## Symbols

$(M, N)$  singular value decomposition, 187

0-vector, 79

$A_{T,S}^{(1,2)}$ , 26

$A_{T,S}^{(2)}$ , 31

$L$ -positive definite, 49, 50

$L$ -positive semidefinite, 50

$\{1, 4N\}$ , 37

$\{i, j, k\}$  inverse, 13

$\{1,3M\}$ , 39

$\{1,3\}$  inverse, 13

$\{1, 4\}$  inverse, 12

$\{1\}$  inverse, 10

## A

Acute perturbation, 288, 304

Adjoint, 131

Array processor, 234

## B

Banach space, 337

Basic algorithm, 239

Best-approximate solution, 116

Bidiagonal matrix, 260

Block triangular, 190

Bordered matrix, 91, 92

Bott-Duffin inverse, 42

Bounded linear operator, 317

## C

Cauchy-Binet formula, 134

Cayley-Hamilton theorem, 249

Characteristic polynomial, 217

Cline's method, 203

Closed range, 318

Complementary subspace, 21

Complete pivoting, 180

Condensed Cramer's rule

restricted linear equation, 107

restricted matrix equation, 126

Condition (W), 292

Condition number, 304

Drazin inverse, 294

inversion, 264

Moore-Penrose inverse, 279

weighted Moore-Penrose inverse, 279

Conjugate operator, 317

Conjugate transpose matrix, 35

Continuity

$A_{T,S}^{(2)}$ , 288

Drazin inverse, 295

inversion, 274

Moore-Penrose inverse, 275

weighted Moore-Penrose inverse, 275

Core inverse, 62, 63

Core-nilpotent decomposition, 74

Core-rank, 189

Core-rank preserving modification, 296

Cramer's rule, 91

Csanky algorithm, 248

## D

Decell's algorithm, 308

Desoer-Whalen definition, 321

Determinant, 99

Determinantal expression

generalized inverse, 129

projector, 131

Direct method, 175

Displacement rank, 226  
 Displacement structure, 225  
 Displacement structure of generalized inverses, 228  
 Drazin inverse, 67  
 Dual-middle product, 240  
 Dual-outer product, 241

**E**

Efficiency, 238  
 Eigenvalue, 78  
 Eigenvector, 78  
 Elementary row operation, 177  
 Embedding method, 211  
 Equivalence theorem, 255  
 Euler-Knopp method  
   Moore-Penrose inverse, 327  
   operator Drazin inverse, 346  
   W-weighted operator Drazin inverse, 362

**F**

Faddeev-LeVerrier algorithm, 308  
 Fast Fourier transform, 256  
 Fast recursive least squares algorithm, 221  
 Finite Markov chain, 89  
 Finite method, 176  
 Forward order law, 164  
 Full-rank factorization, 5

**G**

Gaussian elimination, 180  
 Generalized Bott-Duffin inverse, 50, 51  
 Generalized displacement, 230  
 Generalized Drazin inverse, 371  
 Greville's method, 200  
 Group inverse, 76  
 Group inverse of M-matrix, 89

**H**

Hermite echelon form, 257  
 Hermite interpolation  
   Moore-Penrose inverse, 336  
   operator Drazin inverse, 350  
   W-weighted operator Drazin inverse, 366  
 Hermitian positive definite matrix, 35  
 Hessenberg matrix, 221  
 Hilbert space, 317  
 Householder transformation, 182  
 Hyperpower, 330

**I**

Idempotent matrix, 20  
 Index, 66  
 Inner inverse, 337  
 Inner product, 240  
 Iterative method  
    $p$ th order, 331  
   first order, 328  
   second order, 329

**J**

Jacobi identity, 132

**K**

Kronecker product, 116

**L**

Laplace expansion, 133  
 Least-squares ( $M$ ) solution, 38  
 Least-squares solution, 7  
 Level-2 condition number, 288  
 Leverrier algorithm, 217  
 Limit expression  
   operator Drazin inverse, 348  
   W-weighted operator Drazin inverse, 363  
 Limit representation of generalized inverses, 221  
 Linear difference equation, 89  
 Linear differential equation, 89  
 Linear operator, 317  
 Lower trapezoidal, 181  
 Lower triangular, 180

**M**

M-P inverse of Toeplitz, 225  
 Matrix equation, 14  
 Matrix norm, 34  
 Metric generalized inverse, 337  
 Middle product, 240  
 MIMD, 236  
 Minimum-norm ( $N$ ) least-squares ( $M$ ) solution, 40  
 Minimum-norm ( $N$ ) solution, 37  
 Minimum-norm least-squares solution, 7  
 Minimum-norm solution, 11  
 Minor  
    $A_{T,S}^{(2)}$ , 146, 147  
   Drazin inverse, 142  
   group inverse, 142  
   Moore-Penrose inverse, 134  
   weighted Moore-Penrose inverse, 137
