Index

Abdel-Salem, AA 95
ABI see ankle/brachial index
adenosine triphosphate (ATP), ischaemia-reperfusion syndrome 46
adrenaline 95
AET Electronic tourniquet (Anetic Aid) 90–4
Ahmed, M 98–9
allopurinol, ischaemia-reperfusion syndrome 44–6
American Operating Room Nurses Journal, safety aspects 92
amino acids, ischaemia-reperfusion syndrome 44–6
anaesthesia 77–86
—bupivacaine 82
—cocaine 80
—CRPS 84–5
—digital tourniquets 82–5
—guanethidine 84–5
—intravenous regional 79–82
—lignocaine 80
—Penrose drain 82–3
—prilocaine 80, 82
—procaine 80
—reflex sympathetic dystrophy 83–5
—regional sympathetic blockade 83–5
Anetic Aid APT tourniquet 90–4
animal experiments, effects 29–31
ankle/brachial index (ABI), vascular complications 69, 71
antibiotics, drug kinetics 97–8
antioxidants, ischaemia-reperfusion syndrome 44–6
application
—cuffs 98
—sites 18–19, 29–32
—tourniquet, effects 15–19
arthroscopy, with/without tourniquets 96
ascorbic acid, ischaemia-reperfusion syndrome 44–6
ATP see adenosine triphosphate
automatic tourniquets 90–4
Bier, August 79–80
bilateral tourniquets 33, 36, 90–2
—safety aspects 99
biochemical changes, muscle 19–27
black patients, sickle cell disease 58
blood flow, limb, effects 34
blood pressure 15–18
—haemodynamic changes 33–4
blood supply, recovery time 32
Bourdon gauge 90, 93
Bunnell, Stirling 94–5
bupivacaine 82
Burchell, G, exsanguination 55
burns, skin 28–9, 72, 73
Calf tourniquets 18–19
Campbell's Operative Orthopaedics 72
carpal tunnel decompression 95
catalase, ischaemia-reperfusion syndrome 43, 45
central venous pressure (CVP) 33–4, 35
clinical studies, effects 31
cocaine 80
compartment syndrome
—muscles 18–19, 66–8
—tourniquet paralysis 68
complex regional pain syndrome (CRPS), anaesthesia 84–5
complications 61–75
—cross-infection 74
—muscle damage 65–8
—nerve damage 63–5
—post-tourniquet syndrome 72–3
—skin damage 72
—vascular 69–72
compression
—exsanguination 53–7
—external 53–5
—quadriceps 22–7
contamination, tourniquets 74
Corning, J. Leonard 79–80
corticosteroids, ischaemia-reperfusion syndrome 44–6
cross-infection 74
CRPS see complex regional pain syndrome
cruciate ligament reconstruction 64–5
cuffs
—application 98
—design 89
—pressure 15–18
—Rhys-Davies Exsanguinator 94
—size 15–18
—types 15–18
Cushing, Harvey 10–11
CVP see central venous pressure
dantrolene sodium, ischaemia-reperfusion syndrome 44–6
de la Garza, J 57, 58
defence mechanisms, ischaemia-reperfusion syndrome 43
desferrioxamine, ischaemia-reperfusion syndrome 44–6
digital tourniquets 82–5
—Salem’s method 82–5
Doppler flow measurement 17–18
drug kinetics 97–8
Dupuytren’s disease 80, 95
duration see time, tourniquet
echocardiography, transoesophageal 33
effects 15–38
—animal experiments 29–30
—application of tourniquet 15–19
—blood flow, limb 34
—clinical studies 31
—haematological 35
—haemodynamic 33–4
—hyperaemia 35
—limb 35
—local 15–19, 29–32
—muscle 19–27
—nerves 27–9
—pain 36
—sites of application 18–19, 29–32
—skin 29
—swelling 35
—systemic 29–32
—temperature changes 35–6
electromyography (EMG), tourniquet paralysis 64
elevation, limb 53–7
—knee surgery 54–7
—with/without tourniquets 95
embolism, pulmonary 53
EMG see electromyography
Esmarch, Friederich August von 7–10
Esmarch’s bandage 7–10
—exsanguination 53–5
—knee surgery 54–5
exsanguination 51–9
—external compression 53–5
—postoperative dressing 55–7, 58
—sickle cell disease 58
extensor digitorum longus 21
external compression, exsanguination 53–7
Eyres, KS 95
fibre fracture fixation, with/without tourniquets 96
forearm tourniquets 18–19
fractures, open 97
free radicals, ischaemia-reperfusion syndrome 42–3
golden rules, safety aspects 99–100
guanethidine, anaesthesia 84–5
Haber-Weiss/Fenton reaction, ischaemia-reperfusion syndrome 43
haematological effects 35
haematoma formation 98–9
haemodynamic effects 33–4
hand-powered tourniquets 90
hand surgery
—trauma 97
—with/without tourniquets 95
Himel, HN 98–9
historical background 3–11
Holmes, CM 80
hydroxyl radical, ischaemia-reperfusion syndrome 42–3
hyperaemia, effects 35
hypothermia, ischaemia-reperfusion syndrome 47–8
infection, cross-infection 74
intravenous regional anaesthesia 79–82
ischaemia
—muscle 20–7
—quadriceps 22–7
ischaemia-reperfusion syndrome 39–49
—defence mechanisms 43
—hypothermia 47–8
—metabolic changes 41
—modifying 44–8
—neutrophil polymorphonuclear leucocytes (neutrophils) 43
—oxygen free radicals 42–3
—pharmacological modification 44–6
—physical modification 46
—preconditioning 45, 48
—protective strategies 44–6
—reperfusion 41–4
—swelling 44
Jahss, MH 95
Keller’s operation 70
knee surgery 69–72
—Esmarch’s bandage 54–7
—limb elevation 54–7
—with/without tourniquets 95–7
Koreska, J 57, 58
Krackow, KA 98
Lignocaine 80
limb, effects 35
Index

limb elevation 53–7
—knee surgery 54–7
—with/without tourniquets 95
Lister, Joseph 5–6, 6–7, 53
Listerian methods 5–6
local effects 15–19, 29–32

Mannitol, ischaemia-reperfusion syndrome 43
Mars, M 98–9
Martin’s bandage, exsanguination 54–7
metabolic changes, ischaemia-reperfusion syndrome 41
methylprednisolone, ischaemia-reperfusion syndrome 46
mitochondria 21–6
Morell-type tourniquet 3
muscles
—biochemical changes 19–21
