# Index

## A
- Accepting or rejecting policy, 75
- Active event list, 243
- Admissible control set, 14, 49, 62, 69, 81, 89, 97, 113
- Admission control, 75
- Age-dependent failure, 79
- Agent-based simulation, 265
- Aggregation, 265
- Alignment percentage, 255
- Ant colony optimization, 245
- Aperiodic, 168
- Approximate dynamic programming, 236, 265
- Artificial immune system, 225, 245
- Assembly network, 198
- Assembly operations, 95, 185, 229
- Assembly rate, 97, 242
- Assembly supply chain, 106, 185, 242, 245, 251
- Assembly systems, 237
- Assembly-to-order, 108, 199
- Asymptotes, 124, 205
- Asymptotic behaviors, 25, 47, 135, 187, 188, 194, 261
- Asymptotic convergence, 188
- Average backlog level, 174
- Average cost, 131, 149, 153, 174, 185, 216, 230, 242, 261
- Average cost optimality equation, 134, 153
- Average inventory level, 174

## B
- Backordering
  - decision, 62, 69, 149, 232
  - policy, 74, 151
- Base backlog, 74, 75
- Base backlog policy, 75
- Base-stock, 164, 190
- Base-stock Kanban control (BKC), 145, 146, 190, 195, 196, 229, 235, 251, 262
- Base-stock policy, 53, 54, 109, 125, 140, 146, 197, 198, 222
- Basic integrated supply chain, 4
- Basic supply chain, 4
- Benefits sharing, 31
- BKC. See Base-stock Kanban control (BKC)
- Boundary, 74
- Boundary conditions, 156, 169, 213
- Bullwhip effect, 1, 30
- Buyback contract, 30

## C
- Carbon footprint, 264
- Channel
  - alignment, 4
  - coordination, 28, 29
  - relationship, 3, 29
- Characteristic equation, 156, 169, 212
- Characteristic matrix polynomial, 214
- Closed form, 27
- Collaborative planning, forecasting and replenishment (CPFR), 29, 30
- Combinatorial optimization, 245, 251
- Completely backordered/backordering, 6, 64, 149
- Complexity, 5
- Computational complexity, 238, 256
- Computational performance, 228
- Consignment VMI, 29

Constant failure rate, 79
Continuous-review, 6, 32, 52
Continuous-time, 6
Continuous time Markov decision problem, 15
Contractual relationship, 264
Control-limit structure, 93
Control regions, 105, 190, 206
Control structure, 46, 151, 186
Convex, 217
CONWIP, 75, 199
CONWIP policy, 146
Cooling temperature, 248
Cooperative game approach, 31
Coordinated management, 4
CPFR. See Collaborative planning, forecasting and replenishment (CPFR)
Crossover, 245, 246
Curse of dimensionality, 236, 237
Customer satisfaction, 11

D
Data confidentiality, 32
Decision epoch, 14
Decomposition, 52, 53, 237, 265
Decreasing, 18
Demand arrivals, 14
Deterministic lead times, 51
Discounted cost, 14, 62, 82, 97, 113, 226, 261
Discount factor, 14
Discrete-event simulation, 241
Discrete part manufacturing systems, 76, 92
Discrete-state dynamic systems, 6
Discrete-state supply chains, 6
Discrete-time supply chain problem, 15
Disintermediary, 4
Disruptions, 79
Down-time, 80
Dynamic information, 262

E
Easy-to-operate, 261
Echelon base-stock, 145, 190
Echelon base-stock policy, 146, 204
Echelon stock policy, 52
Eigenvalues, 156, 212
Elite GA, 248, 251, 253, 256
Enumerative methods, 225
Ergodic, 211
Erlang distribution, 44, 48, 54
Event-driven simulation model, 244
Events, 14, 97, 113, 242
Evolutionary algorithms, 241
Evolutionary strategy, 225, 245
Explicit form, 74, 153, 216
Exponential distribution, 13

F
Failure-prone, 106, 107, 111, 146, 185, 192, 237
assembly machines, 192
machines, 51, 80
manufacturing supply chain, 67, 89, 115, 149, 167, 205, 232
supply chain, 153
Finished goods (FG), 4, 11
Finished goods warehouse, 12
Finite capacities, 12
Flow balance equations, 155, 168, 212
Fluid flow models, 75, 92, 126
Full factorial experiment, 177
Fully backlogged, 96, 112

