Index

A
AAST. See American Association for the Surgery of Trauma (AAST)
AAST-OIS grade IV and V. See American Association for the Surgery of Trauma Organ Injury Scale (AAST-OIS)
Abbreviated Injury Score (AIS), 9
ABC. See Argon beam coagulator (ABC)
Abdominal compartment syndrome, 89, 109–111
development of, 84
incidence of, 113
Abdominal trauma, 36, 95, 117, 118
ABThera™, 98
Adjunctive techniques, 63
Advanced Surgical Skills Exposures for Trauma (ASSET) course, 144
Advanced Trauma Operative Management (ATOM) course, 144
AIS. See Abbreviated Injury Score (AIS)
American Association for the Surgery of Trauma (AAST), 85
liver injury scale, 47–48, 59, 117, 118
American Association for the Surgery of Trauma Organ Injury Scale (AAST-OIS) grade IV and V, 41, 42, 54
Anatomic hepatectomy, 22
Anatomic liver resection, 22–23
Aortic compressor, 30
Aortic occlusion, 29–30
balloon placement for, 33
clamp, 31
Argon beam coagulator (ABC), 39, 42, 50–52, 70, 89
Argon beam plasma coagulation, 59
Army-Navy retractors, 47
Arterial anatomy, hepatic, 3–5
Arteriography, hepatic, 27, 113
ASSET course. See Advanced Surgical Skills Exposures for Trauma (ASSET) course
ATOM course. See Advanced Trauma Operative Management (ATOM) course

B
Balfour retractor, 43
Balloon occlusion technique, endovascular, 123
Balloon tamponade, 103–105
Bile duct drainage, extrahepatic, 27
Biliary duct ligation, 121
Biliary fistula, morbidity of, 139
Biliary tract anatomy, 5
Bleeding, 64–65
hepatic vein, 148
massive liver, 38–40
upper gastrointestinal, 65
Bloody vicious cycle, 57
“Blowout” hypothesis, 132
Blumgart technique, 137
Blunt rupture, pathophysiology of, 132
Blunt trauma, 132
Bookwalter retractor, 43
Braille technique, 14, 15

C
Cadaver course, 144–145
Cadaver dissection, 158
Caval preservation technique, 126
CBD. See Common bile duct (CBD)
Celiotomy, 87
Cerebellar malleable retractors, 50
Cholangiography, 133
endoscopic retrograde, 132
intraoperative, 129
postoperative, 129
 Clamp-crushing technique, 73
Closed suction drainage, 63
Coagulopathy, intraoperative, 108
Common bile duct (CBD), 53, 71, 134
laceration of, 135
transsection of, 135–136
Common hepatic duct, transsection of, 135–136
Cystic duct, avulsion of, 135

D
Damage control, 23–25
laparotomy, 108
hepatic trauma grading, 117–118
surgical approach, 118–123
Damage control resuscitation (DCR), 108, 119
Dearterialization
hepatic, 22
and liver packing, 25
Debridement
nonanatomic resection and, 51–52
resectional, 20–22
Definitive Surgical Skills Course (DSTC), 144
Ductal injuries, 133
missed, 65
operative repair of, 133–134
Ductal tissue
formal reconstruction of, 137–138
role of stents with, 138–139
segmental loss of, 137–139

E
Elective liver resection, principles for, 73
Electrocautery, 44, 47, 49, 59
Emergency room, management in, 35–36
Emergency War Surgery (EWS) course, 144
Endoscopic retrograde cholangiography, 132
Endovascular balloon occlusion technique, 123
EWS course. See Emergency War Surgery (EWS)
course
Extensive defect, in wall, 136
Extrahepatic biliary ducts, 92–93, 131–132
drainage, 27
management of complications, 139–140

F
FAST. See Focused abdominal sonography for
trauma (FAST); Focused assessment
of sonography in trauma (FAST)
Finger fracture technique, 61–63, 87
Finochietto retractor, 46, 47
Fixed table retractor, 73
Focused abdominal sonography for trauma
(FAST), 85
Focused assessment of sonography in trauma
(FAST), 35–36
Formal lobectomy, parenchyma
anatomy, 67–69
approach to liver, 69–70
instruments and techniques, 70–71
operation, 71–72
stapling devices, 70
French introducer system, 31, 32, 34

G
Gallbladder injuries, management of, 133
Gastrointestinal bleeding, 65
Gauze packing, 12, 89, 92, 108, 119, 147,
150–153
Gauze plug, 23
Glissonian capsule, 2
Gross anatomy, 1–3

