## Index

**A**
- Active filter, 13, 137, 138, 145, 146, 156, 172, 173, 177–181, 277
- Active gyrator, 101–103, 193
- All pass (AP), 10, 138–142, 144, 146, 150, 151, 156, 157, 166, 167, 181, 204, 275, 276, 280, 282, 388, 399, 421, 422
- All pole filters, 285, 409, 410
- Analog arrays, 536
- Analog circuits, 3, 4, 13, 59, 83–129, 234, 288, 345, 348, 358, 419, 536
- Analog switch, 232–234, 511, 513
- AP. See All pass (AP)
- Attractor, 245, 247

**B**
- Bacterial foraging optimization, 534–535
- Band elimination, 85
- Band pass (BP), 71, 144, 145, 148, 170, 280, 402, 467, 480, 483, 486, 536
- Band stop (BS), 421
- BiCMOS, 13, 77, 254–258, 301, 302, 346, 367, 538
- Biquadratic filter, 24, 150, 151, 154, 162, 370–372, 375, 382, 390, 395, 401
- Bi-stable multivibrator, 349, 509–511
- BP. See Band pass (BP)
- Bruton’s transformation, 283
- BS. See Band stop (BS)
- Bulk-driven MOSFET, 74
- Butterworth, 102, 169, 173, 174, 176, 286, 467, 474, 476, 483, 536

**C**
- Canonical, 103, 191, 389
- Capacitance multiplier, 105, 270, 271, 318, 487–490
- Capacitance simulator, 270
- Center frequency, 148, 486
- CF. See Current follower (CF)
- CFOA. See Current feedback operational amplifier (CFOA)
- Channel length modulation, 70
- Chaos, 247, 520
- Chaos generator, 243, 519–520, 524
- Chaotic oscillator, 83, 243–247, 519
- Characteristic equation, 197, 425, 448–450, 453, 454, 456, 457, 460
- Chebyshev filter, 411, 479

Negative resistance, 83, 97, 258–262, 473
Network synthesis, 520, 530
NIC. See Negative impedance converter (NIC)
Nodal admittance matrix (NAM), 449
Non interacting control, 163, 289, 452
Non-inverting amplifier, 50, 52, 84–88, 368
Non-inverting integrator, 90, 175, 205, 206, 242
Non-linear network, 8, 520–521
Norator, 97, 121, 320, 321, 529, 530
npn mirror, 19, 34
Nullator, 97, 121, 320, 321, 529, 530
Nullor, 96–98, 114–116, 118, 121, 122, 347–349, 492, 529, 530

O
Offset cancelling, 61, 68–70
Offset voltage, 36, 66, 196, 219, 221, 223
OMA. See Operational mirrored amplifier (OMA)
Operational floating conveyor, 9, 89, 313–315, 416
Operational mirrored amplifier (OMA), 25–30, 49, 113, 145, 167, 182, 236
Operational transconductance amplifier (OTA), 8, 17, 20–25, 29, 41, 53, 55, 74–75, 120–121, 177, 192, 303, 312, 348, 353, 354, 357, 479, 480, 492, 516, 534, 537, 558
Orthogonal tunability, 155, 167
OTA. See Operational transconductance amplifier (OTA)
P
Parasitic capacitance, 26, 87, 88, 195, 196, 210, 349, 406, 452, 505
Parasitic impedance, 71, 76, 87, 93, 111, 203, 210, 213, 466, 476–479
Parasitic resistance, 12, 42–44, 68, 88, 239, 266, 302, 377, 460, 480
Particle swarm optimization, 535
Pathological element, 10, 320, 321, 449, 529, 530
Phase difference, 203–206, 456–458
PID control, 290
PID controller, 290, 291, 497–500, 524
Piece-wise linear, 231, 245, 247
pnp mirror, 18, 27, 34, 47
Positive feedback, 19, 506, 509, 511, 515
Power supply current sensing technique, 25, 30, 49, 139, 227, 337
Pseudo exponential, 234–236
Pulse, 239, 240, 248, 511, 519
Q
Quadrature, 192, 203–209, 213, 288–290, 298, 323, 424, 425, 454–460
Quadrature signals, 458
R
Rail-to-rail, 60, 65, 72–74, 502, 534
Ramp, 506, 507, 515, 516
Reflector, 7, 8, 520–521
Relaxation oscillator, 83, 243, 248, 253, 320, 506–516, 524
Rotator, 7, 8, 520–521
S
Sample and hold, 517–519, 524
Saturation level, 506, 507, 509, 511, 515
Scalar, 8, 105, 520–521
Schmitt trigger, 175, 237–243, 349
Simulated inductor, 83, 101, 162, 163, 177, 243, 245, 352, 467–471, 474, 479, 480, 482, 486, 491, 493, 519
Squarer, 9, 12, 125, 128, 225–230, 254, 295, 296
Square rooting, 228, 229, 295–299
Square wave, 237, 239–243, 253, 506–509, 515–516, 519, 524
SRCO. See Single resistance controlled oscillator (SRCO)
