

## INDEX

- Adhesion
  - Bowden and Tabor, mechanism of, 207
  - friction, 202
- Aluminium, 41, 78, 210, 211, 212, 213
  - bronze, 241
  - extrusion, in, 118, 151
    - flow control, 126
  - oxide
    - tooling, in, 246
- Amonton, model of, 203, 221
- Assel elongation
  - mill, 67
  - pass, 68
  - redundancy factor, 42
  - roll, 67
- Bar drawing
  - redundancy factor, 17
  - theory, 81
- Blazynski, concept of,
  - CMSR, 34, 130
  - CRHS, 28, 130
- Block
  - dummy, extrusion in, 115, 117, 121
- Blocker die, 173, 175, 181
- Bowden and Tabor, mechanism of, 207
- Brass
  - deep drawing, in, 74
  - extrusion, in, 118
    - flow control, 128
- Bronze, aluminium, 241
- Carbide
  - cemented, 78, 242
- Cavitation
  - rotary piercing, in, 11
- Ceramics
  - aluminium oxide, 246
  - sialon, 249
  - silicon nitride, 248
  - tooling, in, 246
  - zirconia, 249
- Challen and Oxley, mechanism of, 207
- Chromium
  - tool steels, 232
- Cobalt
  - tooling, in, 78, 242
- Computer-aided design
  - applications, 277
    - tool design, 277
  - forging dies, 177
  - function, of, 269
  - solid modelling, 272
    - boundary, 273

- Computer-aided design—*contd.*  
 solid modelling—*contd.*  
   constructive geometry, 273  
   molecular, 282  
   representation schemes, 273  
   research, 280  
   special occupancy, 276
- Computer-aided engineering  
 forging, 177
- Computer-aided machining  
 applications, 277  
 die  
   blocker, 181  
   finisher, 180  
   function, of, 277  
   link, 276  
     wire frame, 270  
   requirements, 179  
   selection, 179
- Conform, 113, 134
- Container  
 extrusion, 115, 122
- Copper  
 alloys, 41, 210, 211, 212, 213  
 extrusion, in, 118, 151  
 flow control, 129  
 lubricant, as, 78, 208, 211
- Deformation  
 asperities, of, 201  
 homogeneous, 2, 6  
 inhomogeneous, 2, 6, 7  
   rotary piercing, in, 9  
   tube-drawing, in, 12  
 mechanism, of, 2  
 pattern, of, 9  
 plastic, 145, 202  
 punches, of, 145  
 rate, of, 25  
 redundant, 2
- Diamond  
 tooling, in, 78, 250
- Die  
 activation, 105  
 blocker  
   design rules, 173, 175, 181  
 chilling effect, 160
- Die—*contd.*  
 coining, 242  
 drawing  
   design, 78  
 extrusion  
   design, 116, 119, 122, 123, 147,  
     148, 149, 152  
   materials, 118, 142, 148, 242  
   monitoring system, 146  
   multihole, 123  
   orifice, 123  
   single hole, 123  
 finisher, 166, 180  
 forging, 157, 163, 177, 242  
 forming, 242  
 kissing, 159  
 manufacture  
   copy milling, 186  
   electrodischarge, 187  
   hobbing, 189  
   manual machining, 186  
   NC processing, 186  
 roller, 63  
 split, forging in, 190  
 stretch-forming, 241  
 strip wound, 149  
 temperature, 161
- Diescher  
 disc, 63, 64  
 mill, 63  
 planetary rings, 66  
 roll, 63
- Drawing  
 bar, 17, 73  
 deep, 74  
 developments, in, 73  
 friction, in, 214  
 hydrodynamic, 98  
 lubricants, in, 77, 209  
 section, 98  
 strip, 74  
 temperature, elevated in, 100  
 tube, 9, 19, 31, 32, 40, 74, 98  
 ultrasonic  
   surface, effect of, 104  
   swaging, effect of, 103  
   volume, effect of, 103  
 wire, 15, 17, 41, 73

- EDM
  - forging dies, 187
- Ejector, extrusion in, 150
- Electro-slag
  - tool steel, refining of, 238
- Extrusion
  - aluminium, of, 118, 151
  - bar, 17
  - cold
    - non-ferrous metals, 151
    - steel, 137
  - Conform, 113, 134
  - container, 115, 122
  - die, 116, 119, 122, 123, 130, 147, 148, 149, 152
  - direct, 115
  - dummy block, 115, 117, 121
  - flow control, 126
  - friction, in, 215, 221
  - geometry factor, in, 16, 19
  - HERF, 152
  - hot, 115
  - hydrostatic, 113, 115, 152
  - impact, 115
  - indirect, 115
  - lead, of, 151
  - lubricants, in, 212
  - magnesium, of, 151
  - mandrel, 116, 120
  - nickel, of, 118
  - orbital, 153
  - punch, 138
  - redundancy factor, in, 19, 44
  - sections, of, 131
  - tools, 115, 232, 240
  - tube, of, 19, 31, 44
- Factor
  - difficulty, of, 164
  - friction, of, 160
  - geometry, of,
    - definition, 14
    - extrusion, in, 15, 19
    - rotary tube piercing, in, 16
    - strip rolling, in, 17
    - tube-drawing, in, 16
    - wire-drawing, in, 15
- Finite element
  - flow simulation, 182
  - mesh generation, 281
- Flash, dimensions, 166
- Flow
  - control
    - aluminium, 126
    - brass, 128
    - copper, 129
    - extrusion, 126
  - simulation
    - die optimisation, 182
    - finite element, 184
    - slab method, 182
- Forging
  - die
    - blocker, 173
    - finisher, 166, 180
    - manufacture, 186
    - material, 232, 241
  - equipment, 159
  - friction, in, 216
  - geometry, 163
  - lubricants, in, 212, 213
  - materials, 157
  - process variables, 157
  - rotary, pilger, 59
  - shape complexity, 164
  - special techniques
    - core, 190
    - flashless, 190
    - precision, 192
    - undercut parts, 190
  - stress, 169
- Forming
  - die material, 241
  - half-warm, tool for, 239
  - stretch die, 241
- Friction
  - adhesion, 202
  - coefficient, 202
  - forging, in, 160, 201, 216
  - measurements, of, 212
  - mechanisms, 207
  - metal-forming, in, 199, 231
  - model, 203
  - rolling, in, 199, 213
  - rotary tube-piercing, 13

- Friction—*contd.*  
 stress, 202, 207  
 tube-drawing, in, 13, 104, 214  
 wire-drawing, in, 199, 214
- Geometry  
 blocker, of, 173  
 factor, 14  
 finisher die, of, 180
- Hardness test, 202
- Heat  
 steel, treatment of, 236  
 transfer, 161
- Indium, lubricant as, 208
- Inhomogeneity, deformation of, 6
- Lead  
 extrusion, of, 151  
 lubricant, as, 208
- Limit, proportionality of, 206
- Load  
 forging  
 die, in, 161
