## SUBJECT INDEX

- A.G.M. theory 152 ff.
  - contraction axioms 154
  - epistemic entrenchment axioms 156 ff.
  - revision axioms 155
- action xvi
  - at a distance xvi
  - event and 324 f.
  - intentional, cause 394–397
- addition axiom 23
  - law 12
- additive function 31
- additivity 23, 162 f., 302 ff.
- algebra, Boolean 5, 18, 19, 20
  - event 200
  - Heyting 19
- algebraic field 27
  - term 5
- algorithm, prefix 76
- Allan variance 122, 123
- analysis, nonstandard 26
- antisymmetry 302
- Archimedean axiom 26
  - chain 219
- arithmetic, real number 46
- Armed Forces Qualification test 350 f.
- associativity 6, 8
- asymmetry 302
- asymptotics 123
- attitude, epistemic 153
- attribution, causal 381
- average causal effect 270
- averages, long-run 130
  - time 123–125
- axiom 5, 6, 10
- axiomatization, autonomous 4
- B<sup>+</sup>** 18
- ban (unit) 298
- barycenter 206, 207
- Bayes factor 294, 295, 297, 298
  - generalized 311
  - rule 33
  - theorem, odds form 296
- Bayesian alternative 288
  - decision theory 26
  - estimation 370
  - intellectual imperialism 118
  - network 179
  - updating 29, 30
- Bayesianism 137, 146, 167
  - strict 92
- BBD 27, 34, 35, 41, 42, 45
- behavior, consequentialist 51
  - credible 28
  - dynamic consistency 31
  - set 29
- behavioral science, geometric models in 239–254
- belief, certainty of 105
  - change 137
    - logic of, A.G.M. theory 152 ff.
  - changing, justification 87 ff.
  - conjunctive, preservation of 149
  - Dempster-Shafer theory 168
  - experimental study of 383
  - function xv, 119, 136, 137, 138, 147, 161, 163
    - modal logic of 137, 147–152
    - Shafer 115
  - measurement of 137, 146, 199–203
  - modelling, Dempster-Shafer theory 138–147
  - plain 176
  - state xv
  - structure, qualitative, axiomatization 159
  - vacuous 115
- Bell inequalities 111, 112, 120
- Bell's theorems xvii
- biomass, spartina, causes 351–356
- blocking 259
- Boolean algebra 15, 18, 19, 20, 201
  - finite 197
- Boolean space 200
  - arbitrary, probability in 217–221
  - countable, probability in 214–217
  - space, finite, qualitative probability in 203–214
    - linear space construction from 222 ff.
- Bose-Einstein statistics 371
- capacities, theory of 138
- capacity 138
- Cartesian product 41
- causal circuit 294, 299

- effect, average 270
  - prima facie average 271, 280
- generalization, practical 317–338
- inference 262
- Markov condition 191
- minimality condition 191
- model, experimental design vs. 266
- network 309
- parameter 263
- tendency 293–315
- causality, chance-inequality formulation
  - 319 f.
  - chance-influence formulation 319
  - couterfactual reasoning and 383–386
  - experiential status of 319
  - mathematical formulation, basis 326
  - mental models and 388 f.
  - practical importance 318, 338
  - probabilistic xv, xvi
    - testing 367–379
  - psychological aspects of 381–399
  - quadrant 378
  - statistical 362
- causation xvi
  - experimental model and 265 f.
  - negative 308
  - physical 310
  - probabilistic 275–280
    - Suppes theory 279 ff.
    - without probability 257–292
  - probability and 340 ff.
  - sufficient and necessary 294
- cause, correlation and 318
  - decision and 389–391
  - direct 341
  - event as 337
  - frequentist definition 384
  - genuine 290, 384
  - indirect 382
  - intentional action as 394–397
  - list of direct 181 f.
  - list of total 179 f.
  - mental model and 397
  - necessary, probabilistic 313, 314
  - prima facie 314, 315, 340
  - sufficient 313
- ceteris paribus 267
- chance 64
  - estimation of 331
  - node 27
  - objective 335
  - practical importance of 322
- chance-independent condition 327
- chance-inequality condition 327
  - formulation of causality 319 f.
- chance-influence formulation of causality
  - 319
    - replacement by chance-inequality 321
- change, epistemic 153
- Chouquet integral 117
- closure 19
- cognitive inertia 95
  - state 90, 91
    - potential, space of 106
- coherence 91
- commutativity 6, 8
- compatibility relation 145
- complement axiom 18
- completeness, equational 19
  - theorem 19
- complexity, Kolmogorov 75
- computation, problems of 132
- computer simulation xviii
- condition, necessary and sufficient 294
- conditional logic 32
  - probability 29, 32
- conditioning event algebra 32
- confirmational commitment 89–91
  - conditionalization 91
  - inertia 95
  - tenacity 93 ff.
- congruence 4
- conjugacy 114
- conjunction 295
- consensus 99
- consistency 91
  - dynamic 29
  - lexicographic 34
- constant conjunction 257
- contraction of belief 153
- contraction operation 157
- convex cone 223
  - qualitative probability and 224 ff.
- convexity 91
- correlation, cause and 318
- couterfactual 29, 30, 32, 292
- counting lemma 76
- creativity 15
  - Suppes's criterion 16
- credal probability 90
  - judgment 87 ff.
- credal state 91, 92
  - changes of 93
  - closure of 105
    - set of 105
- criminality among twins 373
