

## SUBJECT INDEX

- apodize/apodizing 157–160
- Bayesian analysis / methods 25, 53–55, 57, 59, 62, 63, 65, 73, 77, 83, 92, 94, 95, 139, 159, 162, 163, 168, 189–193, 196, 198, 224
- Bayesian spectrum analysis 75, 83
- Bayes' theorem 1, 21, 22, 25–28, 31, 42, 44, 50, 53, 54–57, 62, 66, 73, 76, 79, 191, 192, 199, 228
- Blackman–Tukey 77, 82, 99, 159
- brain 1
- Burg's method (see maximum–entropy spectral analysis)
- Cauchy distribution 53, 59, 60
- Carnot 268–278
- chirp 75, 86, 112, 137
- chirped signals 112, 137
- Communication theory 2, 21, 32, 34, 45
- Composition law 2
- constraint 15, 27, 49, 56, 162, 168, 169, 175–178, 180–182, 186, 198, 209, 211–225, 231, 241, 249, 250, 253, 273, 278, 296, 306, 308, 309
- covariance 66, 90, 93
- cross entropy (see relative entropy)
- directed divergence (see relative entropy)
- discrimination information (see relative entropy)
- entropy 14, 15, 26, 32, 45, 46, 49, 162, 168, 169, 173, 174, 181, 185, 186, 205, 207, 209, 223, 227, 237, 239–242, 249, 250, 257, 260, 262–265, 271–281, 283, 284, 295, 299–301, 306
- expert systems 283
- fractal 203, 204
- fuzzy sets 301, 303
- Gaussian distribution 53, 61, 63, 64, 78–81, 86, 90, 93, 97, 99, 100, 103, 106, 107, 112, 118, 133, 148, 152, 153, 156, 164, 168, 247, 257, 258
- Goedel's theorem 37
- image 173–175, 177, 179, 181, 185, 223, 277
- image processing/restoration/enhancement 173–181
- information systems 283–293
- information theory 12, 33, 164, 173, 245, 284
- Jeffreys 10, 28, 53, 73, 83, 192, 194
- Jeffreys prior 84, 89, 95, 202
- Lagrangian multiplier 15, 47, 49, 175, 177, 178, 180, 208, 209, 211, 215
- Laplace 1, 2, 9, 10–22, 54, 192, 194, 206, 208, 268, 276
- Lorentzian 99, 106, 117

- maximum-entropy 1, 15, 20, 21, 25–28, 31, 33, 45–48, 53–56, 62, 66, 69, 78, 79, 159, 162, 168, 169, 173, 174, 179, 186, 205, 206, 208, 213, 214, 218, 219, 222–225, 228–232, 235, 249, 253, 268, 269, 273, 278, 299, 302, 305
- Maximum-entropy spectral analysis (MESA) 159
- minimum description length (MDL) 161, 164–169
- NMR 113, 117, 122, 154
- normal distribution (see Gaussian distribution)
- nuisance parameter 79, 83, 86, 88, 92, 93, 102, 115, 151, 154, 155, 163–165
- Nyquist frequency 82
- Occam's razor 53, 64
- periodogram 75, 81–84, 89, 97, 99, 102, 109, 117, 122, 131, 133, 159
- phase 80, 86, 97, 117, 129, 136, 137
- pixel 156, 277
- Planck's constant 190
- planets 147, 148, 151, 154, 156
- point spread function 147, 157, 160
- Poisson distribution 53, 55, 58
- posterior probability (distribution) 27, 56, 58, 60, 62, 65, 67, 70–72, 75, 77, 80, 81, 84, 97, 100, 102, 104, 106, 109, 112, 115, 121, 122, 131, 136, 150–154, 191–193, 230, 306, 307
- power spectral density 77, 95, 97–99, 101, 102, 133
- power spectrum 77, 96, 97, 101, 102, 173
- prior information/knowledge 25, 27, 44, 55, 72, 77, 78, 80, 83, 84, 88, 89, 92, 137, 162, 163, 166, 190–193, 230, 305, 307, 311
- proper scoring rule 283, 284, 306, 311, 312
- quantum density matrix 236, 239, 240, 242
- quantum measurement theory 235–244, 249
- radar 265
- regression analysis 53
- relative entropy 305–311
- resolution 246
- resolving power 81, 82, 99
- Shannon 2, 15, 16, 21, 22, 32, 45, 48, 168, 174, 205, 207, 208, 284, 299, 300
- Signal-to-noise ratio 96, 97, 102, 117, 129, 133, 151, 156, 158
- spectral analysis 84, 86, 139
- spectrum estimation 96, 229
- stochastic complexity 161–165, 169
- Student t-distribution 84, 85, 89, 101, 102, 108, 109, 112, 113, 115, 117, 121, 129, 137, 139, 150, 152, 193
- sufficient statistic 75, 100, 104, 105, 107, 131, 150, 152, 153
- time series 76–78, 84, 92, 102, 107, 109, 113, 118, 131, 139
