About the Authors

Kweku-Muata Osei-Bryson is Professor of Information Systems at Virginia Commonwealth University in Richmond, VA, where he also served as the Coordinator of the IS Ph.D. program during 2001–2003. Previously he was Professor of Information Systems & Decision Sciences at Howard University in Washington, DC. He has also worked as an Information Systems practitioner in industry and government. He holds a Ph.D. in Applied Mathematics (Management Science & Information Systems) from the University of Maryland at College Park.

Gunjan Mansingh is a Lecturer and Undergraduate coordinator in the Department of Computing at the University of the West Indies (U.W.I.), Mona, Jamaica. She obtained a Ph.D. in Information Systems and an M.Phil. in Computer Science from U.W.I. and a B.Sc, from Bombay University, India. She worked for a few years in the IT industry in Jamaica before moving to academia.

Her research interests are Data Mining, Decision Support Systems, Knowledge Management and Knowledge Management Systems, Expert Systems, and Technology Adoption. In her research she has worked in different domains in
Jamaica such as healthcare, crime, agriculture, and e-commerce. In her research her focus has been on harnessing data, information, and knowledge in the various sources to assist in the decision making process. She has publications in refereed journals such as *Decision Support Systems*, *Information Systems Frontier*, *Knowledge Management Research and Practice*, *Information Sciences*, *Expert Systems with Applications*, and *British Journal of Sports Medicine*. She also has papers published in the proceedings of IEEE Communications Conference Jamcon, e-business workshop, SIG GlobDev workshops, SIGDSS workshops, IRMA, Conf-IRM, AMCIS, and IASTED. She teaches various courses at the undergraduate and the graduate level in Computer Science and Information Systems.

**Lila Rao** is the Deputy Executive Director (Acting) and a Lecturer in Information Systems at the Mona School of Business and Management, The University of the West Indies. She holds a Ph.D. in Information Systems from The University of the West Indies and an M.Sc. in Computer Science from the University of Waterloo, Canada.

She currently does research in various areas including Data Warehousing and Mining, Data, Information, and Knowledge Quality, Decision Support Systems, and Technology Adoption. She has a strong interest in addressing some of the issues related to improving the quality of information systems (e.g., data and information and design quality). She has published in a number of international journals including *Decision Support Systems*, *Knowledge Management Research and Practice*, *Data and Knowledge Engineering*, *International Journal of Information Systems for Crisis Response Management*, *Expert Systems with Applications*, and *Information Systems Frontiers* journal. She also has papers published in the proceedings of FLAIRS Research Symposium, e-business workshop, IRMA, AMCIS, and ICEIS.

**Ricardo Anderson** is an Assistant Lecturer in the Department of Computing at the University of the West Indies (U.W.I. Mona-WJC). His research interests include Knowledge Management Systems, Knowledge Discovery in Database, and Data Mining. Ricardo holds a Bachelor’s degree in Computer Science and a Master’s in Computer-based Management Information Systems both from the U.W.I. He has a paper in the proceedings of SIGDSS conference.

**Francis Kofi Andoh-Baidoo** is Assistant Professor, Department of Information Systems & Quantitative Methods, College of Business Administration, University of Texas—Pan American, USA. He obtained his Ph.D. in Information Systems from Virginia Commonwealth University, Richmond. He has an M.B.A. and an M.S. in Information Technology Management from University of North Carolina, Greensboro, and Bachelor of Science in Materials Engineering (Honors) from the Kwame Nkrumah University of Science & Technology, Kumasi, Ghana. His research areas include Data Mining, Knowledge Management, IS Security, e-Commerce, IT for Development, Database Management, Decision Support Systems, and ICT use in developing nations. He has published in journals such as *Expert Systems with Applications*, *Information Systems Frontiers*, *IEEE Security & Privacy*, *Journal of Information Technology Theory and Application*, *Information
**Rajendra K. Bandi** is an Associate Professor (Information Systems) at the Indian Institute of Management Bangalore, India. He received his Ph.D. in Business Administration (computer information systems) from the Robinson College of Business, Georgia State University, Atlanta, USA. His research interests are in technology adoption, enterprise systems implementation, knowledge management, social impacts of computing, and software engineering. He has guided multi-country research on ICT-enabled relocation of work, coordinating researchers from several Asian and European countries. He has published several research papers in international journals and presented papers at many international conferences.

