Index

A
AST grade 3–5 injury, 133
Abbreviated injury scale, 14, 16, 53, 161
Abbreviated laparotomy, 4–5, 9, 102
Abdominal closure
primary and delayed primary closures, 213–218
retained foreign bodies, 218
Abdominal compartment syndrome, 10, 47, 195, 199, 405–407
Abdominal decompression, 406–407
Abdominal defects, not closed, 7
Abdominal dressing system, 215–216
Abdominal-inguinal incision, 144
Abdominal packing, 4, 183
Abdominal vasculature
distinct zones, 138
hemorrhage in pelvic area, 143–144
hemorrhage in upper lateral/peri-renal area, 143
inframesocolic injury, 141–142
porta hepatitis, 145
supramesocolic injury, 138–141
injury associated, blunt abdominal trauma, 137
Abdominal wall defects, management, 240
definitive reconstruction, 243–244
modified components, separation technique, 244
operative approach, 245–246
planned ventral hernia, 242
wound, temporary coverage of, 241–242
Accordion method, treatment, 393
Acidosis, 6, 34, 48, 55, 84, 85, 88, 125, 176, 358. See also Metabolic acidosis
ACS. See Abdominal compartment syndrome
ACTH-stimulation tests, 193
Active hemorrhage, 126
Acute lung injury (ALI), 59, 183
Acute respiratory distress syndrome, 61, 183, 231, 338
Adult respiratory distress syndrome, 56
Advanced Trauma Life Support (ATLS ®), 279, 300, 332
AIS. See Abbreviated injury scale
AIS/ISS taxonomy, 14
Alanine aminotransferase (ALT), 343, 347
Alloderm®, 225
American Association for the Surgery of Trauma (AAST), 349
American Pediatric Surgical Association (APSA), 345
American Society of Anesthesiologists, 232
Amputation, 72
Analgesia, 179–180
Anastomosis, 428–429
bowel, 136
for colonic injuries, 6
delayed, 133
end-to-end, 143
evidence for primary, 428
gastrointestinal, 129
small bowel and colon, 212
Anatomical resections, hepatic trauma, 130
Antibiotic bead pouch, 78
Antibiotic nailing, 77–78
Aorta repairing methods, 342
Aortic cross clamping, 268
Aortic injury, treatment, 268
Aortic occluder, 316
Aortography, 341
ARDS. See Acute respiratory distress syndrome
Arterial bleeding, pelvic fractures, 300
Arteriovenous loop, 255
Aspartate aminotransferase (AST), 343, 347
Associated injuries, 9
Atlas fractures, 292–293
Atroioval shunt, 131

B
Bacterial load, 79
Bag-Valve-Mask (BVM) ventilation, 105
Balloon tamponade liver, 129
Base deficit (BD), 45
Battalion aid station (BAS), 370
Bedside laparotomy (BL), 427
Beta-blockade, 268
Bilateral hypogastric artery embolization, 274
Biologic meshes, 408
Bispectral index (BIS), 180
Blast injury
limb injury, 389
primary blast effect, 388
secondary blast effects, 389
tertiary blast injury, 389
tympanic membrane injury, 388
Blood-borne immunocompetent cells, 59
Blood brain barrier (BBB), 56, 58
Blood pressure, 17, 84, 106, 109, 112, 190, 232, 268, 333
Blunt chest injury, 54, 61
Blunt trauma patients, 84
Bowel anastomosis, 136. See also Anastomosis
Bowel discontinuity, 198
B-type natriuretic peptide (BNP), 186
Burn patients, 45
Burn resuscitation, 49
Burst fractures, 293
BVM ventilation, 105

