Index

A
Acute injuries, 206
Acute instability, 207
Advanced Thrower’s Ten Program, 150
Alsonso-Llames approach, 30
Anterior band of the medial collateral ligament (aMCL), 41
Anterior bundle, 5, 6
Anterior capsule, 9
Anterior medial collateral ligament (AMCL), 4
Anteromedial coronoid fracture
anteroposterior and lateral radiographs, 77, 83
associated elbow dislocation, 76
classification, 78
CT scans, 77
double crescent sign, 77
examination techniques, 76
flexor-pronator split, 80
fluoroscopy, 76
hyperpronation test, 76
imaging studies, 77–78
medial deep approach, 80
MRI, 77
nonoperative treatment, 78–79
operative treatment, 80–83
pathognomonic, 77
PMRI, 76, 77
shearing mechanism, 75
subchondral density, 77
varus posteromedial rotatory mechanism, 5, 81, 83
Arthrodesis
AO compression plate technique, 232
elbow, 230
tuberculosis, 231
Arthroscopic technique, 131–133
Articular injury, 48

B
Basal coronoid fractures, 57
Biomechanics, 15
Bone loss, 229, 230, 233
Brachialis, 15
Broberg-Morrey scale, 93
Bryan-Morrey approach, 28

C
Capitellum, 19–20, 205
Chronically subluxated elbow. See Persistent elbow instability
Chronic elbow pain, 233–235
Chronic instability, 18, 207, 212
Chronic subluxation, 193
Collateral ligament, 46, 54
Combined MCL and LCL reconstruction, 183–187
arthroscopic evaluation, 181
external fixation, 187–188
global instability
circumferential double-loop technique, 186–187
circumferential single-loop technique, 186
instability classification, 179–180
internal fixation, 188
medial instability assessment, 182
nonoperative treatment, 182
osteosynthesis, 179
pathoanatomy, 180–181
PLRI assessment, 181–182
surgical management
acute injuries, 183
chronic injuries, 184–185
elbow approach, 183
Complex dislocations, 193
Complex elbow dislocation, 66
Complex elbow instability
coronoid reconstruction, 210, 211
external fixators, 211
fracture and neurovascular injury, 210
hinged external fixators, 210, 211
LCL, 211
ligamentous structures, 211
MEPS scores, 210
persistent elbow dislocation, 210
persistent subluxation/dislocation, 210
radial head, 211
surgical treatment protocol, 211
terrible triad injuries, 210
Computed tomography (CT), 42, 77, 192
Coronoid fracture, 54, 55, 57, 62, 197–198
dislocations, 196, 199
elevator dislocation, 191, 195
fixation, 103
Coronoid fracture (cont.)
approaches, 62
chronic elbow instability, 61
O’Driscoll classification, 58
O’Driscoll type 1 fractures, 60
Regan and Morrey classification, 57
reconstruction, 195–196
repair, 195
significant soft tissue insertions, 195
technique
olecranon tip, 197–198
radial head, 197
types, 194
Coronoid process, 18–19, 30, 33, 35, 36, 41–43
Coronoid prosthesis, 198–199

D
Deep lateral approaches, 28
Deep posterior approaches, 36
Diaphyseal ulnar fractures, 85
Disability of Arm Shoulder and Hand questionnaire (DASH), 105
Distal humerus nonunion, 223
Distal radioulnar joint (DRUJ) injury, 111
Drop sign, 44
Dual-incision approach, 45

E
Ecchymosis, 181
Elbow anatomy, 3–10
primary stabilizers (see Primary stabilizers)
secondary stabilizers (see Secondary stabilizers)
Elbow anatomy and stability, 85–87
Elbow arthroplasty, 205
Elbow dislocations, 101, 195
case example, 49–50
evaluation, 42
joint contracture, 46
neurovascular injury, 48
outcomes and complications, 46–48
posteriorly dislocated elbow, 42, 43
simple elbow dislocations, 41, 42
surgical approaches, 45
treatment, 42–46, 48–49
Elbow fractures, 101
Elbow function, 229
Elbow fusion
bone loss, 230
complications, 231–232
elbow arthroplasty, 229
elbow function, 229
evaluation, 229–230
nonoperative strategy/therapy protocols, 230–231
resection arthroplasty, 229
surgical management/technique, 231
trauma, 229
Elbow injury, subluxed elbow, 196
Elbow instability, 17, 19, 214
acute injuries, 206, 207
acute instability, 209–211
chronic instability, 207
complex, 210–212
external fixation, 205
hinged external fixation, 206
treatments/cases
acute fracture-dislocation, 214
chronic unreduced elbow dislocation, 214
Elbow joint
articular surfaces, 14
articulations, 13
cadaveric studies, 14, 15
motion, 14
Elbow ligament
injuries, 179
repair, 185, 186
anatomy, 86
Elbow stability, 15, 16, 19–22, 41, 43, 75–76
Elbow surgical treatment, 27–36
introduction, 27
lateral approaches, 30–33
medial approaches, 33–35
posterior approaches, 28–30
preferred approaches, 35–36
Elbow trauma, 99
Electromyographic studies, 15
Essex-Lopresti injury
chronic, 120
complications, 119
DRUJ, 113
forearm axis, 111
intersosseous membrane, 111
IOL, 112
nonoperative strategies/therapy protocols, 116
pathoanatomy, 112
pearls, 118
preferred treatments, 119–122
proximal-distal direction, 119
PRUJ, 113
radial head fracture, 111, 113, 119
radius joystick test, 113
radius pull test, 113
reconstructive vs. salvage procedures, 113
soft tissue injury distal, 113
surgical management/technique-based/surgical pearls,
116–118
tenaculum, 113
treatment algorithm, 113–116
treatment outcomes, 118
ulnar styloid warrants, 113
unipolar vs bipolar metallic radial head
arthroplasty, 116
Extensor carpi radialis brevis (ECRB), 31, 32, 36
Extensor carpi ulnaris (ECU), 9, 10, 31, 49
Extensor digitorum communis (EDC), 28, 30–33, 36, 37
Extensor hallucis longus (EHL), 135
External fixators, 187, 208
acute elbow instability, 207
chronic instability, 207
complex elbow instability, 206
complications, 209–213
coronoid, 207
eelbow instability, 205 (see also Elbow instability)
hinged (see Hinged external fixator)
orthopedic surgeons’ armamentarium, 205
static, 207, 208

