

# Index

## A

Adaptive consensus algorithm, 52  
Asynchronously coupled form, 7, 24, 38, 80,  
90, 108, 119

## C

Characteristic equation, 14, 18, 21, 26, 31,  
54, 60, 82, 101, 108, 115  
Collective behavior, 1, 67, 116  
Communication delay, 7, 13, 24, 46, 74, 80,  
89, 101  
Coordination control mechanism, 1

## D

Degree matrix, 2  
Delay-dependent, 14, 34, 94  
Delay-independent, 14, 49, 91, 113  
Difference-compensated consensus algo-  
rithm, 79  
Difference feedback control, 79  
Digraph, 2  
Dynamical Consensus, 5, 23, 52, 80, 106

## F

First-order agents, 4, 13, 46, 52, 66, 68, 100  
Flocking, 1

## G

Generalized Nyquist stability criterion, 17  
Greshgorin's disc theorem, 21, 74

## H

Harmonic Oscillator, 107  
Heterogeneous multi-agent system, 46, 68  
High-order multi-agent system, 114  
Homogeneous multi-agent system, 13

## I

Input delay, 9, 13, 17, 32, 52, 71

## L

Laplacian matrix, 2, 33  
Leader-following, 89  
Linear multi-agent system, 5

## M

Mixed-order multi-agent system, 46

## N

Nonsingular transform, 33  
Nyquist stability criterion, 24, 109

## O

Output consensus, 6, 32, 66

## P

Predictor-based consensus algorithm, 99,  
104, 107, 114, 120, 121  
Predictor-based controller, 99

**S**

Second-order agents, [4](#), [46](#), [52](#), [66](#), [81](#), [90](#)  
Self-delay, [7](#)  
SIA matrix, [48](#)  
Single-input and single-output linear agents,  
[32](#)  
Spanning tree, [2](#), [3](#)  
Stationary consensus, [5](#), [16](#), [36](#), [46](#), [60](#), [100](#)  
Switching topologies, [3](#), [48](#)  
Symmetric topology, [70](#)  
Synchronization, [1](#), [110](#)

Synchronously coupled form, [7](#), [58](#), [80](#), [101](#)

**T**

Taylor series expression, [25](#), [34](#), [83](#)  
Time-delayed feedback control, [79](#)

**U**

Undirected graph, [2](#)
