

INDEX OF NAMES

- Abeles, F. 60
Agogino, M. 192
Agrinier, B. 250, 287, 290, 293, 296
Alexander, J.D.H. 63
Aller, L.H. 35
Alter, D. 4
Anders, F. 263
Anderson, K.A. 119, 148, 150
Arnold, J.R. 263, 274, 275
Axford, W.I. 256
- Babcock, H.W. 37
Balasubrahmanyam, V.K. 259
Bappu, M.K.V. 36
Bates, D.R. 128
Beals, C.S. 35
Blake, R.L. 105
Bland, C.J. 285
Bleeker, J.A. 287, 290, 291, 293
Bogges, A. 39, 63
Boksenberg, A. 58
Borgman, J. 39, 63
Bowen, P.J. 113
Bowyer, S. 275
Boyd, R.L.F. 72, 125, 138
Braccesi, A. 275
Bradley, D.J. 53
Brini, D. 275
Burbidge, E.M. 40, 41, 45
Burbidge, G.R. 247
Burgess, A. 111
Burnight, T.R. 129, 130
Burton, W.M. 60, 67
Byram, E.T. 63
- Casal, F.G. 148
Chubb, T.A. 103, 146
Chudakov, A.E. 192
Clark, D.B. 275
Clark, G. 191, 192, 194, 251
Cline, T.L. 224, 275, 287, 292
Code, A.D. 35
Cook, A.H. 42
Critchfield, C.L. 283, 286, 287, 291, 292
Culhane, J.L. 107
- Dadiken, D.L. 192
- Daniel, R.P. 284, 285, 287, 290, 292, 293, 295, 296
Davis, L. 39
Dellinger, J.H. 139
Denisse, J.F. 121
DeShong, J.A. 250, 295
Dilworth, C. 294
Domingo, V. 192
Dunkelman, L. 56
Duthie, J.G. 237, 274, 275, 278
- Earl, J.A. 229, 250, 285, 287, 288, 289, 290, 291, 295
Edlén, B. 71, 127
Efremov, A.I. 159
Elst, E.W. 26
Elwert, G. 103, 104, 105, 110, 111, 112, 113
Escobar, I. 192
Evans, K. 103, 105
- Fazio, G.G. 236, 237, 274, 278, 279
Felten, J.E. 232, 238, 246
Fichtel, C.E. 259
Fisher, P.C. 165
Flamm, E.J. 271
Fowler, W.A. 263
Freier, P.S. 287, 288, 289, 290, 293
Friedman, H. 72, 102, 113, 122, 125, 129, 130, 147, 159, 164, 192
Frye, G.M. 237, 239
- Garmire, G. 192, 233, 238, 246
Gaustadt, J.E. 33
Geiss, J. 263
Giacconi, R. 105, 138, 164, 275
Ginzburg, V.L. 207, 226, 227, 228, 229, 234, 241
Gold, T. 260
Goldberg, L. 111
Greenstein, J.L. 34, 39, 263
Greisen, K.I. 244
Grotrian, W. 127
Guillaume, C. 25, 26, 33
Gulledge, I.S. 63
Gursky, H. 193
- Hafner, E.M. 275, 278, 279
Hall, J.S. 39

- Hall, L. A. 73
 Hartman, R. C. 295
 Hass, G. 67
 Hayakawa, S. 224
 Haymes, R. C. 241, 242
 Helmken, H. 192
 Herbig, G. H. 37
 Higbie, P. 192
 Hillier, R. R. 247
 Hiltner, W. A. 39
 Hinteregger, H. E. 61, 71, 72, 103
 Houziaux, L. 67
 Hoyle, F. 39, 128, 247, 263
 Hubert 127
 Hulsizer, R. I. 283, 286, 287, 292
 Hulst, H. C. van de 1, 39
 Hummer, D. G. 35
 Hunter, W. R. 49, 60
 Husain, L. A. 83
 Hutchinson, G. W. 272
- Jacobsen, T. S. 37
 Jager, C. de 101, 113, 119, 121, 123, 125, 150
 Jahoda, F. C. 59
 Jelley, J. V. 245, 246
 Jenkins, F. A. 59
- Kai, K. 115, 116, 117, 123
 Kawabata, K. 112, 113, 114
 Kraft, R. P. 37
 Kraushaar, W. L. 192, 233, 246, 251, 274, 275,
 278, 279
 Křivský, L. 117, 121
 Kundu, M. R. 150, 156
- Labeyrie, J. 125, 294
 LaPointe, M. 192
 Legrand, J. P. 120, 121

INDEX OF SUBJECTS

- Acceleration
 - of electrons 215ff. See also: Electrons; Synchrotron radiation
 - of protons 216
- Active region, see: Sun
- Annihilation 240, 241
 - , electron-positron annihilation 240, 274, 275
 - , proton-antiproton annihilation 272
- Antimatter 237
- Antinucleons
 - , interaction with matter 234
- Attitude control systems for rockets 177ff

