A

Ammunition
Cos and Sin, 132
movement control with, 133
remove function, 134
shoot to rootScene, 134
unit circle, 133
enterframe creation, 132
instance variable, shoot class, 132
shoot class creation, 131

Arcade Shooter
game beef up, 140
background scroll (see Background scroll)
explosions (see Game explosions)
life guage (see Life Gauge)
versioning\building of, 127
Arc, moving enemies, 139
enemies (see Enemies)
enemyShoot class, 138
explore setup, 128
game explore, 128
groundwork, game (see Game Groundwork)
PlayerShoot Class, 134
Player's Ship (see Player's Ship)
shoot class (see Ammunition)
shoot ships, 135

B, C

Background scroll
Arcade shooter, 147
background class, 145
frame movement, 146
image preload, 145
instance creation, 146
position reset, 146
to rootScene, 146
shifting of, 145

D

Development of game
completed game, 106
execution (play), 105
programming, 105, 108
animated Whack-A-Mole, 111
animation, Pit class, 112
appearance of Droid, 110
Droid whack-implementation, 114
hit, score, 122
hole creation, 109
hole duplication, 118
instance creation, 119
limit, Droid appearances, 122–125
looped hit animation prevention, 116–118
Pit class, 109
play, repeat, complete, 120
preventing from Droid Whacking, 116
random appearance of Droid, 113
random lining, holes, 119–120
replicating, Droid hole, 118
ScoreLabel class, 121
speed adjustment, animation, 112
state machine, 116
update, Pit class, 110
upgrade Pit class, 113–114
version creation, 108
Whack-A-Mole, 110
Whacked state, 114–116
rule refinement, 106
rules designing, 105–106
theme, 105–106
Droid character, 107
frames, 108
sketching, 107

Sprite, instance creation, 145
variables and positioning, 146
3-D Games
benefits, 153
Whack-A-Droid game, 154
Camera3D, 157
creation steps, 154
Droid replication, 168
interactivity, 160
panning camera effect, 169
planes, 165
Plug-in References, 155
Scene3D and lights, 156
Sprite3D, 159
WebGL, 155

Enemies, 135
add to rootScene, 136
array creation, 137
basic class, 135
direction and movement (variable), 136
### Enemies (cont.)
- enemyShoot class, 138
- hits specification, 138
- shooting, 139
- in game, creation, 137
- movement of, 136
- moving in an Arc, 139
  - convert, theta to radians, 139
  - creation of Arc, 140
  - direction increment, 139
  - shooting game, 140
  - theta variable, 139
- PlayerShoot class, 137
  - remove function, 136–137
  - score update for game, 137
  - variable assigning, 136

### G, H, I

**Game design**, 103
- development process, 105
  - completed game, 106
  - execution (play), 105
  - game rules, 105–106
  - programming (see Development of game)
  - rule refinement, 106
  - themes, 105–106
- mini game development rules, 103
  - Epic game, 103
  - game creativity, 105
  - game, grasping of, 104
  - lack of time and resources, 104
  - original game, 104
  - programming absorbment, 104

**Game explosions**, 141
- blast class, 141
  - Blast image specification, 141
  - effect image, 141
  - enabled Arcade shooter, 144
  - event listener, 142
  - frame values, 142
  - image preloads, 141
  - playerShoot, 143
  - remove function, 142
  - remove rootScene, Blast, 143
  - rootScene, Blast, 142
  - specification (frame and duration), 142
  - variable assignment, 141

**Game Groundwork**
- of Arcade Shooter, 128
  - black background, 128
  - rootScene, score label, 129
  - score variable, 129

### J, K

**JavaScript**, 31
- array
  - devices, creation, 47
  - iteration, 47
  - methods of, 48
  - store numbered data, 47
- associative array, 48
- buy() function, 49
- comparisons manipulation, 39
- equivalent operators, 38
- Fortune telling game, 45
- logical operators, If statement, 39
- looping statements, 43
  - For loop, 44
    - interrupt with break, 44
    - iteration skip, 45
  - sequential numbers, 43
  - variable creation, 43
  - While loop, 43
- non numbered data, store, 48
- object creation, 40
  - assign to variables, 40
  - date objects, 40
  - main objects, 41
  - methods, date object, 41
  - prototypes, 42
  - string, 41
- prototypes, 50
  - accounting object, 51
  - function creation, 51
  - and properties, 51
- random number generation, 45
- reserved words in, 33
- Switch statement, 46
- time saving, functions, 49
- variables, 49
  - addition of, 34
  - arithmetic operators, 34
  - complex data types, 35
  - Compound assignment operators, 36
  - creation and assigning value, 50
  - data types, 35
  - declaring, 32
  - function creation, 50
  - incrementation, manipulation, 37
  - manipulating by referencing, 36
  - naming, 32
  - relational operators, 38
  - value assigning, 33
  - value of a sum, 34–35
  - villager function, 50
Life Gauge, 147
  in Arcade shooter, 150
  game end (No life), 148
  game.onload function, 147–148
  lifeLabel, 148
  lives variable, 147
  number of lives, 149
  reduction of life, 148
  rootScene, lifeLabel, 149

Mini-Game Development
  unbreakable rules, 103
  creativity of game, 105
  epic game, 103
  game, grasping of, 104
  lack of time and resources, 104
  original game, 104