C
Calcium associated cytotoxicity, 58
Canadian C-Spine Rule (CCR), 292
Capillary-leak syndrome, 56
Cardiac
contusions, 340–341
dysfunction, 60
tamponade, 341
Cardiopulmonary bypass (CPB), 178
Cardiovascular management
hemodynamic support, 185
monitoring, status and resuscitation end-points, 185–186
vasopressor support, 186–187
Carotid injury, 284
Cattel-Braasch maneuver, 325
CD11b/CD18 expression, 47
Cellular immune response, 31
lymphocytes, 33
monocytes, 33–34
PMN-endothelial interaction, 31–32
ICAM-1, 32
L-selectin, 32
polymorphonuclear granulocytes, 31
Central nervous system (CNS), 54, 268
inflammation, 59
Central venous pressure (CVP), 85
Cerebral perfusion pressure (CPP), 58
Cerebrospinal fluid (CSF), 59
Cervical spine clearance protocol, 292
Cervical spine immobilization, 292, 335
Chance fractures, 293–294, 343, 350
Chess game, reconstruction, 251–253
Chest
injury, 61–62
wall closure, 148
x-ray findings, 88
Child abuse, 350
Chimeric flap, 255
Chimney effect, 301
Civilian terror attacks, damage control approach, 387
benefits and risks, 398–399
blast injury, 388–389
DCO surgery, terror attacks, 395–398
diagnostics and management, 393–394
emergency department level, 391–393
surgeon-in-charge, role of, 393–394
later control, 394–395
pre-hospital level, 390
evacuation, 391
strategies and recommendations, 389–390
Clamping, bleeding control, 318
Coagulation system, 28
coagulopathy, 34, 60–61, 86–87, 92, 176, 301, 349, 397, 426
and complement systems, interaction, 34
Coagulopathy. See Coagulation system
Coil embolization, 267, 268
Colonic injury, 136–137
Combined pancreatoduodenal injury, 135
Combither®, 104, 109
Common lower extremity injury, 70
Commotio cordis, 341
Complex lacerations, duodenum, 134
Component separation
and reconstruction of abdominal wall, 8
stages of, 224
technique, 408
Compression fractures, 293
Compression splints, 304
Concussions, 334
Controlled resuscitation, 49
Correction, lethal triad, 198
Counter-regulatory anti-inflammatory response (CARS), 358
Craniectomy, 281–282
Critical care team, 199
CT scan, 4, 105, 109, 115, 266, 269, 271, 273, 282, 293, 302, 333, 334, 336, 341, 345
Cytokine system
granulocyte-monocyte colony-stimulating-factor, 30–31
interleukin-1, 29–30
interleukin-6, 30
interleukin-10, 31
TNF-α and receptors, 29

D
Damage control, 265, 381–382
combined sternotomy and laparotomy, 10
concept of, 357
indications, 8
abdominal compartment syndrome, 10
associated injuries, 9
early decision making, 8
planned reoperation, 10
triad of death, 9
and interventional radiology (see Interventional radiologic techniques)
laparotomy, 123–125
operation, 8
phase III techniques, 211–212
phase III, timing of, 210
phase IV (see Soft tissue defects, reconstruction)
principles, 10–11
Damage control orthopedics (DCO), 155, 164, 165, 250, 256, 358
Damage control surgery (DCS), 405, 406, 425
Decision-making factors, 35–36, 48
clinical parameters, as aids for, 232–233
Decubitus ulceration, 291
Definitive
abdominal closures, types, 432
abdominal wall reconstruction, 220–224
care area, 316
care facility, 377
fascial closure with, 195
fracture fixation, 35
fracture stabilization, 161
operative care, 6
osteosynthesis, 71, 157
reconstructions, 412
stabilization following DCO, 166–168
therapy, 268
treatment area, 326
Devastating injury, gastroesophageal junction, 133
Diagnostic angiography, 265, 266, 273
Diagnostic peritoneal lavage (DPL), 344
DIC. See Disseminated intravascular coagulation
Diffuse axonal injury (DAI), 334–335
Direct venorrhaphy, 325
Disseminated intravascular coagulation, 61, 87, 176, 194
Distraction osteogenesis, 255
Double balloon tamponade, 319
Duodenal injuries in children, 350
Duodenum, 133–134
Dynamic skin suture, 253

E
Early total care, 157, 164, 165, 250
Eastern Association of the Surgery of Trauma (EAST), 368
Elderly trauma patient, orthopedic damage control, 358
benefits and risks
avoiding infection, 361
controlling hemorrhage, 361–364
pain control, 361
limb salvage, 359–360
strategies and recommendations, 358–360
timing of converting external fixator,
360–361
Elective general surgeons, 4
Emergency department (ED) resuscitation, 102
airway, 108–109
breathing, 109–110
circulation, 110–113
disability, 113–114
Emergency flap, 256
Emergency medical system (EMS), 101
Endocrine management, 192–193
Endoscopic retrograde cholangiopancreatography (ERCP), 135, 351
Endotoxin, 30
Enteric fistulae, 219
Entero-atmospheric fistula (EAF), 220, 407–409
Epidural hematomas, children, 335
Esophageal injury, 147
ETC. See Early total care
European trauma registry, 16
Euthanasia, 376
Exacerbating systemic inflammation, 27
Expanded polytetrafluoroethylene (ePTFE), 222, 223
External fixation-stabilization, pelvis, 304
Extracellular matrix (ECM), 223
Extrahepatic biliary injury, 131–132
Extraluminal balloon tamponade, 316
Extraperitoneal pelvic packing, 274
Extremity compartment syndrome (ECS), 414–415

