- Campbell, D. T., 2, 35, 49, 62–63, 69–70, 72–77, 79–80, 82, 84–85, 92, 94, 96, 267
- Cardinal, large, 191, 200
- Cardinal, strongly inaccessible, 200–201
- Carlson-Doyle, 349
- Carlson, J. M., 57, 339–340, 344
- Carnap, R., 214
- Cartesian (– mathematics, – perspective, – vision), 67, 80, 336
- Cartwright, N., 208, 210, 220, 224, 290–291, 304
- Case-control study(ies), 214, 216–219, 221
- Category theory, 43–44, 94, 190–191, 199–204
- Ceteris paribus clause, 295, 304, 313, 332
- Chance, 101, 105–106, 229, 231
- Chang, H., 170, 208, 291, 304
- Chaos theory, 344
- Charged current(s), 47, 229–230, 233–234
- Chevalley, C., 196
- Clauser, J. F., 153, 155, 163
- Cohen, P., 194, 201
- Collins, B., 61
- Collins, H., 166, 210
- Collins, H. M., 135, 138–139
- Complexity, 38, 44, 47, 51, 56–57, 79, 81, 92, 98, 100–102, 112, 119, 267–268, 270–271, 275–277, 280, 309, 330–332, 335, 338–341, 343–345, 349–350
- of proteinic objects, 268, 275, 280
 - spiral, 339, 349
 - theorists, 335, 338, 349
 - theory, 57, 332, 349
- Complex systems, 16–17, 22, 26, 56–58, 71, 270–275, 283, 285, 334, 339–346, 352, 355, 357
- Computational, 50–51, 79–81, 268–270, 276, 278–279, 281, 284, 286
- intractability, 276
 - limitations, 268, 269, 286
- Computer, 51, 80, 90, 101, 132, 229, 269, 271, 273, 276, 280–282, 285–286, 325, 339, 347
- simulation, 90, 229
- Conditionalization, 222–224
- Confidence, 43, 127, 135, 162, 191–193, 195, 199, 202–203, 224, 254, 259, 337, 352, 356
- Confirmation, 9, 14, 29, 46–48, 75, 85, 106, 113, 126–128, 136, 138, 148, 155, 192, 208–209, 212, 214, 220–224, 229, 291, 329, 356–357
- Consilience of inductions, 38, 61, 122–123, 126–129, 136, 143–144
- Consistency, 43, 68, 74–75, 79, 102–103, 164, 190–191, 194–196, 198–199, 201, 204, 209, 211, 221, 294
- relative –, 191, 199, 201
 - of set theory, 191, 195–199
- Context of discovery, 356
- Context of justification, 89
- Continental drift, 207–208
- Contingency (or contingent), 19, 33–35, 37, 47–49, 56, 69, 82, 227–228, 249–251, 261–264, 324, 330, 334, 351, 353–354
- Contingentism (or contingentist), 19, 33–35, 47–49, 227–228, 249, 251, 261–262, 264, 334, 351, 353–354
- Contradiction, 67–68, 75, 119, 190, 194–199, 201–202, 204
- Controversy, 8, 13, 37, 46, 83, 106, 110, 212, 220–221, 324–325
- Convergence
- inducer, 33
 - of multiple results under multiple derivations/determination, 5, 10–12, 21, 27, 29, 31–35, 38–39, 41, 50, 76, 93–94, 106, 113–115, 118–119, 126, 129, 144, 155–156, 160, 165–166, 227, 247, 250, 257–259, 261–262
 - of theories, 126
- Convergent risk-reduction thesis, 57, 332
- Cook, T. D., 62, 69, 79
- Corfield, D., 93–94
- Corry, L., 195, 199
- Criteria for causation, 132–134, 140
- Cronbach, L. J., 63
- Culp, S., 92–93, 96, 138, 170–172, 210, 212, 217

Cultured cells, 38, 122–124, 132, 139
 Cumulativity thesis, cumulative fragility-
 reduction thesis, 17, 56–57, 330,
 332, 338

D

Dance of agency, 26, 54–55, 317–326
 Darden, L., 74
 Daston, L., 171

Robustness (*cont.*)

- category theory, 43–44, 94, 190–191, 199–204
 - cell biology, 10, 29, 36, 38, 105–120, 123–126, 129, 131–132
 - community ecology, 35, 90
 - diagnostic reasoning, 134–136
 - empirical sciences, 5, 15, 17, 36, 42–44, 52, 105–120, 147–166, 192–193, 198, 249, 250
 - epidemiology, 132–134
 - health care research, 126
 - protein chemistry, 49, 51, 268–269, 274–276, 280–281, 285–286
 - engineering sciences, 51, 292
 - mathematics, 36, 42–43, 64–65, 80, 94, 189–204
 - particle physics, 28, 221, 227–266, 323, 325
 - physics, 7–8, 41, 65, 147–166, 229, 249, 263, 320, 323, 325–326, 343
 - population genetics, 35, 82, 90–91, 270
 - quantum mechanics, 7–8, 39, 147–166
 - radio-astronomy, 41, 173–186
 - set theory, 43, 190, 191, 194–199
 - in social sciences, 71, 75–76, 92, 94, 125, 343
 - as an epistemological strategy, 210, 284, 290, 297, 317
 - failure(s) in –, 64, 76, 82–83, 166, 216
 - flux(es) of – (or of solidity), 21, 258–259
 - and fragility tradeoff, 17, 57–58, 330–334
 - graphic representations of –, 6–8, 13, 31, 38, 94
 - kinds of –
 - apparent robustness, 165
 - dynamical robustness, 26, 39, 114
 - material/inferential robustness, 17, 35–36, 89, 93, 95–97, 100–101
 - ontological/epistemological robustness, 3, 26, 34, 53–55, 290, 293, 295, 306, 308, 312
 - prospective/retrospective robustness, 58, 221, 235, 329, 334, 355–357
 - prototypical/non-prototypical
 - robustness, 36, 40, 166, 228, 245, 247, 253–255
 - relative robustness, 57–58, 339
 - simple/complex robustness, 17, 329, 339
 - sloppy gappy robustness, 36, 97
 - statistical, 36, 100
 - as a 4-place predicate, 100
 - pseudo –, 35, 83, 95
 - as regulative ideal or methodological
 - attractor, 4–5, 34, 38, 57, 107, 119–120
 - of the results/of the derivations, 15–20, 46, 227–266
 - scheme, 4–9, 11–12, 14–16, 18–23, 27–29, 31, 33, 36–38, 40, 43–46, 48, 50–51, 105, 107, 111–119, 166, 178, 181, 227–228, 230–232, 243, 245, 247–255, 257–264, 269, 284–285
 - kinds of robustness scheme
 - arrows-node scheme(s) of
 - robustness, 6
 - elementary scheme of robustness, 4, 48, 228, 253–260
 - retrospective panoramic scheme
 - of –, 231
 - wimsattian scheme of –, 4, 38, 243, 246
 - and scientific realism, *see* Realism (or scientific –)