**Sue Conger, Ph.D.**, is on the faculty of University of Dallas as Director, Information & Technology Management program. She publishes extensively, speaks at conferences globally, and is a Visiting Professor at Rhodes University in South Africa, which is the source of her interest in the Living Labs programs. Dr. Conger is active in academic and industry associations. She is on five editorial boards and the program and planning committees for several conferences. Her research interests are IT service management, IT-related privacy, emerging technologies, and innovative uses of IT. She authored *The New Software Engineering* (1994) and *Planning & Designing Effective Web Sites* (1997), and *Process Mapping & Management* (2011). She is presently at work on a book on IT Service Management.

**Oktri Mohammad Firdaus** is a lecturer in Industrial Engineering Department at Widyatama University, Bandung, Indonesia. He earned his Master of Engineering in Industrial Engineering from Bandung Institute of Technology, Indonesia. Currently he is a Ph.D. candidate in Industrial Engineering & Management, Bandung Institute of Technology, Indonesia, with focus on Medical Knowledge Management.

**Rajesri Govindaraju** is an Associate Professor at the Faculty of Industrial Technology, Bandung Institute of Technology, Indonesia. She completed her bachelor in informatics from Bandung Institute of Technology, Indonesia, and Ph.D. in Enterprise Information Systems Implementation from University of Twente, The Netherlands. Her current research areas include information systems implementation, ERP systems, e-business systems adoption and implementation, and Knowledge Management Systems. She currently serves as the Chairman of the Industrial Systems and Techno Economic Research Group, Bandung Institute of Technology. Her email address is rajesri_g@mail.ti.itb.ac.id.

**Virgilio Lopez-Morales** obtained his Ph.D. in Engineering Sciences from the Ecole Centrale de Nantes, France. Currently he is a full time researcher at Universidad Autonoma del Estado de Hidalgo, Mexico. His research interests include decision
support systems in modeling and control, intelligent distributed systems, and multi-agent systems. He has published more than 35 papers in journals and conferences in these areas.

Patricia Nalwoga Lutu is a Senior Lecturer in the Computer Science department at the University of Pretoria in South Africa. She obtained the Ph.D. in Computer Science from the University of Pretoria in 2010. She obtained the M.Sc. Computer Science in 1981 and B.Sc. Computer Science in 1979 both from the University of Manchester in the United Kingdom. Since 1981 she has lectured in Computer Science and in Informatics at various universities in Nigeria, Lesotho, and South Africa. She has lectured in database systems for more than 20 years. Her current research interests include machine learning, data mining, decision support systems, and business intelligence.

Niall McNulty is a digital media consultant at the forefront of using new technologies to record and share African content, in particular local knowledge, histories, and cultural practices. Amongst other community-oriented projects, working with the eThekwini Municipality in Durban, he launched and manages the Ulwazi Programme (www.ulwazi.org), an initiative that uses social technologies like blogs, wikis, and mobile phones, the public library infrastructure, and community participation to collect and disseminate indigenous knowledge and local history. In 2011, with the support of the Goethe Institute, Niall extended this program to township schools surrounding Durban where Grade 10 students were taught digital literacy, oral research skills, and digital media production. This has made an enormous contribution to the collection of local histories and culture, and to the amount of Zulu language content available on the Internet. In 2012, in recognition of his work, he travelled to Kenya as an invited expert, presenting at the Standing Conference of Eastern, Central and Southern Africa Library and Information Associations (SCECSAL). As an added accolade, on behalf of the Ulwazi Programme, he collected the runner-up award at the 2012 Telkom Highway Africa New Media Awards, in the “Community Engagement Through Technology” category. Niall’s work offers outstanding examples of how social technologies intersect with local culture, history, and language and shows one way libraries can remain relevant in the digital age. These technologies can be used as a democratizing tool allowing everyday people to record and access information about their area or community, in their own language.

