## Index

**A**
- amplifier, 18
  - analog delay, 152
  - baseband, 147
  - differential, 19, 33, 51, 79
  - limiting, 152
  - loop, 154
  - low noise, *see* low noise amplifier (LNA)
  - multistage, 33, 79
  - power, *see* power amplifier (PA)
  - small signal, 79
- amplitude detector, 158
- amplitude modulation (AM), 109
- amplitude modulator, 112, 163
- amplitude shift keying (ASK), 109, 164
- antenna, 57
  - antenna-in-package (AiP), 58
  - antenna-on-chip (AoC), 58
  - dipole, *see* dipole antenna
  - efficiency, *see* antenna efficiency
  - gain, *see* antenna gain
  - omnidirectional, 142
  - reflector impact, 65
  - standard gain horn, 167
- antenna efficiency, 68, 144
- antenna gain, 62, 142
- attenuation
  - transmission line, 35

**B**
- bandwidth, 46
  - amplifier, 83, 91, 99
  - antenna gain, 72
  - antenna input, 59, 71, 144
  - baseband, 107
  - modulation, 61, 142, 143, 147
  - radio frequency (RF), 124, 142
- receiver, 57
- signal, 107
- transmission, 59, 142
- binary phase shift keying (BPSK), 136, 162
- bit error rate (BER), 172
- branchline coupler, 44, 125

**C**
- capacitive neutralization, 19, 80, 86, 95, 109, 126, 147
- capacitor, 29
  - metal-insulator-metal (MIM), 29
  - metal-oxide-metal (MOM), 29
  - metal-oxide-semiconductor (MOS), 29
  - parallel plate, 29
- quality factor, *see* quality factor
- carrier recovery, 143
- characteristic impedance, 35, 44
- common mode rejection ratio, 47, 128
- comparator, 158
- compression point
  - input, *see* input compression point (ICP)
  - output, *see* output compression point (OCP)
- conjugate match, 47, 81
- Costas loop demodulator, 145
- error calculation, *see* error calculation
- loop filter, *see* loop filter
- phase locked, *see* phase locked loop
- current gain, 13

**D**
- demodulation, 143, 167
- differential pair, 50, 109
- cascode, 94
- common gate, 87
- common source, 85
- neutralized, 19, 85, 112, 164
- no common terminal, 88

digital chip output, 158
    bondwires, 159
driver, 159
digital-to-analog converter (ADC), 107
dipole antenna, 61
    bondwire antenna, 67
elevated bondwire, 69, 144
    full wave, 64
ehalf wave, 62
    V-shaped bondwire, 69
distortion
    AM to PM, 165
digital signal, 159
    modulated signal, 92
downconversion, 122, 132, 145
ed
energy, 174
power added, see power added efficiency
    (PAE)
    radiation, 62
    spectral, see spectral efficiency
error calculation, 153
error vector magnitude (EVM), 169
eye diagram, 149, 160
f
finite element simulation, 34, 59
focused ion beam (FIB), 120, 161
free space path loss (FSPL), 142
g
gain circles
    available (G_a), 81
    operating (G_p), 81
Gilbert cell mixer, 147, 158, 164
i
impedance matching, 33, 109
    conjugate match, see conjugate match
    mismatch, 28, 80
    network, see impedance matching network
    noise, 85
    power, 92
    power gain, 80
    stub, see stub
impedance matching network, 22, 79
    passive, 47
    inductive peaking, 147
    input compression point (ICP), 165
l
linear feedback shift register (LFSR), 109,
    110, 166
link budget analysis, 142
load pull
    analysis, 92
    contours, 93, 114, 129
load reflection coefficient, 80
loop filter, 146
low noise amplifier (LNA), 84, 144
m
maximum available gain (MAG), 14, 47, 85
maximum stable gain (MSG), 18, 87
mixer
    baseband, 153
    Gilbert cell, see Gilbert cell mixer
    radio frequency (RF), 147
modulation
    amplitude, see amplitude modulation (AM)
    amplitude detector, see amplitude detector
    amplitude modulator, see amplitude modulator
    amplitude shift keying, see amplitude shift
    keying (ASK)
    binary phase shift keying, see binary phase
    shift keying (BPSK)
demodulation, see demodulation
    Costas Loop, see Costas loop demodulator
    depth, 112
direct digital, 107, 162
    multiplexer based modulator, 126
    phase, see phase modulation (PM)
    quadrature amplitude, see quadrature
    amplitude modulation (QAM)
    star, see star quadrature amplitude
    modulation (Star-QAM)
    quadrature phase shift keying, see quadrature
    phase shift keying (QPSK)
    quadrature vector modulator, see quadrature
    vector modulator
n
noise circles, 85
noise figure (NF), 84, 144, 167
o
output compression point (OCP), 93, 100,
    113, 165
output reflection coefficient, 23
p
peak to average power ratio (PAPR), 124
    phase locked loop (PLL), 145
critically damped, 156
loop filter, see loop filter
phase modulation (PM), 108
pole-zero
  analysis, 24
  plot, 23
power added efficiency (PAE), 92, 99, 121, 129
power amplifier
  class A, 93
  linearity, 92, 129
power amplifier (PA), 91, 113, 128, 163
power gain, 13, 114, 129
  available (Ga), 80
  maximum available, see maximum available gain (MAG)
  maximum stable, see maximum stable gain (MSG)
probes, see probe-pad
  GSG, 58
pseudo random bit sequence (PRBS), 109, 110
Q
  quadrature amplitude modulation (QAM), 125
  quadrature phase shift keying (QPSK), 124, 163
  quadrature vector modulator, 163, 164
  quality factor, 29
R
  radiation pattern, 59, 144
    3D, 62, 69
    E-plane, 74
    H-plane, 74
receiver, 84, 112, 143
reflection coefficient
  load, see load reflection coefficient
  output, see output reflection coefficient
  source, see source reflection coefficient
  Rolet stability factor (K), 16, 83
S
s-parameters, see scattering parameters
  saturated output power, 93, 100, 113, 130
  scattering parameters, 21, 34, 80, 92, 115, 159
  signal-to-noise ratio (SNR), 57, 124, 132, 142, 166
  Smith chart, 25, 41, 81, 93, 119
source reflection coefficient, 80, 85
spectral efficiency, 109, 124, 162
stability, 16, 79, 117
  capacitive neutralization, see capacitive neutralization
  common mode, 25, 109, 160
  conditional, 18, 79
  differential mode, 20, 83
  oscillation, 18, 24
    common mode, 26
    differential mode, 28
  Rolet stability factor (K), see Rolet stability factor (K)
  stability break point, see stability break point
  stability circle, see stability circle
  unconditional, 18, 83, 120
  stability break point, 18
  stability circle, 23
    input, 23, 119
    output, 25
star quadrature amplitude modulation (Star-QAM), 143
stub, 43, 126, 130
  parallel open, 43
  parallel shorted, 43
  quarter wavelength, 33
system-on-chip (SoC), 58, 141
T
  transformer, 22, 46, 82, 103, 109, 147, 163
    multiple turn transformer, 50
    single turn planar, 48
    single turn stacked, 47, 98, 112
  transmission line, 35
    characteristic impedance, see characteristic impedance
    differential high characteristic impedance, 38
    differential microstrip, 37, 159
    differential slow wave, 37, 98, 103, 112, 113
    microstrip, 35, 36
  transmitter, 47, 74, 104, 109, 124, 162
U
  upconversion, 107, 124
V
  voltage controlled oscillator (VCO), 156, 162
W
  wireless connector, 141
