Index

A
absolute robustness, 198
AC-WC curve, 160
additive value function, 5
adjacency matrix, 242
adversarial problem, 133
adversarial risk analysis, 40, 55, 108
analytic center, 26
assignment problem, 147
asymmetric uncertainty sets, 271, 305

B
Bayes-Nash equilibrium, 48
Bayesian analysis, 40
Bayesian robustness, 41
Benders decomposition, 126
big data, 193, 273
bounded uncertainty, 151
branch and bound, 126

C
cardinal criteria, 7
causal map, 243
causal relation weights, 250
chance-constrained programming, 89, 266
Choquet integral, 17
classification problems, 22
cclimate change, 240
cognitive mapping, 242
cohercient risk measures, 94
column-wise uncertainty set, 115
combinatorial optimization, 95, 132, 194, 204
complexity, 118, 244
conditional value-at-risk, 92, 277, 286
conic quadratic optimization, 95
conservative, 79
copulas, 103
cutting-plane methods, 288
cutting-stock models, 101
cybersecurity, 43

data envelopment analysis, 2, 301
data uncertainty, 196
data-driven robust optimization, 273
decision problem, 60
decision support system, 216
decision theory, 49, 67, 223
discrete optimization, 90, 113
disjunctive graph, 199
disjunctive scheduling, 193
distributionally robust optimization, 93, 267, 275
dynamic conditional correlation model, 291
dynamic programming, 267

efficient portfolios, 290
ellipsoid volume, 30
ellipsoidal uncertainty, 90, 115, 152, 268
emission-trading scheme, 222
energy systems, 104
error analysis, 66
expected utility, 10, 40, 276
F
facility location, 100
fractional programming, 184
fuzzy cognitive map, 242
fuzzy numbers, 173, 174
fuzzy optimization, 108, 172
fuzzy set, 172, 173

G
game theory, 45, 49, 67
genetic algorithms, 229

H
health care, 106

I
imprecise data envelopment analysis, 302
interval uncertainty, 150, 163, 268

J
job sequence, 199

K
kernel density, 232
knapsack problem, 148

L
linear programming, 26, 90, 91, 171, 304
linguistic variable, 250
logistics, 98
lot-sizing, 101

M
machine learning, 83, 104
machine scheduling, 191
Markov decision processes, 93
mathematical programming, 89
maximin, 41, 63, 181, 224, 268
mean-variance approach, 103, 286
mean-variance model, 266
membership function, 173
metaheuristic, 211
minimax, 66, 99, 117, 181, 224
minimum spanning tree, 126
mixed integer linear program, 209
Monte Carlo simulation, 16, 46
Monte-Carlo simulation, 300
multi-objective optimization, 23, 95, 216, 222
multi-stage decision-making, 96
multiple criteria decision aid, 2, 21, 95, 241

N
Nash equilibrium, 43, 45, 48, 49
network problems, 100, 113
neural networks, 241
newsvendor problem, 92, 98
nonlinear optimization, 94

O
online convex optimization, 97
optimization theory, 62
ordinal criteria, 9
ordinal regression, 35

P
parameter uncertainty, 267
Pareto frontier, 96, 229
performance analysis, 145, 159
performance measure, 194
perturbation, 44
polyhedral uncertainty set, 90
portfolio management, 95, 265
portfolio optimization, 103, 286
portfolio theory, 286
possibility measure, 173
post-optimality, 25, 185
preference disaggregation, 23
price of robustness, 159, 306
probabilistic robustness, 70
probability distribution, 2, 49, 91, 130
production management, 193
production planning, 101
project management, 193
quadratic programming, 100, 266
queueing networks, 92, 101
random probability, 46
random utility, 46
recoverable robustness, 102, 133, 157, 209
regret robustness, 153
returns-to-scale, 308
risk analysis, 39
risk aversion, 52, 96, 129, 266
risk measures, 103, 277
risk proneness, 52
robust counterpart, 78, 149, 269, 305
robust optimization, 146, 172, 223, 267, 304
robust policy, 223

S
saddle point, 67
Savage criterion, 120, 223
scenario curve, 160
scenario planning, 252
scenario set, 114, 192, 223
scheduling, 100, 193
second order conic programming, 271
semidefinite programming, 93, 95
sensitivity analysis, 1, 108
shortest path, 130, 136
signal to noise ratio, 224
simulation, 3, 26, 92, 241
simulation driver function, 245
stakeholder engagement, 248
statistical decision theory, 60
statistical learning, 22
stochastic dominance, 93, 286
stochastic multicriteria problems, 3
stochastic programming, 91, 171, 266
strict robustness, 149
structural uncertainties, 226
subjective expected utility, 40
suboptimality, 172
supply chain management, 101
support vector machines, 104
symmetric uncertainty sets, 270
system dynamics, 226, 241

T
tabu search, 211
technical efficiency, 300
threshold function, 252
timetabling, 102, 193
transition pathways, 258

U
uncertainty, 89
uncertainty representation, 114
uncertainty set, 151, 267, 304
uncertainty space, 73
uniformly distributed weights, 6
utility function, 276

V
value function, 2, 5, 23
value of information, 57
value-at-risk, 94, 268, 277, 286
vector autoregression, 273

W
weight matrix, 243
weighted ordering averaging, 127
worst case analysis, 80, 100