F
Fascial dehiscence (FD), 411–412
Fasciotomy, 142, 326–327, 415
Femoral diaphyseal fractures, 73–74
Femoral nailing, 156–158, 231
Femur shaft fracture, algorithm for fixation, 93
Fibrin sealant dressing, 318–319
Fibula fractures, 72
Fistula VAC in situ, 221
Fixateur externe, 250
Fixation principles
conversion of external fixateur, 235
orthopedic injuries, 234
Flail chest patients, 337–338
Flaps
coverage, 75
distant flaps, 254
free flap, 251, 254–255
local flap, 251, 254
Floating stoma, 408
Fluid, and electrolyte management
electrolytes, 190
fluid choices, 189–190
volume of administration, 190
Focused abdominal sonogram in trauma (FAST), 302, 344
Fogarty balloon, 321
Forward resuscitative surgery (FRS), 372–374
Fractional inspired oxygen (FiO2), 184
Fracture-dislocations, thoracolumbar spine, 294
Fracture treatment and immunologic markers, 236
Free flap surgery, 254–255
Fuller zones, superior mesenteric artery, 140

G
Gastric resection, 133
Gastrocnemius flap, 260. See also Flaps
Gastrointestinal anastomosis (GIA) stapler, 129
Gastrointestinal management, 187
bowel discontinuity, 189
enteral access, 188–189
feeding, 187–188
stress-ulcer prophylaxis, 187
Gastrointestinal repairs, 212–213
General care, patient
concomitant injury management, 197
diagnostic studies, 197–198
oral hygiene, 196
skin care, 197
venous thromboembolism prophylaxis, 197
Geriatric patients, 114–115
German Society of Trauma Surgery (DGU), 53
German Trauma Registry, 161
Glasgow coma scale (GCS), 90, 333
Glisson’s capsule, 128
Global burden of injury, 13–14
Grade III open tibial fractures, 72
Gram-negative bacteria, 79
Granulocyte-monocyte colony-stimulating-factor (GM-CSF), 30–31
Guillotine amputation, 319
Gun-shot wounds (GSW), 16

H
Halo vest, 292, 293
Hannover Rehab Study, 444–446
functional long-term outcomes, 447–448
outcome measures, 447
study population, 446–447
Hannover score for polytrauma outcome (HASPOC), 442, 447
Head injury, management, 279–280
cranial facial injury
pneumocephalus/CSF leak, 284
skull base fractures, 284
ICU care in OR, 285
initial assessment, 280–283
aggressive neurocritical care, 282
basic questions to be addressed, 280
decision-making flow sheet, 281
intracranial pressure, treatment of, 281–282
operative plan, 280–281
primary CNS injury, treatment of, 282–283
“talk and die” syndrome, 280, 282
orthopedic injury, 285
spine injury, 284–285
decompression/stabilization, 284
vertebral artery injury, 285
thoracoabdominal injury, 283
bilateral “blown” pupils, 283
craniotomy, 283
early cranial imaging, 283
Heart rate, 83
Helical CTs, cervical spine
injuries, 292
Hematoma, 78, 123, 130, 141, 143, 168, 254, 303, 335, 350, 406