- Babinet-Soleil compensator 59
- Balloon experiments 116–121, 140, 147–150, 164, 259, 273ff, 284–295
- Bendix photomultiplier 56, 57
- Betatron process, see: Electrons
- Black-body radiation 8
 - , Rayleigh-Jeans approximation 8
- Blanketing effect 25ff
- Bohr orbit 216
- Bolometric temperature 109
- Branching ratio 61
- Bremsstrahlung 8, 102, 114, 119, 121, 127, 148ff, 191, 199ff, 225, 239, 240
 - , magnetic bremsstrahlung, see: Synchrotron radiation
 - , radiation length 239, 240
 - , screening conditions 239, 240

- Calibration
 - , photometric calibration 60–63
- Celescope experiment 58
- Čerenkov counters 270
- Čerenkov radiation 61, 63, 273ff
- Channel photomultiplier 56, 57
- Cloud chamber 286ff
- Coatings
 - , reflecting coatings 49
- Collimator
 - , cosmic ray collimator 277
 - , X-ray collimator 171ff, 185–191
- Colour temperature (defined) 109
- Compton absorption 232, 244, 245
- Compton scattering 277
- Compton wavelength 240

- Corona
 - , solar corona 5, 6, 102
 - , emission measure 102
 - , ionisation and recombination 110–112
 - , spectral lines 127
 - , quiet corona 103–105
 - , stellar corona 5
- Cosmic rays
 - , acceleration mechanisms 209–215
 - , α -particle flux 231
 - , anisotropy 252, 286
 - , archeology 263–266
 - , betatron process 211, 212
 - , collision with interstellar matter 220, 221
 - , composition 224, 249–251, 263ff
 - , corpuscular radiation, galactic 266–270, isotopes 267–270, time history 265, 266
 - , density 258
 - , density gradient 260
 - , discrete sources 204
 - , East–West effect 295ff
 - , electrons *q.v.*
 - , electron-position ratio *q.v.*
 - , energy losses 225, 244
 - , energy spectrum 216, 217, 231–233, 251, 252, 261, 285ff
 - , Fermi process 212–214, 216
 - , flares 255, 260
 - , Forbush decreases *q.v.*
 - , gamma rays *q.v.*
 - , grand-based observations 253ff
 - , intensity 253, 255, 261, 264ff, 286–294
 - , intensity variation 253, 255
 - , isotropy 218, 228
 - , mean free path 220, 221
 - , models 227–229
 - , modulation 256, 261, 286
 - , motion of c.r. particles in earth's magnetic field 262
 - , neutrinos 251
 - , nuclear component 249, 250
 - , observations 148, 253, 269–271, 282–297
 - , Parker's theory 256ff
 - , pions 235
 - , primary electrons 231, 283–294
 - , production mechanisms 234–244, 276ff
 - , propagation 218–220

—, proton spectrum 231, 290
 —, rotational velocity component 260
 —, secondary electrons 284
 —, solar cosmic rays 106, 253, 266ff
 —, sources 199–209
 —, spectral index 205, 217
 —, transfer equations 226–229
 —, see also: Electrons; Gamma rays
 Counter telescope 291ff
 Critical frequency of plasma (defined) 133

Dark clouds 6

Debye-length 239

Detector

—, cosmic ray detector 286–288
 —, image storage tube 57, 58
 —, ionisation chamber *q.v.*
 —, open photomultiplier tube 56, 57, 159
 —, photoelectric detector 170, 171
 —, photographic plate 55, 135
 —, response 135
 —, photomultiplier tube *q.v.*
 —, proportional counter *q.v.*
 —, scintillator 141, 156, 270, 276, 277
 —, standard detector 61–63
 —, X-ray detector 128, 133, 166–172

Echelle grating spectrometer 53, 54

Eclipse

—, X-ray observations 133, 134

ELDO launcher 86ff

Electron(s)

—, acceleration mechanisms 209–215
 —, betatron process 148, 211, 212
 —, bremsstrahlung *q.v.*
 —, Compton absorption *q.v.*
 —, Compton scattering *q.v.*
 —, Compton wavelength 240
 —, cosmic ray electrons 231–233, 250, 251, 282–297
 —, distribution function 116
 —, energy loss 114, 115, 225
 —, energy spectrum 228, 229, 259, 260
 —, excitation 127
 —, Fermi process 212–214, 216
 —, flares *q.v.*
 —, forbidden transitions 127
 —, frequency spectrum 203
 —, inverse Compton process *q.v.*
 —, modulation of primary electron flux 286
 —, primary electrons 283–294
 —, re-entrant albedo electrons 284–286
 —, secondary electrons 222ff, 283ff
 —, solar corona electrons 114ff
 —, synchrotron radiation *q.v.*
 —, Thomson scattering cross-section 244
 —, Van Allen belt electrons 151

