

Index

A

- Abiotic stress, 5, 33, 44, 84, 119, 120, 132, 142, 143, 146–149, 151, 183, 186, 192, 196, 208, 209, 210–212, 214, 215, 217, 222, 224, 228, 288, 316, 317, 322, 325, 326, 373, 376
- Abscisic acid, 7, 67, 70–72, 74, 119, 121–125, 128, 129, 131, 132, 135, 136, 171, 185, 194, 198, 207–212, 225, 253, 360
- Agricultural, 288, 357, 371, 373, 375
- Aluminum toxicity, 266
- Arabidopsis thaliana*, 3, 8, 17, 20, 23, 35, 95, 62, 143, 144, 164, 176, 190, 223, 255, 259–261, 266, 267, 373
- Ascorbate content, 321, 329, 331

B

- Bioactive compounds, 340, 346
- Biomass, 62, 65, 71, 72, 204, 301, 302, 309, 322, 325, 330, 332
- Biosynthesis, 3, 16, 20, 21, 24, 32, 37, 49, 70, 71, 121, 123, 125, 135, 143–146, 152, 153, 167, 170, 172, 173, 175, 191, 195, 198, 205, 207, 208, 280–282, 330, 341, 344, 364, 367, 368, 374, 375
- Biotic stress, 3, 31, 33, 44, 149, 185, 186, 210–212, 217, 218, 223, 224, 252, 316, 325, 326, 357, 366, 369, 371, 375

C

- Cadmium stress, 119, 126, 128–132, 135, 188
- Callose, 53, 93–98, 102, 103, 316
- Carbon dioxide, 8, 18, 74–76, 86, 93, 94, 359, 370
- Catalyst, 263, 265
- Cell compartmentation, 56
- Cell-to-cell transport, 87

- Cell walls, 17, 45, 94, 122–125, 127, 131, 132, 135, 200, 202, 252, 255, 284, 315, 317, 344, 358
- Chilling injury, 200, 201, 325, 340–342, 348, 351
- Chitin, 279, 284, 286
- Cold tolerance, 198, 199, 201, 202, 209
- Cytoplasmic calcium, 95, 96
- Cytoskeleton, 95, 96

D

- Dehydrin, 119, 121, 122, 126, 129, 130, 136
- Diffusion predictors, 51, 56
- Disease symptoms, 283, 318, 322
- Drought stress, 5, 6, 71–73, 143, 150, 190–193, 201, 211, 227

E

- Ecological, 65, 306, 358, 371, 376
- Economic importance, 303
- Electric potential, 103
- Endophytic, 291
- Environmental signals, 23, 61, 64, 75, 77, 221
- Ethylene production, 20, 21, 209, 343–345, 351

F

- Fenton-type, 263, 265
- Flavonoids, 142, 149, 152–154, 346
- Flowering, 23, 24, 33, 44, 103, 145, 163–177, 184, 250, 302, 373, 374
- FLOWERING LOCUS T*, 164, 168, 177
- Foliar, 6–8, 18, 19, 22–24, 71, 196, 197, 200, 205, 206, 225, 301, 311, 316, 325, 340, 349, 369, 371–373
- Food production, 299, 300, 303, 312

G

Gene expression, 16, 24, 33, 85, 147, 167, 170, 172, 202, 209–211, 222, 227, 267, 279, 282, 316, 317, 326, 331, 350, 360, 367, 368

Grammineae, 308, 309

Growth, 8–10, 17, 21, 33, 45, 62–65, 67, 68, 73, 75, 83–85, 87, 120, 121, 128, 130, 132, 136, 144, 149, 150, 164, 185, 188, 192, 195, 199, 200, 203, 204, 208, 209, 253, 278, 300, 301, 309, 324, 325, 331, 351, 360, 364, 369, 371–373, 377

H

Heat production, 22, 185, 369

Heat tolerance, 22, 195–197

Heavy metal, 99, 125, 126, 187–190, 211, 220, 224

Horticultural products, 302, 305, 312

Hypoxia, 206, 207

I

IC pathway, 15, 143, 145, 146

Intracellular pH, 93

Isoperoxidases, 279, 284, 286–288

J

Jasmonate, 31, 207, 280–282, 359

Jasmonic acid, 16, 49, 52, 147, 167, 171, 185, 225, 253, 280, 364, 365

L

Lemna paucicostata, 23, 165, 174

Light, 64, 76, 173, 206

Long distance transport, 45, 51, 52, 56, 87, 100, 102, 103

Long term effects, 319, 323–326

Low temperature, 70, 71, 76, 164, 165, 167, 169–171, 198–201, 208, 224, 226, 342, 348

M

Membrane transport, 56, 99

Metal toxicity, 183, 262, 266

Mineral nutrients, 21

Minituber, 324

N

Nitrate metabolism, 19

Nitric oxide, 360, 361, 366

O

Oxidative stress, 5, 17, 21, 107, 131, 136, 148–150, 188, 190, 192, 193, 199, 201, 206, 207, 215, 217, 218, 220, 227, 256, 257, 264, 317, 326, 330, 358, 367, 371