Vikas Mehra is an IS researcher and a business consultant. He obtained his doctoral degree in Information Systems from the Indian Institute of Management Bangalore. His areas of research are information systems, knowledge management, technology acceptance, and organizational strategy. His areas of consulting are decision sciences, knowledge management, information systems management, and leadership development. He has presented and published his research in various international conferences. He has also prepared multiple cases for research and class discussion. He is a reviewer for international academic journals and conferences. He has more than 12 years of experience as a practitioner in the manufacturing, automotive, financial services, analytics, and learning and development domains.
Babajide Osatuyi is an Assistant Professor of Computer Information Systems & Quantitative Methods at the University of Texas—Pan American. His research interests include decision support systems for emergency management, knowledge management, social network analysis, and information and communication technologies for development. He serves as reviewer for Information Systems Journals and Conferences. His research has appeared in journals such as *Computers in Human Behavior*, *Information Processing and Management*, *International Journal of Innovation and Learning*, *International Journal of Data Engineering*, *International Journal of Knowledge, Culture and Change in Organizations*, *Journal of Information Technology Theory and Application*, and *Electronic Journal of Information Systems for Developing Countries.*

Yacine Ouzrout is a Computer Scientist in the Supply Chain & Product Lifecycle Management group of the DISP Laboratory at the University Lumiere Lyon2 (ULL). He obtained his Ph.D. in Computer Engineering from the National Institute of Technology of Lyon (INSA), and his HDR (Habilitation Thesis) in 2012 from the University Lyon2. Currently, he is an Associate Professor at ULL. He is the Director of the Institute of Technology of his university. His research interests include multi-agent systems, simulation, decision support systems, and distributed information systems. Dr. Ouzrout has been involved in several European projects including Asia-Link East–west project, Erasmus Mundus eLink, and Sustainable eTourism and is currently the ULL coordinator of the Erasmus Mundus eLink project. He is co-chair and member of program committees of International conferences (PLM, SKIMA, AICIT, ICTIS, etc.), member of Scientific Commissions (DISP Laboratory, Computer Science Commission ULL, etc.), and reviewer for several international journals and conferences.

Han Reichgelt is the Dean of the School of Computing and Software Engineering, Southern Polytechnic State University, Georgia, USA. Prior to that, he held appointments at Georgia Southern University in Statesboro, Georgia; the University of the West Indies, Mona Campus, Jamaica; the University of Nottingham, England; and the University of Edinburgh, Scotland. He received his Ph.D. in Cognitive Science from the University of Edinburgh in Scotland and his B.Sc. and M.Sc. from the University of Nijmegen in The Netherlands. His research interests include IT Service Delivery Quality, Computing Education, and Health Information Technology. Han is the (co-)author of over 100 journal and refereed conference papers, as well as a textbook on Knowledge Representation in Artificial Intelligence. He also co-edited books on Expert Systems Development and on Information Systems Delivery Quality. His research interests include IT and economic development, IT application delivery quality, Health Information Technology, and computing education. Han currently serves on the Advisory Committee for the Georgia Regional Extension Center at Morehouse School of Medicine, and is a commissioner for the ABET Computing Accreditation Commission.

Koen Rossel-Cambier is a Belgian development economist who, over the last 20 years, has worked on overseas long-term assignments in amongst others Senegal,
Italy, Morocco, and Barbados with international organizations such as the ILO, the
World Bank, UNICEF, and the European Union. Dr. Rossel-Cambier has managed
projects and undertook technical assistance missions in more than 40 developing
countries, in particular in Africa and in Latin America and the Caribbean. He has
authored numerous articles in peer-reviewed journals, working papers, and text-
books tackling a wide range of applied economic challenges taking into account
social development dimensions. Koen Rossel-Cambier was academic assistant with
an M.B.A. program for the HUB in Brussels in the beginning of his career and is
now also senior Associated Researcher with the universities of Mons (UMONS)
and Brussels (ULB), Belgium. He holds a Doctoral Degree (Ph.D.) in Applied
Economic Sciences (UMONS) for his innovative research on combined microfi-
nance schemes. He also completed Master’s Degrees in respectively Applied
Economic Sciences (KUL), International Trade (HUB), and International Relations
(KUL-Université Fribourg).

T.M.A. Ari Samadhi is an Associate Professor and Head of Department of
Industrial Engineering, Bandung Institute of Technology, Indonesia. He earned his
doctorate from The University of New South Wales, Australia. He joined the
Manufacturing Systems Research Group.

Kadarsah Suryadi is a lecturer in Department of Industrial Engineering, Bandung
Institute of Technology, Indonesia, and is also a Professor of Decision Support Systems.
He earned his doctorate from Universitae d’Aix Marseille III, France. He joined the
Industrial Management Research Group. He currently serves as the Vice Rector for
Academic and Student Affairs, Bandung Institute of Technology, Indonesia.