G
Genetic algorithms (GA), 225, 245, 251
optimization procedure, 245
Global optimal, 225
Global optimization, 2, 11, 261
Greener supply chain, 264

H
Hedging point policy, 32, 92
Hedging surfaces, 92
Hybrid push/pull policy, 199

I
Increasing, 18
Independent identically distributed (i.i.d), 52, 53
Index rule, 126
Indicator function, 15, 39, 83
Induction, 18
Induction method, 64, 115
Infinite capacity, 14
Infinite horizon, 14, 62, 82, 97, 113, 226, 230
Infinitesimal generator, 133, 210
Infinite state Markov decision process, 16
Information flows, 1
sharing, 4, 28, 29, 262
Inner neighborhood search, 248
Integrated inventory management, 28
Integrated ordering and production policy, 12, 39
Integrated supply chain, 1
Inventory-on-hand, 53, 190
Inventory-rationing policies, 126
Irreducible, 133, 155, 168, 211
Iterative methods, 225

J
Just-in-time (JIT), 131

K
Kanban, 52, 109, 131, 146, 164, 188
Kanban policy, 197
Kanban threshold control (KTC), 188, 190, 195, 229, 235, 251, 262

L
Law of large numbers, 247
Lead-times, 37, 44
Linear switching threshold, 150, 205, 227
Linear switching threshold policy, 136
Lost-sale, 74
LST policy, 136, 150

M
Machine stoppage, 91
Machine utilization, 174, 217
Make-to-order (MTO), 32, 126, 219
Make-to-stock (MTS), 32, 126
Management coordination, 262
Manufacturer-retailer supply chain, 27
Mappings, 99
Marketing channel theory, 30
Markov chain, 134, 153, 168, 209, 262
Material flows, 1
Matrix analytic method, 131, 209, 262
Memoryless properties, 14, 97, 113
Meta-heuristic, 225, 244
methods, 241
search methods, 256
Monotone, 105
convergence principle, 25
curves, 124, 205
Monotonicity, 187, 194
Monotonic properties, 24, 47, 51
Monotonic switching curves, 87
Multi-echelon, 51
Multi-objective optimization, 265
Multiple classes, 125

O
One-echelon, 52
One-for-one, 54
One-for-one ordering, 33
OO-based elite GA procedure, 256
Operationability, 131
Operation-dependent, 79
Operation-dependent failure, 89
Optimal base-stock levels, 217
Optimal control and optimization, 261
Optimal integrated policy, 14, 62, 82, 97, 113
Optimal inventory replenishment policies, 32
Optimal threshold parameters, 167, 174, 232
Optimal value function, 71, 100, 117
Optimization, 225, 241
Order arrivals, 14
Order-crossing, 53
Order crossover, 55
Ordering capacity, 52, 56, 96, 112
Ordering decision, 61, 81, 84, 95, 114
Order progress information, 54
Order quantity, 242
Order-up-to-point, 40, 85, 139, 165, 188, 202
Order-up-to policies, 52
Ordinal optimization (OO), 253, 254
Outer loop search, 248
Outstanding orders, 12, 38, 53

P
Parameterized policies, 131
Parameter optimization, 227
Pareto improvement, 31
Particle swarm optimization, 245
Partnership, 12, 29
Performance measure, 242, 253
Periodic-review, 51, 198
Physical distribution, 1
Physical supply, 1
Poisson process, 12
Positive recurrent, 132, 153, 155, 168
Postponement, 95
Preventive maintenance, 79, 163, 233
Preventive maintenance policy, 92
Prioritized base-stock policy, 209
Priority rule, 125, 204, 222
Production and maintenance decisions, 84
Production and preventive maintenance, 87
Production capacity, 134
allocation, 111, 114, 202
cycling, 111, 117, 125
Production completions, 14
Production control, 14
Production control region, 40
Production decision, 11, 81, 95
Production rate, 12, 62
Production rate allocation, 111, 115, 116, 124, 125, 205
Production-rate-dependent failure, 79
Profit allotment, 31
Profit sharing, 31
Pull-type, 109, 199
Push/pull policy, 197

