Index

A
Agency theory, 106–107
American Psychosomatic Society (APS), 179
Animal language skills
counting skills, 408
emergent ability, 405
English sentences, 407
formal drill and training, 406
human speech, 406
insight learning, 405
joystick, 408
lexigrams, 404
linguistic interactions, 407
model-rival approach, 404
syntax and comprehension, 408–410
trial presentations, 407
Anthropology
biological anthropology, 70–71
cognitive anthropology, 72
computers, applications of, 86
culture
acculturation psychology, 73
behavior, 75
biological evolution, 73
clothing research, 72–73
cross-cultural transitions, 73
kinship, 74–75
re-enchantment, 75
tourism, 75–76
health
addiction, 77–78
consciousness, 79
cultural change and psychopathology, 77
depression, 77
expressed emotion paradigm, 79
homebirth, 76
psychiatry vs. psychoanalysis, 78
qualitative addiction research, 78
repeated drunkenness, 77
risk, 76
historical anthropology, 79–81
linguistics, 81–82
organizational anthropology, 82–83
psychology
constructionist theory, 84–85
gender and development paradigm, 84
group consciousness and group action,
84
symbiotic relationships, 83
religion, 85
Antipsychiatric movement, 329–330
APS. See American Psychosomatic Society
(APS)
Artificial Intelligence, 344–345
A Study of Thinking, 34

B
Behavioral economics, 105–106
Biobehavioral family model (BBFM)
biobehavioral reactivity, 183
family emotional climate, 182–183
parent-child relational security, 182
structural equation model, 184
validation of, 183
Biological constructivism, 239–240
Biopsychosocial (BPS) model
biomedical model, 170–171
classical scientific paradigm, 170
clinical model/approach, 176–177
folk models, 170
general systems theory, 171
Biopsychosocial (BPS) model (cont.)
meta-theory
biobehavioral family model, 181–184
deductive approach, 178
FSGI model, 180
interactive biobehavioral model, 179–180
psychosomatic inquiry, 179
synthetic, 178
paradigm, 175
paradigm shift, 176
scientific model
continuum of natural systems, 172, 174
critics, 172–175
hierarchy of natural systems, 172–173
psychiatry, 173–175
theory, 178

C
CAI. See Computer-Assisted Instruction (CAI)
Causality
animal intelligence and brain complexity, 411
causal chaining and communication amalgams, 418
cooperative hunting, 416
coordinated social behaviors, 417
neuroanatomical changes, 417
salience theory, 418
symbols, 417
early environment
complex learning skills, 412
play behaviors, 412
primate taxa, 411
television, 412–413
ideal and real causality detectors animals, 402–403
simple and emergent abilities, 403–404
intelligence, correlates of, 414–415
observational learning and animal language skills
counting skills, 408
emergent ability, 405
English sentences, 407
formal drill and training, 406
human speech, 406
insight learning, 405
joystick, 408
lexigrams, 404
linguistic interactions, 407
model-rival approach, 404
syntax and comprehension, 408–410
trial presentations, 407
theory construction
causal relationships, 397
ecological situation, 400
launching effect, 398
linguistic interactions, 399
psychological experimentation, 398
superstitious attributions, 400
voluntary movement, 399
video-formatted tasks, 413–414
CCP. See Conceptual constructivist paradigm (CCP)
CIP. See Consistent and interconnected paradigm (CIP)
Cognitivism
and empiricism, 282
Gestalt and James, 282–283
information-processing theory and expertise, 283–284
paradigmatic implications
external markers, 285
model construction, 286
model testing, 286
task analysis, 285
task development, 285
psychological orientation, 281
sensory experience, 281
Communal economics
gift-giving, 107
Lindenberg’s framing theory, 108–109
RCT model, 108–109
trust game paradigm, 108
Community economics, 106
Computer-Assisted Instruction (CAI), 349
Conceptual constructivist paradigm (CCP)
computer-mediated curriculum theory, 133
DARA model, 132
music education, 134
portfolio creation models, 135
synchronous audiographic conferencing, 133
TDT, 127, 133–134
Consistent and interconnected paradigm (CIP), 130–131
Constructivism
biological perspective autopoietic system, 240
cognitive system, 239
eigenbehavior, 239
sensorimotor coordination, 240
convergent thinking, 235
dualistic approaches
cognitive system, 241
constructed and mind-independent reality, 240
information-processing paradigm, 241
network science, 242
reality construction, 241
theory-ladenness, 242
Kantian idealism, 236
mental sets, 235
non-dualistic approaches
cognitive operators, 243–244
radical constructivism, 244–246
phenomenological perspective, 237–238
Consumer economics, 109–110
Copenhagen Interpretation model, 307–308
Culture
anthropology
acculturation psychology, 73
biological evolution, 73
clothing research, 72–73
cross-cultural transitions, 73
kinship, 74–75
re-enchantment, 75
tourism, 75–76
economics
knowledge economy, 111
organization theory, 110–111
preference and choice, 111
technological paradigms, 110
TEC paradigm, 110
psychology
cross-cultural forms, 430
human characteristics, 427
ingroup-outgroup distinctions, 431
multiculturalism, 428
perceived entitativity, 429
prejudice, 428
racial attitudes, 430
secondary emotions, 427
social and ethnic groups, 429