classification, 301–302
classification system, 302
CT scan, 302
FAST, use of, 302
pelvic radiographs, 301–302
PXR, use of, 302
subgroups of patients, 299–300
Pelvic packing (PP), 306–307
Pelvic X-ray (PXR), 302
Percutaneous pelvic fixation, 305
Perforator flap, 255
Perineal wounds, 308
Perioperative hemoglobin, 112
Persistent bleeding/coagulopathy, 199
Phenytoin, 334
Physiologic pattern, trauma patients, 4
PiCCO catheter, 186
PI3-kinase, 29
Pilon fracture management, 71–72
Pinch test, 222
Pin placement, 70
Pin-track infections (PTI), 416
Planned ventral hernias, 218–219
fistula management, 219–220
Plasma concentrates, IL-6 and IL-8, 159
Plastic surgery, 75
Platelet transfusion, 112
Plates, 250
PMN-endothelial interaction, 31–32
Pneumococcal vaccine, 346
Pneumothorax, 61
pO_2/FiO_2 ratio, 159, 166
Polymorphonuclear granulocytes (PMN), 27, 31
Polymorphonuclear leukocytes (PMNs), 58
Polytetrafluoroethylene (PTFE) patch
aortoplasty, 139, 140
Polytrauma demography, 18
Polytrauma mortality, 19–20. See also Mortality
Polytrauma patients, 299
early clinical outcomes, 442–444
functional long-term outcomes, 444
Hannover Rehab Study, 445–448
Lower Extremity Assessment Project
(LEAP study), 444–445
functional outcomes, 440
activity and participation, 440–441
HASPOC scoring systems, 442
impairment of body function, 442
patient satisfaction and QOL
measures, 441
head injuries in (see Head injury,
management)
outcome research, 439–440
pelvic fractures (see Pelvic fractures)
scoring systems, 90–93
spine injury (see Spinal injuries, treatment)
Porta hepatis, 145
Portal
  - triad injury, 131–132
  - vein, 326
  - venous injury, 270
Positive end-expiratory pressures (PEEP), 184
Post injury secondary ACS, 49
Post injury systemic inflammation, 57
Posttraumatic sepsis, 29
Pregnant patients, 115–116
Pre-hospital resuscitation, 102
  - airway and breathing, 103–106
  - circulation, 106–108
  - rural vs. urban environment, 102–103
Prewitt balloon, 323
Primary wound closure, 253
Pringle maneuver, 127
Procedural sedation, 200–201
Proinflammatory cytokines, 36
Prolonged operative procedures, 3
Prothrombin complex (PCC), 112, 113
Proximal coil embolization, 271
Proximal hypogastric coil embolization, 274
Pseudocyst formation, 351
Pulmonary
  - contusion, 338
  - embolism, 157
  - hydrostatic pressure, 60
  - management, 183
  - oxygenation, 184–185
  - ventilator strategies, 184
Pyloric exclusion, 3, 134
Revised trauma score (RTS), 84
Richmond agitation-sedation scale (RASS), 180, 181
Right ventricular end-diastolic volume index (RVEDVI), 186
Riker sedation–agitation scale, 180
Road traffic crashes, 16
Rummel tourniquet, 127
Secondary brain damage, 58
Secondary orthopedic stabilization, 230
  - biochemical markers, 230–232
  - clinical parameters, 232–233
  - fixation principles, 234
  - possible markers for determination, 233
  - secondary surgery, clinical studies of, 230
  - surgical principles, 235
Secondary wound closure, 253
Sedative agents, 181
Sepsis, 26–33, 137, 409, 413
Serum bicarbonate, 83
Shunts, 316–317
Sickness impact profile, 445
Significant thoracic trauma, 19
SIRS. See Systemic inflammatory response syndrome
Skin graft
  - full thickness, 254
  - separation assessment, 222
  - split thickness, 254
Skull base fractures, 284
Small bowel, 135–136
Soft tissue defects, reconstruction
  - closure of soft tissue, 250–251
  - acute bone-shortening/bone transport, 255
  - chess game of reconstruction, 251–252
  - flaps, application, 254–255
  - techniques, 253–254
  - vacuum-assisted closure, 255
Fracture stabilization, 250
Interdisciplinarity, importance, 258
Lower limb region, 259
  - calf, 260–261
  - foot, 261
  - knee, 260
  - thigh, 259
Radical debridement, 250
Timing of treatment, and closure, 256
  - classification, on time categories, 256–257
Soft tissue defects, reconstruction (cont.)
upper limb region, 258
back of hand, 259
elevator/forearm, 259
upper arm, 258
Soft tissue injuries, 87–89
Spinal cord injury (SCI), 114
Spinal cord injury without radiological
abnormality (SCIWORA), 336, 338
Spinal injuries, treatment, 295
imaging, and cervical spine clearance, 292
injury types, management, 292–294
atlanto-occipital articulation injury, 292
Hangman's fractures, 293
odontoïd fractures, 293
subaxial fractures, 293
sulphurations, and dislocations, 293
thoracolumbar fractures, 293–294
optimal timing, surgical intervention, 294–295
prevalence rate, 291
transport, and clinical evaluation, 291–292
Spleen, 132–133
Spleen sparing distal pancreatectomy, 351
Spleen-sparing pancreatectomy, 134
Splenectomy, 133, 134, 271, 346
Split-Thickness Skin Graft (STSG), 433
Standardized death rates (SDR), 15
Stent grafts, 267
Stents, 317
Stomach, 133
Stryker® kit, 414–415
Subdural hematomas, children, 335
Suicide bombers, 389
Superior mesenteric artery (SMA), 130
Superoxide production, 231
Supramesocolic injury, 138–141
Surgery, involving debridement, 75
Surgical bleeding, 129
Swan–Ganz catheter, 85
Systemic inflammatory response syndrome, 26, 157, 358
Systolic blood pressure (SBP), 83, 107

