ontogeny, 179
Single photon absorptiometry (SPA), 107
Small familial study, 2D:4D, 150–151
SNPRC. See Southwest National Primate Research Center
Social dynamics. See Behavior and social dynamics, rhesus macaques
Social group differentiation, rhesus macaques
cranial metric and non-metric traits, 122
genetic structure and distances, 123–124
sample size and population size, 122, 123
similarity, 124
Social rank, 135, 146
Socioecological model, 230
Southwest National Primate Research Center (SNPRC), Papio sp.
adult cranial capacities, 46
analyses, CT scans, 45–46
baboons (see Baboons)
calculation, heritability, 46
calottes removal, 44
craniofacial landmarks, 44, 45
linear craniofacial measurements, 44, 45
over-estimation, brain space, 46
pedigreed colony, 43–44
SNPRC baboon skulls, 44
SPA. See Single photon absorptiometry
SSFS. See Sabana Seca Field Station
Stages, division and fusion
stage 1
agonistic interaction, 278, 279
females, 275
grooming and agonistic network, 276, 277
natal males, 278–279
non-natal males, 275–276
stage 2
description, 279
grooming and agonistic network, 279–281
stage 3
description, J and N, 281, 283
rhesus and agonistic network, 281–283
stage 4
description, 283
grooming and agonistic network, 283–285
stage 5
description, 285
grooming and agonistic network, 285–287
group J and N males, agonistic interactions, 285, 287
group J females, agonistic interactions, 285, 287
stage 6
description, 288
grooming and agonistic network, 288, 289
Survival analysis, Kaplan–Meier, 180, 182–183
T
Time constraints model
Dunbar, 228
females, 241
rhesus monkey
kin bias intensity, 231
networks, 230
potential partners, 236–237
time spent, 236
group size and numbers, 240
kin bias
close kin numbers, 237, 238
dominance status, 237–238
potential partners, 237
WGC and BGC, 229–230
Trabecular bone
architectural features, 89
microstructure, 88
progression, 101
Trabecular bone (cont.)
role, 99
three-dimensional core, 89
volume and connectivity, 106

V
Variance
components, 42
phenotype, 39
Vertebrae
lumbar, 99, 106–107

micro-CT measurements, 89
wedge fractures, 96–97

W
WGC. See Within-group contest competition
Within-group contest competition (WGC)
BGC, 229
description, 230
levels, 229