S
Sample process, 242
Scenario analysis, 256
Self-transition rate, 38, 41
Service level, 158, 177, 219
Setup costs, 108
Simulated annealing (SA), 225, 241, 244, 248, 251
optimization procedure, 248
Simulation, 241, 256
Simulation-based optimization methods, 241, 257, 262
Skip-free, 24, 135
Solution space, 253
Spectral expansion method, 212
Stability, 131, 149, 163, 201, 262
condition, 134, 209
index, 134
Standard stochastic dynamic programming, 16
State-feedback, 82
State space, 25, 38, 44, 49, 62, 69, 81, 89, 97, 106, 115
State transition map, 14, 38, 41, 44, 63, 69, 82, 98, 115, 168, 209
Static prioritized policy, 222
Stationary control policy, 15, 63, 69
Stationary distribution, 132, 153, 167, 168, 212, 216, 231
Steady-state performance measures, 155, 163, 174, 216, 237, 262
Stochastic lead times, 53
Stochastic production times, 11
Stochastic stability, 126
Stochastic stability-based solutions, 265
Stochastic supply chain systems, 4, 261
Stock-out probability, 158, 174, 216
Stock rationing, 125, 127
Storage capacity, 56
Structural characteristics, 27, 261
Structural properties, 18, 43, 47, 93, 100, 107, 117, 135, 188, 202
Submodular, 18, 50, 54
Sub-optimal threshold-type control, 261
Supply chain contracts, 31
Supply chain integration, 29
Supply chain management (SCM), 1, 261
Supply chain network design, 264
Swarm intelligences, 225
Switching curves, 23, 40, 43, 46, 66, 86, 122, 135, 204, 205, 261
Switching manifolds, 50, 104, 186, 193, 261
Switching planes, 190
Switching structure, 39–40, 51, 114, 116, 205
Switching surfaces, 114, 186, 193

Q
Quasi-birth-death (QBD), 132, 210

R
Random demands, 11, 51, 53
Raw material (RM), 4, 11
ordering, 11
supply, 2, 3
warehouse, 12
Recombination, 245
Region-switching structure, 87
Reinforcement learning, 236, 265
Reject customer demands, 74
Relationship management, 2, 264
Reliable assembly machines, 185
Replenishment lead-time, 13, 96, 112
Replications, 244, 247
Response surface methodology, 241
Retailer managed inventory, 30
Revenue-sharing, 31
Robustness, 234
Roulette wheel, 246
System stability, 185
System state space, 40

T
Tabu search, 225, 245
Termination criteria, 247, 250
Threshold control policy(ies), 32, 155, 164, 186, 191, 192, 202, 203, 225
Threshold parameter optimization algorithm, 228, 229, 232, 233
Threshold parameters, 74, 203, 225, 245
Threshold-type control policy(ies), 86, 263
Time-dependent, 69, 79, 86, 106
TLST policy, 144
Transition directions, 16, 50, 97
Transition probability functions, 15, 63, 70, 82, 98, 114
Transition set, 16, 50, 97
Truncated linear switching threshold policy, 142
Two outstanding orders, 40
Two parallel orders, 40

U
Uncertain replenishment lead-times, 11
Uncertainties, 2, 3, 61, 95, 111, 261

Uniformization technique, 15, 38, 41, 44, 63, 70, 98, 106, 114, 116
Uniform transition rate, 15, 38, 41, 44, 50, 63, 70, 82, 89, 98, 106, 114, 116, 226, 230
Unit vector, 16, 97, 113
Unreliable machine, 67
Up-time, 80

V
Value iteration algorithm, 17, 39, 46, 114, 136, 150, 159, 186, 191, 202, 226, 230
Value of information sharing, 28
Vendor consignment stock, 30
Vendor hub, 29
Vendor-managed inventory (VMI), 4, 29, 139, 263
with full refund, 29
Vertical integration, 3, 29

W
Wal-Mart, 30
Warehouse capacity, 56, 62, 134
Warehouses, 95
With respect to (wrt), 235