T
Tactical abbreviated surgical control (TASC), 382
TARN database, 17, 18
T-cells, 59
function, 58
T-cytotoxic suppressor cells, 59
Tegner activity score, 441
Temporary abdominal closure, 145–146
Temporary abdominal dressing, 146
Temporary skeletal fixation, 198
Tenants, damage control
definitive abdominal closure, 6–8
hemorrhage and contamination, rapid control, 5
operative repairs, return for completion, 6
rapid transport to definitive care, 5
resuscitation, 6
Terrorism, and disaster management, 368
Terror-related injury (TRI), 388
Tertiary examination, 199–200
Thoracic damage control, 201
Thoracic injury, 146–147
Thoracic trauma score (TTS), 88
Thoracic vasculature, 147
Thoracostomy, 339
Thromboplastin, 60
Thromboxane, 30
Tibial plateau fractures, 72–73
Total hepatic occlusion, 132
Tourniquet, 250, 315–316
Tractotomy, 147
Transcatheter embolization, 265, 268
Trans-esophageal echocardiography (TEE), 186
Transforming growth factor-β (TGF-β), 59
Transport, DC patients, 199
Trauma Audit and Research Network (TARN), 17
Trauma registry, 18
Traumatic brain injury (TBI), 53, 60, 104, 107, 114, 333–334
Traumatic injury, GI tract, 133
Trauma, gallbladder, 131
Triad of death, 9
Tris-hydroxymethyl-amino-methane (THAM), 177
Tumor necrosis factor-α (TNF-α), 59, 61, 231.
See also Cytokine system and receptors, 29–31

U
Unconsciousness, 109

V
VAC, promising technique, 80
Vacuum-assisted closure, 250, 251, 255, 408
Vacuum-assisted dressings, 7, 78
Vacuum-assisted wound closure technique (VAWC), 195
VAC wound therapy, 79
Vascular injuries, and damage control approach, 315
abdomen, 323
  abdominal aorta, 323–324
  celiac axis, 324
  groin, 326
  iliac vessels, 325
  inferior mesenteric artery, 324
  inferior vena cava, 325
  portal vein, 326
  renal vessels, 325
  superior mesenteric artery and vein, 324
definitive occlusion
  amputation, 319
  coiling, 318
  hemostatic agents and glues, 318–319
  ligation, 318
extremity vessels, 326–327
flow restoration
  complex repairs and grafts, 317
  lateral repair, 317
  shunts, 316–317
  stents, 317
maxillofacial hemorrhage, 319
neck region, 319–320
  carotid injuries, 320
  cervical venous injuries, 320
  subclavian vessels, 321
  vertebral arteries, 320–321
temporary occlusion, 315–316
thorax
  aorta, 321–322
  azygos vein, 322–324
  pulmonary vessels, 322
  thoracic vena cava, 322
Vascular repairs, 212
Venous thromboembolism (VTE) prophylaxis, 197
Ventriculostomy, 282, 284
Vertebral artery, 320–321
  injuries, treatment, 285
Vulnerable groups, 14–16

W
Warfarin-induced coagulopathy, 111
Warming techniques, 178
Wittmann Patch™, 218
Wound and open-abdomen management
  general wound care, 194–195
  intra-abdominal pressure management, 195–196
  laceration repair, 194–195
  recurrent abdominal compartment syndrome, 196
Wound complications, 410
  fascial dehiscence (FD), 410–411
  wound infection (WI), 410–411
Wound data and munitions effectiveness team (WDMET), 379
Wound management objectives, 76

Y
The Young and Burgess classification system, 302

Z
Zeolite hemostatic dressing, 318
