

Bibliography

(A selection of references which I have found useful. Not all are referenced in the text.)

Sources with translations and/or annotations.

(No reference is given for the *Rgveda*; there are a large number of translations and interpretations in a large number of languages. Precise references to chapter, poem and verse for questions related to number names can be found in Bhagyashree Bavare and P. P. Divakaran, “Genesis and Early Evolution of Decimal Enumeration: Evidence from Number Names in *Rgveda*”, *Ind. J. Hist. Sci.* vol. **48.4** (2013) p. 535).

- [AB-C] The *Āryabhaṭṭya* translated into English with commentary by Walter Eugene Clark, University of Chicago Press, Chicago (1930).
- [AB-S] *Āryabhaṭṭya* of Āryabhaṭa, critically edited with English translation, notes, etc. by Kripa Shankar Shukla in collaboration with K. V. Sarma, Indian National Science Academy, New Delhi (1976).
- [BM-H] The Bakhshali Manuscript, with translation and commentary by Takao Hayashi, Egbert Forsten, Groningen (1995).
- [GK-S] *Gaṇitakaumudī* of Nārāyaṇa Paṇḍita, translated with notes by Parmanand Singh, published periodically in instalments in *Gaṇita Bhāratī*, (1998 - 2002).
- [Ne-W] The Mathematical Papers of Isaac Newton (vols. I - VIII), edited with notes and translations from the Latin, where necessary, by D. T. Whiteside, The University Press, Cambridge (1967 onwards).
- [PS-K] *Pañcasiddhāntikā* of Varāhamihira with translation and notes by T. S. Kuppanna Sastry, P.P.S.T. Foundation, Madras (1993).
- [SiSi-P] L’Œuvre mathématique et astronomique de Bhaskaracarya: Le Siddhantasiromani I-II, with translation and commentary in French by François Patte, Librairie Droz, Paris (2004).

- [SuSi-B] The *Sûrya Siddhânta*, translation with notes by Ebenezer Burgess, Motilal Banarsidass, Delhi (1989, reprint).
- [SuSu-SB] The *Śulbasûtras* of Baudhāyana, Āpastamba, Kātyāyana and Mānava, with translations and commentary by S. N. Sen and A. K. Bag, Indian National Science Academy, New Delhi (1983).
- [TaiSam-K] The Veda of the Black Yajus School entitled *Taittirīyasamhitā*, translated by A. B. Keith, Harvard University Press, Cambridge (1914).
- [TaSa-RS] *Tantrasaṅgraha* of Nilakaṅṭha Somayājī, with translation and commentary by K. Ramasubramanian and M. S. Sriram, Hindustan Book Agency, New Delhi (2011).
- [YB-S] *Gaṇita-Yukti-Bhāṣā* of Jyeṣṭhadeva, vol.I (Mathematics), Malayalam text with English translation by K. V. Sarma (and explanatory notes by K. Ramasubramanian, M. D. Srinivas and M. S. Sriram), Hindustan Book Agency, New Delhi (2008).
- [YB-TA] *Yuktibhāṣā* (Part I - General Mathematics), Malayalam text with *vyākhyā* in Malayalam by Ramavarma (Maru) Tampuran and A. R. Akhileshvara Ayyar, Mangalodayam Ltd., Trichur (1948).

To these has to be added Colebrooke's translation with notes of *Līlāvati* and *Bījagaṇita* and chapters XII and XVIII of *Brāhmasphuṭasiddhānta*:

- [Co] Henry Thomas Colebrooke, *Algebra with Arithmetic and mensuration, from the Sanscrit of Brahmegupta and Bhāscara*, Sharada Publishing House, Delhi (2005, reprint).

Sources in the original (without translation or detailed commentary).

- [ABB] *Āryabhaṭīya* with the *bhāṣya* of Nilakantha (on the *Gaṇita*, *Kālakriyā* and *Gola* chapters); Parts I and II, K. Sambasiva Sastri (ed.), Government of Travancore, Trivandrum (1930, 1931); Part III, Suranad Kunjan Pillai (ed.), University of Kerala, Trivandrum (1957).
- [JM] *Jyotirmīmāṃsā* of Nilakantha, K. V. Sarma (ed.), Vishveshvaranand Institute, Hoshiarpur (1977).
- [SD] *Siddhāntadarpaṇa* of Nilakantha with his own analytic commentary, K. V. Sarma (ed.), Vishveshvaranand Institute, Hoshiarpur (1976).
- [TaSa-S] *Yuktidīpikā* of Shankara is part of *Tantrasaṅgraha* of Nilakantha (with *Yuktidīpikā* and *Laghuvivṛti*), K. V. Sarma (ed.), Vishveshvaranand Institute, Hoshiarpur (1977).

History of mathematics and related subjects**Books**

- [DS] Bibhutibhushan Datta and Avadhesh Narayan Singh, *History of Hindu Mathematics* vols. I and II, Bharatiya Kala Prakashan, Delhi (2004, reprint).
- [If] Georges Ifrah, *Histoire universelle des chiffres*, Robert Laffont, Paris (1994).
- [Jo] George Gheverghese Joseph *The Crest of the Peacock* (third edition), Princeton University Press, Princeton and Oxford (2011).
- [PI] Kim Plofker, *Mathematics in India*, Princeton University Press, Princeton and Oxford (2009).
- [SA] T. A. Sarasvati Amma, *Geometry in Ancient and Medieval India*, Motilal Banarsidass, Delhi (1999).
- [Sa-HKSHA] K. V. Sarma, *History of the Kerala School of Hindu Astronomy*, Vishveshvaranand Institute, Hoshiarpur (1972).
- [St-RM] Frits Staal, *Ritual and Mantras: Rules Without Meaning*, Motilal Banarsidass, Delhi (1996, Indian edition).
- [St-Veda] Frits Staal, *Discovering the Vedas. Origins, Mantras, Rituals, Insights*, Penguin Books, New Delhi (2008).
- [Th-EI] Romila Thapar, *Early India from the Origins to AD 1300*, Penguin Books India, New Delhi (2003).
- [Th-CP] Romila Thapar, *Cultural Pasts. Essays in Early Indian History*, Oxford University Press, New Delhi (2000).

Collections

- [Agni] Frits Staal (ed.) *Agni. The Vedic Ritual of the Fire Altar* vol. II, Motilal Banarsidass, Delhi (2001, Indian edition).
- [CHIM] Gérard G. Emch, R. Sridharan and M. D. Srinivas (eds.) *Contributions to the History of Indian Mathematics*, Hindustan Book Agency, New Delhi (2005).
- [MEMCII] Victor J. Katz (ed.) *The Mathematics of Egypt, Mesopotamia, China, India and Islam. A sourcebook*, Princeton University Press, Princeton and Oxford (2007).
- [SHIM] C. S. Seshadri (ed.) *Studies in the History of Indian Mathematics*, Hindustan Book Agency, New Delhi (2010).
- [Sunya] A. K. Bag and S. R. Sarma (eds.) *The Concept of Śūnya*, Indira Gandhi National Centre for the Arts, New Delhi (2003).

Finally, there is the invaluable web-based archive of J. J. O'Connor and E. F. Robertson, unusually good on Indian mathematics. The master URL is <http://www-history.mcs.st-andrews.ac.uk/index.html> with links leading to various sub-indices.
