

Biographical Notes

Pieter Bonte studied philosophy at Ghent University and law at the Vrije Universiteit Brussel and works as a doctoral researcher at the Bioethics Institute Ghent, Department of Philosophy and Moral Sciences, Ghent University. His research project starts from a detailed study of intrinsic arguments for and against self-creation and self-enhancement via biotechnology and is aimed at the articulation of an enriched, rational and useable conception of ‘human dignity’. His main interests lay in combining existentialist and evolutionary understandings of human nature and ensuing issues of personal identity, responsibility, human dignity and the art of living. He enjoys binding himself to the rules and rituals of basketball as well as cycling haphazardly through the country.

Barbara Broers, M.D., M.Sc., directs the Unit for Dependency in Primary Care at the Department of Community Health and Primary Care of the University Hospitals of Geneva. She is member of the Swiss Federal Commission for Drug Questions. Her research interests include public health aspects of psychotropic drug use, therapeutic compliance of drug users and harm reduction strategies.

Roger Brownsword is Professor of Law at King’s College London, where he was the founding director of TELOS (a research centre that focuses on technology, ethics, law and society); he is an honorary Professor in Law at the University of Sheffield; and he is a visiting professor at Singapore Management University. His interests span legal theory, regulation and technology, and the common law. His more recent books include (with Deryck Beyleveld) *Human Dignity in Bioethics and Biolaw* (2001) and *Consent in the Law* (2007); *Contract Law: Themes for the Twenty-First Century* (2006); *Rights, Regulation and the Technological Revolution* (2008); and a co-edited collection on *The Foundations of European Private Law* (2011). His latest book (co-authored with Morag Goodwin) is *Law and the Technologies of the Twenty-First Century*. In total, he has published some 200 papers.

Andreas De Block is Assistant Professor of Philosophy at the KU Leuven. He studied philosophy and psychology in Leuven and Ghent, and worked as a post-doctoral researcher at Radboud University Nijmegen and the University of

Michigan. He is the author and editor of several books on psychoanalysis, philosophy of psychiatry, and philosophy of biology. His main research interests are cultural evolution, the philosophical assumptions of the nature-nurture debate, sexual orientation, and philosophy of psychiatry.

Trijsje Marie Franssen recently obtained a Ph.D. in Philosophy from the University of Exeter, Department of Sociology and Philosophy. Her research concentrates on the role of the ancient myth of Prometheus in today's debate on human enhancement and its relationship to normativity and arguments on human nature. She engages with the myth both to analyse the enhancement debate and its (implicit) moral and ontological claims and to reflect upon the particular characteristics that have given this myth its prominence in the history of philosophy in general.

Denis Hauw is Professor of Sport Psychology at the Institute of Sport Sciences of the University of Lausanne. His research focuses on doping and substances uses in elite sports with a situated activity approach. He is the president of the French national call centre *Ecoute Dopage* and also is a sport psychologist consultant for diverse elite teams and athletes. From August 1, 2012 onwards, he will hold the position of Professor of Sport Psychology at the University of Lausanne.

John Hoberman is Professor of Germanic Studies, University of Texas at Austin. He has been active in sports studies and sports journalism over the past 35 years. He has a special interest in human enhancements in general and sports doping in particular. He is the author of *Mortal Engines* (1992) and *Testosterone Dreams* (2005). His current research concerns the use of anabolic steroids by police officers in the United States.

M. Andrew Holowchak teaches philosophy at Rider University in Lawrence, New Jersey. He has published over 60 peer-reviewed papers in areas such as ethics, psychoanalysis, ancient philosophy and science, philosophy of sport, and social and political philosophy and has authored 18 books including *Freud: From Individual to Group Psychology*, *Freud and Utopia*, *Happiness and Greek Ethics*, *Critical Reasoning & Philosophy*, *Ancient Science and Dreams*, *Philosophy of Sport*, *Aretism*, *The Stoics*, as well as two philosophical novels, *Life of a Jellyfish* and *Hotel Bob*. His current research is on philosophical elements in the writings of Thomas Jefferson. When not teaching or writing, he enjoys strength training (former super-heavyweight powerlifting champion), biking, gardening, travel, cooking, brewing beer, and polite conversation. He lives in Lindenwold, New Jersey, with his wife, Angela, and their several cats.