D
Dominant social paradigm (DSP), 115
Dynamic Assessment and Remediation Approach (DARA), 132–133
Dynamic perceptual outcome (DPO), 310

E
Economics
agency theory, 106–107
behavioral economics, 105–106
communal economics
gift-giving, 107
Lindenberg’s framing theory, 108–109
RCT model, 108–109
trust game paradigm, 108

community economics, 106
consumer economics, 109–110
cultural economics
knowledge economy, 111
organization theory, 110–111
preference and choice, 111
technological paradigms, 110
TEC paradigm, 110
health economics, 111–113
marketing economics
human capital theory, 114
individualization thesis, 114
industrial organization economics,
114–115
marketing mix paradigm, 113–114
structure-conduct-performance paradigm, 114–115
neuroeconomics, 116–117
organizational economics
communitarian self, 119
environmental attitudes, 117
family, 118
innovation, 118
intercultural transferability, 117
relationships, 118–119
psychology, 119–120
social economics
DSP, 115
quality of life and environment, 115–116
rational choice theory, 115
rationalism and sustainability, 116
superstitious beliefs, 115
socio-economics and behavior analysis,
120–121
Education
behaviorist theories, 139
cognitive approach theory, 141
conceptual constructivist paradigm
computer-mediated curriculum theory,
133
DARA model, 132–133
music education, 134
portfolio creation models, 135
synchronous audiographic conferencing, 133
TDT, 127, 133–134
consistent and interconnected paradigm,
130–131
content-based theory
existentialism, 140
idealism, 140–141
perennialism, 139
postmodern techniques, 141
realism, 140
Education (cont.)
cultural womb model, 143
Dewey’s theory, 137
factory model, 142–143
instructional design model, 142
learning standards paradigm, 129–130
operant conditioning, 141
paradigms, hierarchy of, 143–144
program theory, 127
realist/essentialist model, 126
societal needs theories, 138–139
student-relevancy theory, 137–138
theories-in-use, 136

Elementary Pragmatic Model (EPM)
functions
adaptation and plausibility, 358
dictatorship, 359
doubt, 359
mental pathway, 359
paradox table, 352
table of interactions, 356–357
Emergent interactionism
causal determinism, 378
conscious experiences, 378
identity, 391
lawful interactionism paradigm, 381–382
mind-society paradigm, 385–387
personologism paradigm, 380–381
radical interactionism paradigm, 390–391
reductionism, 379
relational psychodynamic paradigm, 382–384
research studies, 392
situationism paradigm, 381
structural symbolic interactionism paradigm, 388–390
symbolic interactionism paradigm, 387–388

Empiricism
cognitivism, 282
eyear empiricists, 277–278
educational research and scientific inquiry, 276–277
knowledge, 276
modern empiricism, 278–279
paradigmatic implications
hypothesis generation, 280–281
observation, 280
theory building, 281
verification/falsification, 281

Essentialism
cognitive psychology
communication, 425
dictionary theory, 424
implicit person theory research, 424
incremental theory, 424
internalism and hybrid theory, 423
social marginality and cultural narratives, 423
cultural psychology
cross-cultural forms, 430
human characteristics, 427
ingroup-outgroup distinctions, 431
multiculturalism, 428
perceived entitativity, 429
prejudice, 429
racial attitudes, 430
secondary emotions, 427
social and ethnic groups, 429
developmental psychology, 425–426
psychological theory, 421
RCT, model of, 431
semantic externalism, 422
social psychology, 426–427

Existentialism
antipsychiatry movement, 329–330
cultural climate, 318–320
objectivity, 333
philosophical paradigm, 320–322
psychological paradigm
authentic existence, 322
consciousness, 326
descriptive techniques, 325
discourse, 326
existential subject, 322
human-science paradigm, 328
intentionality, 327
intersubjectivity, 323
life-world, 327
natural-science approach, 328
personality assessment, 328
phenomenology, 324–325
reflective thought process, 327
transcendental attitude, 327
psychotherapy
client-centered therapy, 331
daseinanalysis, 330–331
experiential psychotherapy, 331–332
Gestalt therapy, 331
humanistic psychotherapy, 332
phenomenological therapy, 332
rationality, 333
systematic-critical investigation, 334
Family system genetic illness (FSGI), 180

Health

anthropology
  addiction, 77–78
  consciousness, 79
  cultural change and psychopathology, 77
  depression, 77
  expressed emotion paradigm, 79
  homebirth, 76
  psychiatry vs. psychoanalysis, 78
  qualitative addiction research, 78
  repeated drunkenness, 77
  risk, 76

economics, 111–113

HFW. See Humanistic Free Will (HFW)

Human capital theory, 114

Humanism and behaviorism
  authentic causality, 310
  authenticity, 298
  behavioral manipulation, 300
  brain process, 311
  Bugental’s model, 302
  cause-and-effect factors, 312
  conflict resolution, 303–304
  conscious awareness, 299
  consensus-acquisition rules, 305
  determinism vs. free will, 305
  DPO, 310
  emotional interaction, 303
  emotive empathy vs. cognitive contingencies, 311
  encounter culture, 302
  existentialism, 301
  HFW, 310
  human activity, 298
  intellectual enterprise, 309
