

INDEX

- V-introduction, 274
 \wedge -introduction, 274
- acceptable structure, 192, 218
actual infinities, 83
Aczel, P., 172
Alchourrón, C. E., 281
alethic maximum account, 274
alignment ordinal, 215
alignment point, 203
alignment value, 215
ambiguation, 303
ambiguity, 160
anti-diagonal sequence, 71
appreciator make-believe, 267
argumentum reductio absurdum, 55
Aristotle, 302
arithmetic provability, 3
arithmetical interpretation, 29, 39
Arthur Conan Doyle, 279
Artyomov, S., 34
assertion, 270
Aulonia Hexagona, 155
authorial pretense, 266
authorial pretense analyses, 247
axioms of fictionality, 249
axioms of naive theories of fictionality, 243, 245
- Balaguer, M., 292
Barwise, J., 171
Basic Modal Logic, BML, 12
belief, 270
Benacerraf's Dilemma, 241
Bencivenga, E., 246
Bernardi, C., 21
biconsistent, 178
- Bochvar, D. A., 169
Boolos, G., 34
boxed, 17
Bradbury, R., 275, 286
bridge sentences, 274
Brouwer, J., 303
Brouwer–Heyting–Kolmogorov explanation of the meaning of the connectives, 171
Bunge, M., 292
Burgess, J., 211
Buridan's 9th sophism, 156
Buridan, J., 156
- Can't Help It Realism, 298
Can't-Help-It Realists, 303
Cantor's Diagonal Process, 61
Cantor's paradise, 87
Cantor, G., 55, 56, 294, 303
cardinality, 61
cardinals, 64
Carlson, G. N., 276
Castaneda, H.-N., 247
causal theory of reference, 306
challenge, 286
Cherniak, C., 281
Church, A., 55
Church's Theorem, 111
closure, 277
closure conditions, 280
closure operation, 186, 189
co-closure operation, 187
co-inductive, 187
coherent complete partial order (ccpo), 182
common knowledge, 276
comparison application rule, 38
concept, 149

- conservative recursive permutation
 rule, 79
 consistency, 36
 consistent set, 182
 context, 309
 continuum and generalized hypothe-
 ses, 59
 contradictions, 272
 convenient modal logic, 45
 criterion *T*, 173
 Cuppens, F., 302
 Currie, G., 247, 261, 263, 264, 270,
 271
 Curry's Paradox, 92, 171
 Curry, H. B., 55

 Davis, P. J., 61
 De Jongh–Sambin Theorem, 3, 22
 De Morgan, A., 274
 Dedekind, R., 294
 deductive closure, 290
 deductive consequence, 273
 defaults, 276
 definibility, 61
 definition, 149
 Demolombe, R., 302
 denotation, 149
 denumerably infinite, 61
 descending hierarchies, 166
 diagonal methods, 55
 diagonalizability logic, **DiL**, 17
 diagonalization, 55
 diagonalization lemma, 6
 dialetheism, 272
 dialethic consequence, 280
 dialethic logic, 291
 dilemma, 91
 Dilemma Horn, 95
 directed set, 182
 disjunctive syllogism, 274
 Djaitich da Bloo, 273, 291, 293,
 295
 double negation, 274
 doxastic maximum account, 274

 Echemendy, J., 171
 elimination rules, 274
 Epimenides, 1, 115, 177
 epsilon calculi, 251
 essential richness, 163
 Euler's Constant, 81
 Evans, G., 287
Ex Falso Sequitur quodlibet, 172
ex falso quodlibet, 275
 Excluded Third, 172
 existence-neutral quantification, 241
 extension lemma, 41
 extranuclear properties, 248, 250

f-f-reference rule, 288, 305, 308
f-f-rule, 287, 291, 308
f-beliefs, 282
f-believes, 290
f-contexts, 285
f-fact, 283, 286–288, 298
f-Holmes, 307
f-instantiated, 284
f-modalization, 304
f-object, 306
f-operator, 282–284, 287, 290, 291,
 298, 299, 302, 308
f-propositions, 285, 309
f-reference, 305
f-refers, 288
f-truth, 281, 283, 304
 Faust, 299
 Feferman, S., 150
 fiction, 241
 fictional, 271
 incompleteness, 249
 inference rule, 259
 objects, 248
 truth, 267
 worlds, 255, 256
 fictionalism, 241, 292, 299
 fictive discourse, 244, 261, 266
 fictive inconsistencies, 284
 fictive-operator, 252, 262, 270
 fictive-operator analyses, 251

- Field, H., 292
 fixed point, 3
 fixed points, 174
 formalization lemma, 28
 Fraassen, B. van, 241, 246, 296
 frame, 24
 free logic, 241, 246
 Frege Structures, 172
 Frege, G., 261
 Fregean semantics, 271
 Fregean *Sinn*, 307