Marianne Raakilde Jespersen is post-doctoral researcher and lecturer at the Department of Sport Science, Public Health, Aarhus University, Denmark and the Department of Global Nutrition and Health at VIA University College, Aarhus. Her research focuses on the use of performance enhancing drugs in and out of sports, medicalization and body culture in general.

Eric T. Juengst directs the UNC Centre for Bioethics which serves as a hub for bioethics teaching, consultation, and research at the University of North Carolina, Chapel Hill. His own research and publications focus on ethical and conceptual issues in human genetics and genomic research, and his current project is a study of the ways that the goals of “personalized genomic medicine” are interpreted by its promoters and providers. He is also a co-founder of the “ELSI 2.0 Collaboratory,” a new international network of scholars interested in the intersections of genomics and society.

Bengt Kayser, M.D., Ph.D., is director of the Institute of Movement Sciences and Sports Medicine at the University of Geneva. His research interests include the relationship between physical activity and health, the effect of hypoxia on physical performance and human enhancement.

Christian Lenk is a Privatdozent (senior lecturer) at the Institute for History, Philosophy & Ethics of Medicine of Ulm University. He studied philosophy, political sciences and social anthropology at the University of Hamburg. He concluded his Ph.D. thesis at the University of Münster in the field of medical ethics in 2002 with a work on *Therapy and Enhancement* and he has undertaken international research stays at the Universities of Swansea/UK (2008/09) and Zurich/CH (2011). Since 2008, he is Privatdozent at the University of Göttingen, and since 2011 acting director of Ulm University’s research ethics committee.

Tara Magdalinski works at the UCD Centre for Sports Studies, School of Public Health, Physiotherapy and Population Science, University College Dublin. She has published widely in the area of sports studies focussing most recently on the cultural construction of performance enhancement. She co-edited (with Timothy Chandler), *With God on their Side: Sport in the Service of Religion* (Routledge, 2002), and published *Sport, Technology and the Body: The Nature of Performance* (Routledge, 2009). Her current projects include an examination of Olympic ephemera such as pins and mascots.

Michael J. McNamee is Professor of Applied Ethics in the College of Human and Health Sciences, Swansea University Wales. He has authored and edited many books including *Sports, Virtues and Vices* (2008), *Sports Ethics* (2010) and *Doping and Anti Doping Policy* (2011). He is Editor of the international journal *Sport, Ethics and Philosophy*, and is a former President of the International Association for the Philosophy of Sport. He still runs (slowly) and plays tennis (when not injured!).

Darian Meacham is Senior Lecturer in Philosophy in the Department of Arts at the University of the West of England, Bristol. An expert in Phenomenology and the Philosophy of the Body, he has particular interests in the phenomenology and politics of human enhancement. He is currently working on a project focusing on the fundamental philosophical issues surrounding cognitive enhancement.

Paul Schotsmans is Professor at the Centre for Biomedical Ethics and Law, Department of Public Health, Faculty of Medicine, KU Leuven University. He is the honorary president of the European Association of Centres of Medical Ethics (EACME) and former board member of the International Association of Bioethics. His research interest is mainly the application of 'personalism' as an ethical model for the ethical integration of reproductive technologies, pre-implantation and prenatal diagnosis, clinical genetics, stem cell research, organ transplantation and end of life decision making. He is the author and co-editor of several books and papers in leading journals in bioethics.

Sigrid Sterckx is Professor of Ethics at the Department of Philosophy & Moral Sciences of Ghent University and a part-time Professor of Ethics at the Department of Philosophy & Moral Sciences of the Vrije Universiteit Brussel. She lectures courses in theoretical ethics, methods in ethics and political philosophy. Her publications include three books, numerous book chapters and articles in legal and (bio) ethics journals on issues including end-of-life decisions and the patentability of human body material. Sigrid is a member of the Belgian Advisory Committee on Bioethics.

Jan Tolleneer is Professor at both the Department of Kinesiology, Faculty of Kinesiology and Rehabilitation Sciences, KU Leuven University, and the Department of Movement and Sport Sciences, Faculty of Medicine and Health Sciences, Ghent University. He also teaches at the National Training Academy of Flanders, Belgium. He is a former board member of the International Society for Comparative Physical Education and Sport (ISCPES) and of the International Society for the History of Physical Education and Sport (ISHPES). He teaches foundations of physical education, comparative studies, sports history and sports ethics. He coordinates the Interfaculty Research Group Sport and Ethics (KU Leuven). He published several books and articles in leading journals in sport studies.
