INDEX

A
Academic departments
   annual projects, 108–109
   community, 109–110
Anthropocentric perspective, ecological education, 59
Arava Institute for Environmental Studies (AIES)
   Alumni projects, 192
   Arab-Israeli coexistence organizations, 191
      higher education institution, 190
      interdisciplinary framework, 191
      PELS program, 191–192
B
B-Street permaculture project, Pacific University
   career development center, 174
   classroom activities, 175–176
   ecological art course, 174
   grass-roots initiative, 173
   landscape operations, 174–175
   LEED certification, 171
      objectives, 173
      right action, 171
      sustainability concepts, 172
      website, 175
Baconian method, 116
Bologna process, European higher education
   Magna Charta Universitatum, 5
      major controversies, 6
      mobility of, 7
C
Center for Ecoliteracy (CEL), 117
Community of learners
   Faculty’s core curriculum, 136
      integrative knowledge, 139–140
Community-based learning (CBL)
   food security education, 160–161
      service and research, 159–160
Curriculum, changing role of universities
   attractive and competitive content, 7
      internationalizing, 7
      mode 2 universities, 4
D
Dark forests paradigm
   debriefing diversity exercises, 144–145
   flashlights, 143–144
   knowledge integration, 145–147
   LFC series, 148–149
   micro/macrocosms, 147–148
   reflections, 149–151
Deming cycle, total quality management model, 46
E
Eco-efficiency tools
   availability of, 45–47
   continuous learning model, 46
   Deming cycle, 46
   non-conventional teaching methods, 46
   sustainable development
      basic mechanisms, 44–45
      established techniques, 45
      German Wuppertal Institute, 44
      life cycle analysis, 44
      Universities–companies cooperation
      environmental educational process, 50
      integration of, 47–48
      Russian MI-calculations results, 48–49
      TACIS CBC Program, 47
ECODIV TEMPUS-program, 89
Ecological education model
   basic concepts, 58
   major goals, 58
   objective, 59
   sustainable development, aims to, 57
      transfer of knowledge, 59
Ecology of knowledge, 132–133, 136
Economic development, sustainable development, 60
Ecosystem services
   environmental security, 69
   regime shifts, 68
   trans-disciplinary approaches, 71
Education. See Higher education
Education for sustainable development
   environmental security
      human security, 16

229
river basin management, 16
two-tier education, 18–19, 21
water management, 15–17
governance, 12
science and education, marsh, 21–22
science at Sea
  expert-puzzle solvers, 15
  paradigm, 14
  scientific communities, 14–15
  scientific education, 15
ship metaphor, 12
social-ecological programme, 19–20
State of the World Week, 23
trans-disciplinary research, 20
Wasserstiftung, German non-governmental, 24

Employment, Ukraine
data base, 94
ratio of, 92–93
tracks, 95

Environment
  Hands-on projects and Field Biology
course, 120
  U.N. Environment Programme, 123

Environmental education. See Non-traditional education
academic subject, 35

and science
  Arizona State University, USA, 70
  challenges of, 71–72
  foundation of, 69
  global change, 68
  impact of humans, 66
  Long Term Ecological Research
  Program, 67–68
  Millennium Ecosystem
  Assessment, 68
  trans-disciplinary approach, 68–69
  U.S. Environmental Protection
  Agency policy, 67

current teaching dilemmas
  ESHIA and Ukrainian practice, key
difference, 38–39
  impact assessment systems, 39
  learning process, 37
  overview of international and
  Ukraine EIA system, 38–40
  OVNS materials, 38
  State Ecological Review, 38
  studying, 36
teaching environmental impacts,

Ukraine, 37–38
humankind and nature, 36
sui generic bifurcation, 36
Ukraine environmental education
reforms, 41

Environmental impacts assessment (EIA),
Ukraine
OVNS materials, 38
State Ecological Review, 38
vs. International system, 38–40

Environmental microbiology
  bacterial and fungal species, 207–208
  education and training
    priority scopes, 210–212
    sustainable development, 213
    theoretical lecturing techniques,
    212
  health relevant bacteria, 207
  Homo sapiens, 206
  life cycles, 207
  man-made environments, 208
  metabolic activities, 208–209
  microbial community, 205–206
  municipal wastes, 205
  organic substances, 208
  polyurethane foam, 210
  soil organisms, 209
  *Vibrio cholerae*, 210

Environmental policy. See Non-traditional education

Environmental risk assessment (ERA)
  ecological components, 200
  higher education
    assessment process, 200–201
    characterization, 202
    management, 202–203
    Ukraine, 200
  water-supply system, 201–202
  sustainable development, 198–200

Environmental security
definition, 133
ecological literacy, 157
food systems sustainability
  common academic core, 135–136
  dis-integration process, 134–135
  important paradigms, 138–139
  integrative knowledge ecology,
  139–140
  intrinsic values of diversity,
  140–141
  LFC core courses, 137–138
pedagogical value of diversity, 141–143
the teaching team, 139
human security, 16
science and water, 15–17
socio-ecological context, 156
Environmental security, higher education challenges and areas of common concern
areas of separation, 218
geographic constituents and pedagogical affiliations, 219–220
Sustainability in Applied International Learning, 219
collective and transnational education, 226
community stakeholders, 226
educational experiences
ecology of knowledge, 224
facts and figures, 223
knowledge application learning, 224
educators effort, 225
evaluation and enacting intersection of, 222
major techniques for teaching, 222–223
learning opportunities, 225
main goal of, 220–221
meaning of, 220
