

SUBJECT INDEX

- A**
- Agenda 21 7-9; 15; 107; 273
- aligned rank methods 256
- ANOVA 37
- autocorrelation 82-83; 218; 256
- B**
- background quality 189
- Bartlett window 91
- base station 26; 234-235; 241
- base variables 42; 188-190
195-196; 198
- Bayesian analysis 41; 231
- bias 67; 70-71; 91-92
- Bucharest Declaration 29-30
- C**
- CDOE 21; 24
- class interval size 89; 174; 239
- compliance failure 247-248; 250
- confidence interval 39-40; 86; 203
205-206; 208
212; 245
- confidence limits 249-250
- cumulative distribution
function 84; 133-134; 216
- D**
- data
- analysis, 6; 23; 35; 49; 72-73; 75
85; 186; 243-245; 256
261; 267; 270; 277; 280
 - banks 19; 22; 24; 57; 209; 246
 - confirmatory analysis 256
 - dissemination 11; 55; 61
76; 275
 - exchange 56-57; 77
 - exploratory analysis 255
 - handling 9; 11; 56; 58; 72
 - historical 72; 107; 282
 - hydrometeorological 18
 - inconsistencies 32
 - interpretation 9; 11; 73; 75; 280
 - messy 32; 40-41; 58; 204
222; 245; 253; 261; 267
 - missing 20; 31-32; 40-41; 45
68; 72; 92; 94; 175; 178
199; 209; 222; 239
245; 254-256
261; 263; 277
 - presentation 32; 45; 69; 76; 277
 - protocol (DAP) 73
 - reliability and accuracy 69
 - storage 73
 - traceability 71; 279
 - transfer into information 60
 - utility 7; 26; 39; 58
173; 203; 242
 - validation 33; 45; 72
79; 202; 278
- databases 8; 25; 30; 57; 59
73; 76; 254
- driving forces 65-66; 92; 187
- DSI 19-20; 121
122; 185
- dynamic programming 37; 112; 126
127; 150; 184

- E**
- early warning systems 28
- EIE 9; 20
- EMAP 35; 103
- entropy
- concept 40; 46-47; 77; 112; 173
185; 204; 241; 263; 276
 - conditional 88; 176-178
225; 233
 - joint 88-89; 174-175
180; 232-233
 - marginal 88; 176; 178
224-225; 239
 - measures 90; 173-175; 204; 224
230; 232; 238-239; 242
 - method 41; 43; 173; 177
182-184
204; 224; 226; 229; 231
235; 241; 275; 281
 - principle 38; 41; 43; 173; 185
229; 231; 277
 - total 89; 174
- environmental impact assessment 2; 48
100
- errors
- analytical 32; 69; 276
 - systematic 32; 70
- explanatory variable 132-133
- exterior tributary 113; 118
- extreme values 244; 246-247
- F**
- flow adjustment 261
- force analysis 65-66; 279
- G**
- Gaussian process 82-83
- Gediz River 20; 38; 112-113; 115
118; 121-122; 125; 140
147; 149; 172; 182
196-198
- GEMS 8; 16; 20; 30
46; 49; 273
- general surveillance 2; 26; 40; 100
102; 111; 204; 245
- H**
- harmonic analysis 86
- homogeneity 45; 75; 78; 92; 259
276-277; 280
- hydrologic cycle 4
- I**
- impact assessment 2; 26; 29; 42; 48
96; 100; 188; 190
195-196
- information
- blurring of 67
 - content 67; 75-80; 87
173; 241; 276; 280
 - delineation of 187
 - mutual 89-90; 241; 264
 - quality 76; 78; 276
 - redundant 38; 41; 175; 178
180-182; 204; 224-229
231-232; 234-237
240-241
 - reliability 73
 - transmission 90; 242
- informed decision making 9
- integrated data
management system 7; 14
53-54; 60
- interbasin water transfer 24
- intervention analyses 254
- intra-block methods 256

K

kriging 35; 48; 92

L

limit of detection (LOD) 72-73; 258

linear regression 37; 41; 199; 231

linear trends 214-218; 253; 255

M

macrolocation 37-38; 112-113; 121

Mann-Whitney's test 215; 255

mean square error 257

microlocation 37-38; 113
