

About the Authors

Christoph Bergmann is a research assistant and Ph.D. student at the Department of Social Anthropology at the South Asia Institute, University of Heidelberg, Germany. His research interests are mountain pastoralism, ethnicity and ritual practice with a regional focus on the Central Himalayas.

Ted Callahan is a social anthropologist specializing in Afghanistan, Central Asia, pastoral nomadism and political anthropology. His Ph.D. thesis, 'To Rule the Roof of the World: Power and Patronage in Afghan Kyrgyz Society', looked at post-Taliban tribal politics in Afghanistan through the lens of political clientelism. He has spent two years conducting research in Afghanistan, including 11 months living with the Kirghiz in the Afghan Pamir.

Andrei Dörre is a research associate at the Centre for Development Studies at the Freie Universität Berlin, Germany, and has dealt with different aspects of change in post-Soviet transformation societies. In connection with his doctorate, he carried out research on changes of pastoral practices in Kyrgyzstan. Other fields are the interrelationship between international intervention, security promotion and development activities in Afghanistan. His research interest focuses on social change and human-environmental interactions in Central and South Asia.

Eckart Ehlers is professor emeritus (geography) and former chairman of the German National Committee on Global Change Research and IHDP. His regional research interest is focused on the Middle East, thematically on rural and urban research, and nature-society interrelationships in the Anthropocene.

Fazlur-Rahman holds a M.Sc. and M.Phil. from the University of Peshawar, Pakistan, and a doctoral degree from the University of Bonn, Germany. He is currently associate professor at the Institute of Geography, Urban and Regional Planning, University of Peshawar. His research interests include mountain geography, development research and resource management, especially in the Hindukush and Karakoram.

Martin Gerwin is research assistant and Ph.D. student at the Department of Geography at the South Asia Institute, University of Heidelberg, Germany. He has specialized in development studies, mountain geography and natural resource use in the Central Himalayas.

Melvyn Goldstein is a member of the US National Academy of Sciences and has conducted extensive research in Tibet over the past 24 years on a diverse range of topics including pastoral nomadism, monasticism, modern Tibetan history, oral history and modernization in rural Tibet. He is author or coauthor of over 100 articles and books on Tibet.

Andreas Gruschke is a researcher at the Special Collaborative Research Centre 'Difference and Integration', Institute of Oriental Studies, University of Leipzig, Germany. His main research interest focuses on transformation processes, development geography of the Tibetan Plateau, cultural history of East and Central Asia.

Arnd Holdschlag studied geography, geology, economics and urban planning at the Universities of Bochum and Bonn, Germany. He holds a doctoral degree in geography from the University of Bonn and is currently assistant professor at the Institute of Geography, University of Hamburg, Germany. His research interests include human-environment interactions, development studies, agricultural geography, mountain geography, island studies, complexity theory, South and Southeast Asia and the Caribbean.

Toni Huber is a professor for the anthropology and cultural history of Tibet and Himalayan areas at the Humboldt University, Berlin. His long-term research interests are environment and society, popular ritual and pastoralism on the Tibetan Plateau and highland societies of the far eastern Himalaya.

Muhammad Ismail has more than ten years of working experiences with different international organizations in rural development and natural resources management. His academic interest is in community-based natural resources management and culturally selective technology adoption in climate change adaptation in the pastoral communities. He is a project coordinator in the Rangeland Resources Management Department of the International Centre for Integrated Mountain Development (ICIMOD).

Tobias Kraudzun is a research associate in the Centre for Development Studies, Institute for Geographical Sciences at Freie Universität Berlin, Germany. He has been conducting livelihood-related fieldwork with pastoralists in the Tajik Pamirs since 2003. Development research focusing on livelihoods, human-environment interactions and exchange processes in Central Asian borderlands are his research interests.

Hermann Kreutzmann is chair of human geography at the Institute of Geographic Sciences and Director of the Centre for Development Studies at Freie Universität Berlin, Germany. His research focuses on issues such as migration, conflict, development, water utilization, pastoralism and political geography in Central and South Asian contexts.

Wu Ning is the director general and a professor at the Chengdu Institute of Biology, Chinese Academy of Sciences. He received his Ph.D. from Free University Berlin, Germany, in 1995, and finished his postdoctoral research funded by Alexander von Humboldt Fellowship from 1999 to 2001. His research interests are mainly on the ecology and geography of alpine vegetation and pastoral development on the Tibetan Plateau.

Marcus Nüsser studied geography, geology and development sociology at the Freie Universität Berlin, Germany, leading to a Doctoral degree in the Natural Sciences in 1996. Currently he is a Professor of Geography at the South Asia Institute (SAI), University of Heidelberg (since 2006). His research focuses on issues of human-environment interaction, environmental dynamics and development processes in mountain regions of South Asia and sub-Saharan Africa.

Jarmila Ptackova is a Ph.D. candidate at the Central Asian Seminar of the Institute of Asian and African Studies, Humboldt University, Berlin. Her research concentrates on the influence of the current development policy of the Chinese government on the livelihoods of Tibetan pastoralists in China.

William S. Sax is professor and head of the department of social anthropology at the South Asia Institute, University of Heidelberg, Germany. He has been conducting research in Uttarakhand (India) since 1977 and focuses on issues such as religious practice, local social structure and politics, territoriality, forms of theatre and performance as well as ritual healing.

Stefan Schütte is an assistant professor at the Centre for Development Studies, Geographic Sciences at Freie Universität Berlin, Germany. He has extensive research experience in Afghanistan, India and Pakistan and worked on issues of rural and urban development with a special focus on human security and livelihoods.

Yi Shaoliang has over 20 years of work/research experiences in alpine ecology, nature conservation and mountain pastoralism. He worked for many years in the International Centre for Integrated Mountain Development (ICIMOD) as a project coordinator and team leader in rangeland resources management and in Chengdu Institute of Biology (Chinese Academy of Sciences) as a researcher. His academic interest is in common pool resources management and human-nature interactions in mountain regions. He is currently the manager of the Natural Resources Management (Land & Water) Department of Aga Khan Foundation, Afghanistan.

Chetan Singh is a professor of medieval Indian history at Himachal Pradesh University, Shimla (India). He has several publications on seventeenth-century Punjab as well as on the environmental and socioeconomic history of the Western (Himachal) Himalaya during the colonial period. He is currently working on the historical transformation of popular culture in Himachal.

Bernd Steimann is a research fellow at the Department of Geography, University of Zurich, Switzerland. His research interests include development studies in Central and South Asia, with a particular focus on the governance of natural resources, rural livelihoods and processes of institutional change.

Emilia Róża Sułek received her master degrees in social anthropology and in Tibetan studies from the University of Warsaw, Poland. In 2007–2010, she conducted research on the emergence and social consequences of the caterpillar fungus economy in Tibetan pastoral areas of Qinghai Province, China. She is completing her doctoral dissertation at the Central Asian Seminar of the Institute of Asian and African Studies at Humboldt University, Berlin.

Lu Tao is an associate professor at the Chengdu Institute of Biology, Chinese Academy of Sciences. He received his Ph.D. from the Research Centre for Eco-Environmental Sciences, Chinese Academy of Sciences, in 2007. His major research interests are in landscape ecology and grassland ecology.

Yan Zhaoli is an associate professor at the Chengdu Institute of Biology, Chinese Academy of Sciences. She received her Ph.D. from the Chinese Academy of Sciences in 2003 and henceforth worked as rangelands specialist at the International Centre for Integrated Mountain Development for over six years. Her research interests are mainly in rangeland ecology and management.