H
Harmonic Scalpel, 71
Harrington retractor, 12, 13
Heaney maneuver, 91, 97, 98, 102
Hematoama, 128
in hepatoduodenal ligament, 80
subcapsular, large, 108
Hemobilia, 25–26, 65
Hemodynamically unstable patients
management in, options for, 134–135
repair in, options for, 135
Hemoperitoneum, 38, 118
estimation of, 37
Hemorrhage
maneuvers to control, 48–54
surgical control of, 126–127
Hemostasis, 13, 19–24, 41
Hemostatic agents, 44
topical, 59
Hemostatic technique, 17–18, 22, 23
Hepatic anatomy, 22, 67–69
Hepatic arterial anatomy, 3–5
Hepatic arteriography, 27, 113
Hepatic artery, 92
anatomy and physiology of, 79–80
anomalies of, 68
injury, management of, 83–84
ligation, 83
Hepatic dearterialization, 22
Hepatic drainage, 27–28
Hepatic duct, laceration of, 135
Hepatic inflow, 15
occlusion, 149–150
Hepatic injury
with blush, 25
non-bleeding, 58
in operating room, 70
Hepatic lobectomy, 52–53
left, 74–75
right, 73–74
Hepatic mobilization
left lobe, 15
right lobe, 13–15
Hepatic necrosis, 25, 26, 84
Hepatic packing, and compression, 44–45
Hepatic parenchymal transection, 127
Hepatic resection, 139
Hepatic suture technique, 27
Hepatic transplantation, 139
Hepatic trauma
grading, 117–118
massive, 146
Hepatic vascular isolation, 98
Hepatic vein
anatomy, 5
bleeding, 148
injuries, 50
Hepatobiliay (HPB) system, 159
rotation, 159
surgery, 139
Hepatoduodenal ligament, 39, 79, 82
hematoma in, 80
lateral border of, 4

Hepatorrhaphy, 19, 50–51
suture, 59–60

Hepatotomy, 19–20, 50–51, 71, 87

High-energy surgical devices, 59

HPB system. See Hepatobiliary (HPB) system

Hyperrealistic physical models, 147, 153

Hypotension, 31, 32, 35, 65

Hypothermia, 87
systemic, 61
topical, 61

I
Inflow control, 29
arterial, 15
temporary, 17

Inflow occlusion, 29, 71, 83, 127
of aorta, 34
hepatic, 150

Intra-abdominal abscesses, 64

Intraabdominal compartment syndrome, 89

Intrahepatic omental packing, 111

Intrahepatic packing, 107

Intrahepatic vascular ligation, 50–51

Intraoperative cholangiography, 129

Intraoperative coagulopathy, 108

Intraparenchymal vascular ligation, 121

J
Juxtahepatic venous injuries, 90–92, 97–102
approach to injured liver, 85–86
general concepts, 85–86
intraoperative decisions, 86–90
lethality of, 90
stable, 95–96
unstable, 96–97

K
Kerlix gauzes, 23
Kocher maneuver, 6, 45, 80, 82

L
Laceration, of common bile/hepatic duct, 135

Laparotomy, 38–40
damage control (see Damage control laparotomy)
exposure, 43
hepatic packing and compression, 44–45
injury identification, 45–46
mobilization, 44

Left hepatic lobectomy, 74–75

Left lateral segmentectomy, 75–76

Lethality, of juxtahepatic venous injuries, 90

Ligation
biliary duct, 121
hepatic artery, 83
intrahepatic vascular, 50–51
intraparenchymal vascular, 121

Liver packing
conservative approach, 109
derarterialization and, 25
history, 107–108
indications, 108–109
timing of, 109–110

Liver suture technique, 20

Liver trauma, 117
surgical management algorithm for, 122

Lobectomy, 52–53
formal (see Formal lobectomy)
hepatic
left, 74–75
right, 73–74

M
Manual compression, of liver, 21, 38, 40,
58–60, 149

Massive hepatic trauma, 146

Massive liver bleeding, 38–40

Massive transfusion protocol (MTP), 37, 42, 57,
96, 147

Mattox maneuver, 30

Median sternotomy, 47

Meticulous technique, 7

MTP. See Massive transfusion protocol (MTP)

