

Index

\textit{\textbf{\lambda}}-calculus, 33
- reduction, 38
- strategies, 44
- substitution, 41
- terms, 34

algorithm, 1
answer, 73, 81
- substitution, 73

backtracking, 74, 85
bio-computing, 152
- membrane calculi, 152
- protein interaction calculus, 153
bisimulation, 139, 145

Chemical abstract machine, 147
chemical metaphor, 147
Church numerals, 45
clause, 71
- definite, 71
- fact, 71
- goal, 71
- Horn, 71
- program, 71
- query, 71
- rule, 71
computable function, 4
concurrency
- labelled transition system, 137
- parallel processes, 143
- process expression, 140
- strong bisimulation, 139
- strong simulation, 138
confluence, 43, 97, 103, 110, 125
evaluation
- call-by-name, 45, 66
- call-by-value, 45, 66
- lazy, 45, 67
- strategy, 45, 66
finite automata, 13
- deterministic, 16
- non-deterministic, 16
- Pumping Lemma, 19
fix point operators, 48
formal languages, 12
function, 63
- higher-order, 49
- partial recursive, 62
- primitive recursive, 56
goal, 71
Halting problem, 5
Herbrand universe, 69
interaction nets
- amb, 128
- textual calculus, 120
interaction nets, 107
- combinators, 117
- configuration, 122
- interface, 108
- ports, 108
– strong confluence, 110
interaction rule, 109

labelled transition diagram, 134
literal, 70

method, 94
minimisation
– bounded, 60
– unbounded, 61

normal form, 65
normalisation, 43

object calculus
– confluence, 98
– method, 94
– method invocation, 96
– method update, 96
– object, 94
object-oriented programming, 99
occur-check, 78

parallel composition, 142
partial function, 2
predicate, 70
primitive recursive scheme, 57
process, 141
programming languages
– functional object-oriented, 101
programming languages
– functional, 49, 63
– imperative, 30
– logic, 84
– object-oriented, 99
push-down automata, 20

quantum computing, 154
– entanglement, 156
– qubit, 156
– superposition, 156
qubit, 156
query, 71

resolution, 79
– failure, 81
– resolvent, 79
– search strategy, 85
– SLD-resolution, 73, 80, 85
– SLD-tree, 74, 81
– success, 81
restriction operator, 142

simulation, 138
strong normalisation, 43

termination, 43
Turing machine
– universal, 29
Turing machine, 23
– formal definition, 25
– variants, 28
types
– strong typing, 63

undecidable problems, 5
unification, 75
– most general unifier, 77
– unification algorithm, 76
– unification problem, 77
von Neumann machine, 30
