Ab-initio potential surfaces, 48
Ab-initio potential techniques, 41
Above threshold dissociation (ATD), 19
Above threshold ionization (ATI), 19, 34
Absorption
cross section, 80
excited state (ESA), 65
potential, 224
two-photon (TPA), 65
Acetonitrile, 40
Adaptive re-meshing, 92
Aerosols, 253, 254
Alignment
information of, 10
Anthropogenic emissions, 253
Approximation
Bethe, 159
Born, 167, 168, 231
distorted wave Born, 167
one photon exchange 186
Astrophysical object, 153, 154
Asymmetry
longitudinal spin, 189, 190
transverse spin, 190
Asymptotic region, 81
Asymmetric stretch mode, 61
Atmospheric gases, 254
Atomic photoabsorption, 205
Atomic spectroscopy
of fusion plasmas, 279
Autocorrelation function, 80
Autodetaching states
of H, 239
of positronium, 237
Autodetachment, 217
Autoionization, 10
Beam-foil spectroscopy, 281
Becke’s hybrid exchange expression
(B3LYP), 232
Bloch wave function, 261
Born Approximation, 231
Born-Oppenheimer Simulation, 22, 23
Born scattering amplitude, 240
Branching fraction, 82
Broad band radiation, 275
Bohemiandynamics, 109
Channeling, 259-261
Channeling radiation, 259, 262
Channelons, 259
Chirped pulse, 63, 74
Circular polarization, 199
Cis-trans isomerization, 55
Close coupling
approximation (CCA), 239-246
expansion, 154, 157, 158
Coherence, 66
Coherent control, 74
Co-incidence techniques, 191-197
Collision processes
electron, 143, 154
Collision processes (cont.)
  electron-atom, 154
  experiments, 163
Collision radiative (CR) models, 265-272
Collision strength, 144, 159
Configuration interaction (CI)
  calculations, 155
  expansion, 155
Cooling
  molasses, 10
  Zeeman, 10
Cooper minimum, 206
Continuum, 58
Continuous wave laser, 61
Continuity equation, 87
Core-penetrating Rydberg states, 55
Core-non-penetrating Rydberg states, 55
Correlation
  core-valence, 248
  corrections, 154
  effects, 155
  intra-valence, 248
Correlation time, 66
COSMIC (Country Specific model for
  inter-temporal climate), 254-257
Coulomb
  blockade of electrons, 1
Coupled-cluster singles and doubles
  (CCSD), 230
Coupling matrix, 108
Coupling mechanisms
  direct, 51
  doorway-mediated, 51
Cross-sections
  absolute differential cross-section, 197
  CCA cross-section, 241
  collision, 144, 159
  differential, 158, 174, 179
  double (DDCS) and triple (TDCS)
    differential, 191
  elastic cross-section, 232, 234
  electron impact induced emission, 144
  emission, 144, 148
  excitation, 144, 157, 158
  ionization 164, 171
  multi-coincident, 185
  photoabsorption, 206
  photoionization, 153
  s-, p-, & d-wave cross section
    239, 241
Cross-sections (cont.)
  total cross-section, 173, 241
Curve crossing
  Landau-Zener (LZ) type, 72
  nonadiabatic tunneling (NT) type, 72
DZP basis, 232
D-state excitation, 197
Decoherence, 91
Degenerate four-wave mixing incoherent
  light (DFWN-IL), 66
Density functional theory (DFT),
  230-234
Density matrix evolution, 92
Dephasing, 62
Dielectric recombination rate coefficient,
  266, 272
Dipole approximation, 205
Dipole interaction, 215
Dipole moment operator, 59
Dirac delta function, 80
Dirac-Frenkel variational principle, 109
Discrete variable representation (DVR),
  107
Dissipative systems, 86
Dissociative attachment, 217
Dissociative ionization, 218
Dissociative rate, 27
Dissociative trajectories, 29
Divergence, 87
Doppler broadening, 282
Doppler temperature, 5
Double well potential, 86
Downhill ramp potential, 90
Dry etching process, 219
Eckart barrier, 89, 112
Eigenvectors, 62
Elastic electron scattering, 232-233
Electron-attachment, 217, 219
Electron channeling, 261
Electron channeling radiation, 260
Electron collisions, 265
Electron correlation, 229-234, 192
Electron-cyclotron heating (ECH), 269
Electron cyclotron resonance ion source
  (ECRIS), 163
Electron-electron correlation effect, 191
Electron hydrides, 232, 233
Electron molecule collisions, 217
Electron–positronium continuum, 237
Electron–positronium scattering, 237
Electron proton dynamics, 23
Electron scattering, 229, 219
Electron scattering intensity, 229
Electron transition processes, 191
Emission line intensity, 268
Entanglement, 2
Equilibrium thermodynamic, 153
Evolution operator, 82
Excitation
  coherent, 57
  dissociative, 154
  electron-impact, 154, 158
  energies, 155
  incoherent, 57
  mechanism, 154
  multiphoton, 57, 58
  two-photon, 249
Fermi Golden rule, 260
Fermi wave vector, 225
Feshbach resonance, 242-244
  Doppler temperature, 5
  entanglement, 2
Figure of merit (F), 67
Fixed width approach, 110
Floquet matrix, 60
Floquet method, 58, 59
Floquet theorem, 59
Fluorescence
  infrared laser induced (IR LIF), 50
  single atom, 1
  single molecule, 1
  ultraviolet laser induced (UV-LIF), 50
Fock states, 1, 2
Fourier expansion techniques, 110
Fractal geometry, 26
Fractal singularities, 25
Fragmentation
  cross-section, 164
  total, 173
Full-width at half maximum (FWHM), 43
Fusion plasmas
  magnetically confined, 279
  inertial confinement, 275
Fusion plasma devices, 217
Gaussian form, 82
Gaussian probe pulse, 42
Global warming, 253
Green-house gases, 253
Halocarbons, 253
Hamiltonian, 58
Harmonic oscillator, 108
Hartee Fock (HF), 230-233
Heat bath, 110
Heaviside function, 225
Heliostatic, 254
Helium
  correlated wave function, 192
  Hermite polynomials, 108, 110
  Higher harmonic generation (HHG), 34, 275
  High power lasers, 274
  HITRAN data base, 254
Hydrodynamic
  equations, 85
  fields, 86
  formulation, 85
Hydrogen spectra, 271
Inertial confinement fusion, 275
Independent particle approximation, 205
Initial value representation (IVR), 76
Intensities
  elastic-inelastic, 231
Interaction
  magnetic, 186
  transverse, 186
Interstellar medium (ISM), 143
Interplanetary spacecraft, 144
Intramolecular
  dynamical studies, 49
  vibrational energy, 49
Ionization
  amplitude, 168
  double ionization, 179, 192
  electron impact, 167, 171, 177
  mechanism, 165
  multiple, 165
  process, 165
  simultaneous ionization & excitation
    (SIE), 192
  simultaneous transfer ionization (TI), 192
  single, 173
  triple ionization, 192
Ionization rate coefficient, 265, 268