N
Narrow malleable retractors, 50

Nonanatomic hepatic resection, 21
and debridement, 51–52

Non-bleeding hepatic injuries, 58

Non-bleeding wound, 15–17

Nonoperative therapy, 25, 102

Nonshunting approach, 92

Nu Knit™, 44

O
Omental packing, 103
intrahepatic, 111
viable, 63

Omental plug, 23

Operating room (OR)
hepatic injury in, 70
management, 42–43
preparation for, 37

Operative maneuver, 30–31, 146

Optimal surgical exposure, 87

Organ Procurement Organization (OPO), 158

Organ procurement rotation, 158–159
Parenchyma, formal lobectomy anatomy, 67–69
approach to liver, 69–70
instruments and techniques, 70–71
operation, 71–72
stapling devices, 70
Parenchymal injury exploration, 119–120
Parenchymal transection, hepatic, 127
Penetrating trauma, 132–133
Penrose pack, 103, 104
Perihepatic packing, 89, 108, 109, 152, 153, 157
complications, 113–114
of hepatic injuries, 114
removal of, 112–113
results with, 114
survival for, 114
technique of, 110–111
Piggyback hepatectomy technique, 126
Plain SurgicelTM, 44
Plasma coagulation, argon beam, 59
Point of care (POC) testing, 43
Poole suction devices, 42, 43
Porta hepatis, 69, 92
vascular injuries of, 79–84
Portal pedicle
control of right, 72
stapler ligation of left, 72
Portal triad
anatomy of, 79, 80
occlusion of, 60–61
vascular, 87
Portal vein, 92
anatomy, 5–6, 79–80
injury, management of, 82–83
physiology of, 79–80
Postoperative cholangiography, 129
Potential pitfalls, 64
Potts technique, 83
Pringle maneuver, 7, 21–23, 60–61
double, 80
effective, 151
failure of, 96
hepatic inflow occlusion by, 149
and initial decision making, 48–49
Prototype simulators, 146
Proximal aortic aorta, 30
Purse-string suture, 88, 100
Radiologic imaging, 36–37
REBOA. See Resuscitative endovascular balloon occlusion of the aorta (REBOA)
Relaparotomy, 111, 112, 128, 134
Repair techniques
advanced, 60
simple, 58
Resectional debridement, 20–22, 63
Resection techniques, surgical control of, 126–127
Resuscitation maneuvers, 29, 60
Resuscitative endovascular balloon occlusion of the aorta (REBOA), 31–34
Retractors
army-navy, 47
Balfour, 43
Bookwalter, 43
cerebellar malleable, 50
Finochietto, 46, 47
fixed table, 73
Harrington, 12, 13
narrow malleable, 50
Retrohepatic cava, approach to, 49–50
Retrohepatic shunt, 23, 24
Rib fractures, 58
Right hepatic lobectomy, 73–74
Rummel tourniquet, 32, 39, 99, 100
Salinet Surgical Technology devices, 70–71
Sandblom technique, 136
Schrock shunt, 49, 100
Segmental anatomy, 3
Seldinger technique, 123
Sengstaken-Blakemore tube, 104
Simulators
limitation of, 146
prototype, 146
Splenic artery occlusion, 29
Stab wounds, 36, 82, 132, 135
Stellate hepatic fracture, 148
Sternotomy, median, 47
Subcapsular hematoma, 108
Surgical anatomy, of liver, 1
biliary tract anatomy, 5
gross anatomy, 1–3
hepatic arterial anatomy, 3–5
hepatic vein anatomy, 5
portal venous anatomy, 5–6
segmental anatomy, 3
Surgical care, implications for, 6–7
Surgical control, of hemorrhage/resection techniques, 126–127
Surgical decision-making, and preoperative monitoring, 126
Surgical incision, 9–11
Surgical simulation-based training, 145
hepatic inflow occlusion, 149–150
massive hepatic trauma, 146
novel technology, 147–148
omentum dissection, 151–153
operations for trauma, 146
severe hepatic fractures, 151
wide hepatic mobilization, 149
SurgicelTM, 44
Suture hepatorrhaphy, 59–60
Suture ligature, 19
Systolic blood pressure (SBP), 35
Temporary pack technique, 11–13, 23
Thoracotomy, 46–47
Thrombin activated factors, 71
Thromboelastography (TEG), 43, 101
Topical hemostatic agents, 59
Tractotomy, 19, 20, 88
Traditional piggyback technique, 126
Transfixing wounds, 103
Trauma
  abdominal, 36, 95, 117, 118
  blunt, 132
  hepatic (see Hepatic trauma)
  liver, 117, 122
  massive hepatic, 146
  penetrating, 132–133
Treatment of liver injury
  surgical incision, 9–11
  temporary pack technique, 11–13
Triad of death, 57, 119
Trisectionectomy, right and left, 76

Vascular anomalies, 15
Vascular control, and exposure of injuries, 80–82
Vascular injuries, of porta hepatis, 79–84
Vascular isolation, of liver, 23
Vascular ligation
  intrahepatic, 50–51
  intraparenchymal, 121
Vascular occlusion, of portal triad, 87
Vein anatomy, hepatic, 5
Venous injuries, juxtahepatic. See Juxtahepatic venous injuries
Venovenous bypass, 7, 91, 98, 99, 126
Vessel ligation, intraparenchymal, 120, 121
Viable omental packing, 63
Visceral surface, of liver, 69

Whipple procedure, 139
