

NOTES ON CONTRIBUTORS

Fu Chang received his B.A. in philosophy from National Taiwan University in 1973, M.S. in mathematics from North Carolina State University in 1978, and Ph.D. in mathematical statistics from Columbia University in 1983. He was an Assistant Professor in the Department of Applied Mathematics, Operations Research and Statistics at Stat University of New York at Stony Brook (1983–84), member of Technical Staff at Bell Communications Research, Inc. (1984–86) and at AT&T Bell Laboratories (1986–90), and currently is Associate Fellow at Academia Sinica in Taiwan, Republic of China. He engages in research activities in various fields, including philosophy, statistics, telecommunications, and computer science and his current research activities cover high-speed networking, machine recognition of Chinese characters, system science and biological cybernetics. He is also a short story writer.

Daiwie Fu received a B.S. in physics from National Tsing-Hua University in Taiwan and then received his Ph.D. in philosophy from Columbia University at New York in 1986 and currently is Associate Professor in Institute of History at National Tsing-Hua University, Taiwan. He specializes in history and philosophy of science and is especially interested in history of Chinese mathematics, in Shen Gua research and in the history of modern western sciences. He is also interested in the intellectual and cultural history of contemporary Taiwan. He has published a number of articles in his interested areas and a collection of his articles (in Chinese) is forthcoming.

Wann-sheng Horng received B.S. and M.S. in mathematics from National Taiwan Normal University and his Ph.D. in history from City University of New York at Graduate Center and currently is Associate Professor of Mathematics at the National Taiwan Normal University, Taipei. He specializes in history of mathematics and currently is working on nineteenth-century Chinese mathematics and its socio-intellectual aspects — a pioneer study in the historiography of Chinese

mathematics. His Ph.D. dissertation on nineteenth-century Chinese mathematician Li Shanlan (1811–1882) and an anthology on Jial Xun, Wang Lai and Li Rui (in Chinese) are ready for publication.

Yu-Houng Houng received his B.A. in philosophy from National Taiwan University and his Ph.D. in philosophy and cognitive science from Indiana University. Currently he is Associate Research Fellow in Institute of European and American Studies, Academia Sinica, Taipei, Taiwan and is teaching in Department of Psychology at National Chong-Cheng University, Taiwan. He specializes in philosophy of mind and cognitive science. He has published a number of articles in these areas.

Ko Wei Lih received a B.S. from the Department of Mathematics at National Taiwan University in 1970 and received his M.A. and Ph.D. in mathematics from Duke University, U.S.A. in 1973 and 1976 respectively. He has been jointly employed as Research Fellow by the Institute of Mathematics and the Institute of Information Science, Academia Sinica, Taipei, Taiwan. He was the Chairman of the Committee for the History of Science, Academia Sinica from 1987 to 1990 and currently is the Director of the Institute of Mathematics, Academia Sinica. His major research interest is discrete mathematics. In recent years, he has also done some works in the history of Chinese mathematics.

Chao-tien Lin received B.A. and M.A. from the Department of Philosophy at National Taiwan University and his Ph.D. in philosophy from the University of British Columbia, Canada. He is Associate Professor of Philosophy at National Taiwan University. He specializes in confirmation theory and many valued logic and has published some articles on these areas.

Cheng-hung Lin received his Bachelor degree from the Law School at National Taiwan University and his Ph.D. in philosophy from the University of California at Berkeley. He was a Fulbright Fellow at Princeton University from 1989 to 1990 and current is Professor of Philosophy at National Taiwan University. He specializes in logic, epistemology and philosophy of science and has published seven books and a number of articles on these areas.

Shih-Chao Liu received M.A. from the Department of Philosophy at National Taiwan University and his Ph.D. in mathematics from the University of Wisconsin at Madison. He was Research Fellow of the Institute of Mathematics, Academia Sinica, Taipei, Taiwan and retired in 1991. He specializes in logic and foundations of mathematics. His articles on recursive theory, proof theory, non-standard analysis, history of mathematics and mathematical theory of go were published in *Proceedings of American Mathematical Society*, *Journal of Symbolic Logic*, *Proceedings of Kleene Symposium* and many other journals.

Tsui-hua Yang received her Ph.D. in history from State University of New York at Buffalo and currently is Research Fellow of the Institute of Modern History, Academia Sinica, Taiwan. She specializes in modern history of Chinese science and is the author of *Patronage of Sciences: The China Foundation for the Promotion of Education and Culture* and an editor of *Science and Technology in Modern China*.
