

# Index

## A

Android, 299, 303, 306, 311  
Array of pillars, 18  
Ascending hierarchical classification, 342, 343, 351  
Assurance, 249–251, 255–260  
Asymptotic expansion, 1–3, 6  
Authentication, 249, 251–257, 315  
Automate recruitment process, 189, 191, 200  
Autonomous navigation, 234, 240, 244, 245

## B

Blood, 353–360  
Blood transfusion unit, 353–356, 358–360  
Bluetooth Low Energy (BLE), 299–302, 311  
Boundary value problems, 139, 140, 147, 150, 166

## C

Cantilever beam, 167, 172  
Cation-exchange, 325, 326, 328, 329, 336, 337  
Centered moment, 133  
Clamped-clamped beam, 167, 168  
Contingency cost, 45, 49  
Conversion, 154, 211, 264, 300, 325, 327, 336–338  
Convexity, 72, 79, 92  
CoVaR estimation, 34  
Current harmonics, 267, 270, 274, 275

## D

Data analysis, 342, 345  
Data capture, 293, 295  
Data mining, 178, 183  
Decision support system, 43, 44

Degenerate kernel, 103, 106  
Digital Rock Physics (DRP), 364, 367, 374  
Dissimilar material joint, 390  
Distributed memory, 217, 223, 231, 233, 234  
Distribution, 45, 52, 54, 109–119, 347, 354, 360, 385, 389–391  
Divided difference, 73  
DNA sequence alignment, 352

## E

Electrical machine, 289–292, 295, 296  
Electric locomotives, 264, 270  
Electric vehicle, 300, 301, 303  
Electromagnetism, 1  
Enterprise Level Security (ELS), 249, 250  
Equilibrium state, 95, 99, 101, 108  
Esterification, 325–330, 336–338  
Euler-Bernoulli beam, 165, 166, 172–175  
Exact solution, 144, 150  
Exploitation of resources, 95  
Extreme value distribution, 59, 60, 62, 64

## F

Fault diagnosis, 290  
Financial risk, 32  
Finite element, 377, 389, 390  
Finite Element Analysis (FEA), 390  
Finite Element Method (FEM), 377, 380  
Finite Volume Method (FVM), 363–365, 369, 370, 374  
Four-NodePoint-to-Multipoint (4 N-PTMP), 313, 315  
Fracture, 18  
Frequency synthesizer, 282, 285  
Friction law, 379–386

Friction modelling, 379  
Friction power, 377, 385, 386

## G

Gas transport, 325, 335  
Gross domestic product, 71, 72, 87, 92

## H

Harmonic Maxwell equations, 1–3  
Headway, 153, 156  
Holder space, 95, 99, 108  
Homogenization, 1–3, 13  
Homotopy Perturbation Method (HPM), 139, 140, 146  
Human computer interaction, 213  
Human knowledge processing, 205, 209, 214, 215  
Human-machine interface, 299, 303, 306

## I

Identity, 249–258, 260  
IEEE 802.11n, 313, 318  
Increasing returns, 71, 72, 79, 92  
Indoor location estimation, 59, 60, 62, 69  
Infant Mortality Rates (IMR), 71, 72, 92  
Information representation, 203, 206, 214  
Intra-vehicular networks, 302  
Inventory, 353–360  
Inverse exponential, 109–111, 118, 119  
Invertibility, 99, 102

## K

K-means clustering, 73, 78  
Knowledge based processes, 203, 205, 209, 214  
Kolmogorov-Smirnov type statistic, 33, 35, 36

## L

Lactic acid feed, 325, 336–338  
Lattice Boltzmann method, 364, 374  
Least squares, 34, 67, 77, 84, 87  
Lexicon, 189, 191, 192, 194–196, 198, 200  
Load transfer, 17, 18

## M

MADM, 139, 140, 146  
Mathematical statistics, 352  
Maximum likelihood estimation, 109  
Membrane, 325–333, 335, 337, 338  
Methods of moments estimation, 129, 133  
Min–Max method, 130