Ozone stress, 204, 205

P

PAL pathway, 143, 145

Pathogenesis, 20, 94, 120, 142, 147, 185, 222, 223, 251, 278, 279, 291, 316, 317, 326, 350, 363, 366–368

Perilla frutescens, 165, 172

Perishable crops, 342

Peroxidase, 7, 17, 106, 120, 123–125, 131, 133–136, 148, 192, 194, 200, 216, 217, 222, 225, 252, 278, 279, 284–288, 291, 292, 316, 318, 320, 321, 330

Peroxyacetyl nitrate, 259

PGPR, 282, 288, 289, 290

Pharbitis nil, 164, 167

Phenylalanine ammonia-lyase, 15, 119, 123, 143, 164, 198, 347

Phloem transport, 45, 50, 53, 102, 103, 316

Phospholipases, 32, 34, 36, 39

Photosynthesis, 18, 24, 62, 64, 68, 71, 72, 83, 86, 97, 126, 127, 185, 188, 196, 199, 204, 205, 226, 228, 256, 317, 344, 370

Phytoplasma, 315, 316, 318–320, 322–332

Phytohormones, 31, 36

Plant defense, 3, 32, 87, 95, 126, 250, 251, 254, 284, 316, 326, 360–363, 366, 367, 373

Plant hormones, 16, 24, 25, 44, 64, 67, 77, 186, 191, 207, 209, 210, 214, 217, 227, 258, 360, 363, 375

Plant productivity, 300, 357

Plant resistance, 4, 5, 8, 9, 25, 95, 119, 120, 126, 130, 136, 188, 218, 278, 283, 288, 290, 291, 360, 366, 369, 371

Plant volatiles, 358–361

Plasmodesmal proteins, 97

Post-harvest application, 339

Potato resistance, 284, 291, 315

Proline, 8, 10, 84, 85, 132, 133, 150, 188, 193, 194, 197, 199, 372
 Prooxidant-antioxidant balance, 120
 Protein kinases, 33, 191, 213, 218–221, 226, 253, 362, 367

R

Reactive oxygen species, 7, 96, 121, 127, 130, 170, 193, 251, 278, 316, 347, 348, 366
 Receptor-like kinases, 97
 Respiration, 86, 89, 93, 94, 97, 185, 191, 218, 228, 252, 341–343, 347, 351, 367
 Respiratory rate, 340–343
 Ricinus model, 56
 Ripening, 20, 21, 120, 340, 342–345, 351
 Root system, 55, 300, 301, 309

S

Salicylic acid (SA), 2–5, 15, 22, 31, 33, 38, 44, 46, 47, 50, 53–55, 62, 69, 76, 83, 85, 92, 100, 104, 106, 120, 123, 127, 131, 133, 141, 146, 184, 215, 250, 260, 286, 300, 301, 306, 317, 324, 339, 349, 351, 377
 Salicylic acid analogs, 18, 22, 43, 105, 151, 166, 192, 202, 207, 227, 250
 Salicylic acid metabolites, 3, 37, 44, 53, 56, 63, 184, 347, 348
 Salinity, 84–86, 119, 121, 125, 132–136, 143, 154, 193–195, 207, 208, 224, 226, 370
 Salt stress, 34, 132, 149–153, 193–195, 207, 211, 212, 217, 322, 372, 373
 Senescence, 5, 16, 23–25, 151, 153, 185, 192, 204, 326, 340, 343, 345, 347, 351, 366
 Serine/threonine kinases, 97
 Signal transduction, 6, 32, 33, 36, 149, 151, 185, 189, 191, 197, 218, 223, 225, 226, 252, 254, 261, 265–267, 357, 359, 361, 363, 368
 Smog oxidants, 260
 Stress, 5, 71, 95, 126, 132, 148, 151, 164–167, 169–174, 176, 189, 191, 193–195, 198, 204, 215, 262, 300

Stress physiology, 165, 177, 300
 Stress resistance, 4, 5, 125, 142, 340
 Stress-induced flowering, 164–170, 172, 174–177
 Sucrose, 45, 83, 86–91, 100, 101, 324, 344, 345
 Symbiotic, 20, 252, 278, 280, 288
 Symplastic, 43, 49, 50, 55, 90–93, 98, 101
 Systemic acquired resistance, 50, 52, 66, 120, 148, 149, 172, 186, 213, 222, 252, 278, 288, 290, 316, 317, 340, 350, 358, 360, 364–366

T

Temperature, 63, 68, 70, 71, 75, 125, 152, 164, 167, 169, 171, 176, 196–201, 208, 317, 348, 359, 369
 Terpenoids, 37, 149, 152, 153
 Thermotolerance, 22, 145, 196–198, 207
 Toxic ions, 119, 125, 131, 132, 135, 136
 Toxic metals, 33, 186
Triticum aestivum, 71

U

Ultra violet radiation, 205

W

Water deficit, 3–10, 85, 150, 190, 193
 Water stress, 9, 71, 142, 191, 193, 207, 250
 Wheat germ agglutinin, 119, 121, 126

X

Xylem transport, 55

Y

Yields, 9, 73, 256, 373, 376