—, see also: Cosmic rays; Gamma rays
 Electron-position ratio 223, 229, 250, 294–296
 Electron temperature (defined) 109
 Emission lines 34–36
 Excitation temperature (defined) 109
 Extended sources 40–42
 —, diffuse nebulae 41
 —, external galaxies 41, 42
 —, supernovae remnants 41
 Extragalactic hydrogen clouds 8

Faraday rotation, see: Radio emission

Fermi process 212–214, 216

Flare-associated phenomena, see: Sun

Flare(s) 105, 106, 139, 143–147, 152ff, 255

—, cosmic ray flares 255

—, high-energy flares 106, 107, 123

—, model 123

—, optical flares 105

—, radio flares 106

—, X-ray flares 106

Flare stars 204, 206. See also: Synchrotron radiation

Forbush decreases 255, 260, 268ff

Galaxy

—, corpuscular radiation 266–270

—, halo 11

—, magnetic field 208, 209

—, matter in galaxy 208, 209, 233, 234

—, microwavefield 234, 244, 245

—, radio emission *q.v.*

—, structure 7, 8

Gamma ray(s) 148, 199, 231–248, 272–281.

See also: Cosmic rays; Electrons

—, absorption 244–246

—, Compton effect 244–245

—, pair production 245–246

—, annihilation *q.v.*

—, detection 273–281

—, differential production spectrum 236

—, direction of incidence 272, 273

—, energy spectrum 272

—, intensity 246, 274, 275

—, isotropic flux 274, 275

—, nuclear gamma rays 241

—, observation of gamma rays 272–281

—, polarisation 273

—, production processes 234–244, 276ff

—, sources 199, 246, 247, 275, 276

—, source strength 236, 238

—, spectral index 274

—, time variation 273

Gamma ray astronomy (defined) 272

Geiger-Müller counter 130, 168, 185, 191–195

—, efficiency 130

Geomagnetic cut-off, see Particle rigidity

- Gratings 49ff
 —, aberrations 50, 51
 —, astigmatism 50
 —, coma 51
 —, spherical aberration 50
 Gray body 20, 131, 151
 —, temperature 151, 153
 Grazing incidence spectrograph 159, 160
 Gyro-frequency 10, 211
 Gyro-radius 10
- Hertzprung-Russell diagram 3–5
- Interactions
 —, of particles with fields 114–116, 241–244
 —, of particles with matter 114–116, 234–241
 —, see also: Gamma rays; Cosmic rays
 Interplanetary gas 6
 Interstellar
 — absorption 6, 31ff, 164, 166
 — clouds 18
 — dust 7, 39
 — extinction 7, 63
 — gas 6, 31, 39, 40, 268
 — grains 7
 — matter 6, 233, 234
 — collision with cosmic rays 220, 221
 — polarisation 7
 — reddening 6, 7
 Inverse Compton effect 9, 10, 191, 199, 225, 243–247
- Ionisation
 —, autoionisation 110, 111
 —, collisional ionisation 110, 111
 —, equilibrium 110, 111
 —, in solar corona 110, 111
 —, photo-ionisation 110, 111
 —, Saha's law 19, 110, 111
 Ionisation chamber 62, 128, 151, 157
 —, efficiency 151
 Ionisation potential 127
 Ionisation temperature 109
 Ionosphere
 —, critical frequency 133
 —, D-region 127ff, 139
 —, E-region 127, 128, 132, 133, 139
 —, F-region 132ff, 139
 —, influence of solar X-rays 132, 133
 Ionospheric effects
 —, sudden ionospheric disturbance (SID) 139, 148, 152
 Isoelectronic sequences 113
 Isotopes
 —, in earth's atmosphere 265
 —, in galactic corpuscular radiation 267ff
 —, in meteorites 263ff
- K-edges of elements 129
 Kinetic temperature (defined) 109
- Large Astronomical Satellite 65, 83–98
 —, spacecraft concepts 87ff
 —, spacecraft requirements 84–86
 Limb brightening, see: Sun
 Line profiles 26–29
 —, types of line profiles 29
 Line spectrum
 — of O- and B stars 17, 18, 25–29
 Liouville theorem 219
 Luminosity 3
 Lyman- α line 79, 139ff, 152. See also: Sun
 Lyman limit 17
- Magnetic barrier 257
 Magnetic bottle 214
 Magnetic bremsstrahlung, see: Synchrotron radiation
 Magnetic broom 157
 Magnetic fields
 —, cosmic magnetic fields 9, 11, 233
 Main sequence 3
 Mass-absorption coefficient 19
 Mercator projection 178, 179
 Meson
 —, Mu meson 253
 —, Mu meson telescope 253
 —, Pi meson 199ff, 222, 235–239, 244–247, 272, 278–283