Modular Multilevel Converter (MMC), 263–267, 271–273, 277  
Monte Carlo simulation, 43–45, 53  
Multidimensional scaling, 342–344, 346  
Multi-Factor Authentication (MFA), 254, 255, 257

## N

Natural frequency, 167  
Negative Sequence Currents (NSCs), 263–265, 267, 276, 277  
Noise web data learning, 184, 185  
Non-Newtonianfluid, 363, 364, 367, 368, 370, 374  
Numerical solution, 73, 132, 369

## O

Obstacle avoidance, 234, 236, 244–246

## P

Parallel computing, 217  
Performance evaluation, 299, 301, 313, 315  
Periodogram, 289, 290, 293–297  
Personal Identification Verification (PIV), 253  
Personal informatics, 207  
Phase noise, 281–284, 286, 287  
Phase-locked loop, 282  
Point-to-Multipoint (PTMP), 313–315  
Point-to-Point (PTP), 313, 314  
Polymer flooding, 364, 367  
Polynomial interpolation, 121  
Pore-scale modeling, 364, 365, 367  
Porous media, 140  
Positive distribution, 59, 60, 62  
Power quality, 264  
Power Spectral Density (PSD), 294  
Prismatic beam, 165  
Production, 264, 326, 355, 359, 360  
Project management, 43, 44

## Q

Quadratic programming, 79, 83, 92  
Quantile regressions, 33

## R

Radial distribution, 59, 60, 62  
Rail Power Conditioner (RPC), 263–268, 270–272, 274–277  
Re-order point, 353, 355–360  
Recruitment process, 189–191, 200  
Recursive relations, 149  
Relative speed up, 228

Renewable resources, 326  
Residual stress, 391, 399, 401  
Risk analysis, 45  
Risk measures, 31, 33  
Rolling process, 378, 379, 381, 386

**S**

Safety stock, 353, 355–360  
Scaling, 250  
Semi-automatic tool, 191  
Service robot, 233, 234, 247  
Simulation, 45, 53, 119, 153, 154, 156, 162, 263, 265, 271, 273, 274, 276, 277, 377–379, 389, 391  
Simulation method, 353, 360  
Skew Normal Distribution (SND), 19, 21, 22, 129–131, 136, 137  
Sliding velocity, 377, 379, 380, 384–386  
Solidification, 217–219, 221–223, 231  
Sparse Distributed Memory (SDM), 233–236, 238, 240, 241, 243, 244, 247  
Speed, 153–157, 159–162, 264, 267, 281, 282, 315  
Statistical approach, 18  
Statistical properties, 110  
Statistics, 110, 111, 116, 117, 345  
Strong scalability, 228–231  
Submodules, 263, 264, 277  
Subsea pipelines, 393  
Supply chain, 353, 354, 356, 358–360  
Synthetic divisions, 121, 123–127  
Systemic risks, 31, 32, 41

**T**

TCP packet size, 315–317, 319, 321  
Traffic, 153–157, 159, 161, 302  
Two-scale convergence, 1–3, 5, 7, 8

**U**

UDP datagram size, 313, 315–317, 320, 321  
User interest, 177–181, 183, 185  
User profile, 178, 182, 183, 185

**V**

Value-at-Risk (VaR), 33  
Vandermonde matrix, 121, 122, 124–127  
Variational iteration method, 165, 166, 168, 172, 175  
Vision-based Localization, 233, 234, 238  
Vision-based navigation, 234, 238  
Vissim, 153–161

**W**

Web log data, 178–181  
Web usage mining, 178, 180, 181, 183  
Weibull distribution, 17–23, 28, 62–67, 69  
Weibull generalized family of distributions, 110, 118  
Weibull probability distribution, 18  
Wi-Fi, 301, 302, 309, 313–316, 318, 321  
Winding faults, 290–293  
Wireless sensor networks, 311  
WLAN, 314  
WPA2, 313, 315–319, 321