F
Flexor, 46, 49
Flexor carpi ulnaris (FCU), 28, 29, 33, 34, 37, 49
Flexor-pronator mass, 143
Flexor-pronator muscle-splitting approach, 169
Flexor-pronator split, 28, 35, 37
Fluoroscopy, 209
Fracture-dislocations, 193

G
Greater sigmoid notch, 99, 102, 103

H
Heterotopic ossification, 47, 48
Hinged external fixator, 90–91
acute simple dislocations, 209
bony and ligamentous repairs/reconstructions, 209
cadaver model, 205
capitellar circumference, 209
central axis pin, 208
eelbow instability, 206
facile application, 213
fluoroscopy, 209
fracture-dislocation, 211
intra-operative fluoroscopy, 209
recurrent complex instability, 210
therapy protocols, 213–214
unicortical/bicortical fixation, 209
Hotchkiss, 28, 34, 37
Humeral drill holes, 186
Hyperpronation test, 76

I
Incisura semilunaris, 5
Instability classification
anterior, 180
global, 180
lateral, 179
medial, 180
Internal hinged fixation, 66, 188
Interosseous ligament (IOL), 111
Interosseous membrane
lateral displacement, proximal radius, 113
MRI, 113
muscular hernia sign, 113
proximal migration, 111–113
radial head excision, 111
radial head fracture, 112
radio-ulnar axis, 111
triangular fibrocartilage contributes, 111
ultrasound, 113
Ipsilateral olecranon tip, 198

J
Joint capsule, 3, 5, 9, 17
Joint contracture, 46

K
Kaplan approach, 28, 30–32, 37
Kocher approach, 30–33, 36, 37

L
Lateral collateral ligament (LCL), 8, 14, 16–20, 22, 43, 45, 46, 48, 49, 57, 65, 69, 70, 100, 186, 206
annular ligament, 7, 8, 16
injuries, 116
lateral ulnar collateral ligament, 7, 8, 16–18
and MCL repair, 183
radial collateral ligament, 7, 8, 16, 17
reconstruction
anconeus and ECU, 135
autograft, 135
docking technique, 134
EHL graft, 135
graft fixation, 184
graft selection, 184
graft tissue, 184
humeral drill holes, 184
Kocher interval, 135
nerve/docking technique, 184
tendon passage, 184
ulna drill holes, 184
Lateral ligament complex, 65
Lateral ulnar collateral ligament (LUCL), 4, 7, 8, 16–18, 30–32, 36, 41, 45, 58, 75, 180
Lidocaine injection, 42
Ligament deficiency, 217, 218, 224
Ligament reconstruction, 184–186
Longitudinal forearm instability. See Essex-Lopresti injury

M
Magnetic resonance imaging (MRI), 42, 44, 77
Mayo Elbow Performance Score (MEPS), 80, 133, 209
Medial collateral ligament (MCL), 3, 5–7, 9, 10, 41, 45, 57, 75, 100, 186
anterior bundle, 5, 6
biomechanical investigations, 6
posterior bundle, 6
reconstruction, 41, 43, 49, 185
acute traumatic ruptures, 185
graft fixation, 185
humeral drill holes, 185
Medial collateral ligament (MCL) (cont.)
tendon passage, 185
ulna drill holes, 185
transverse ligament, 6
Medial deep approaches, 28
Medial elbow pain, 166, 169
rehabilitation protocol, 148
Medial instability assessment, 182
Median nerve injury, 48
Monteggia fracture dislocation, 90–93, 100
Bado classification, 87
case study, 93, 95
elbow anatomy and stability, 85, 86
initial management, 89
injury pattern, 87–88
internal fixation, 91
jupiter sub-classification, 88
nonoperative strategies, 89
osteoporotic bone, 88
postoperative management, 91
radial head fracture, 89, 94
surgical management
diaphyseal ulna fractures, 90
distal-to-proximal, 90
outcomes, 91–93
radial head fractures, 90
troclear notch, 90
treatment algorithm, 89
Musculature, 9–10

N
Neuromuscular control exercises, 149
Neurovascular injury, 48
Nonoperative management, 48
Nonoperative treatment, 46
Nonsteroidal anti-inflammatory drugs, 48

O
O’Driscoll classification, 57
Olecranon, 28, 43, 180
plate, 105
tip, 197, 198
Open reduction internal fixation (ORIF), 63, 69, 80
Open technique, PLRI, 134
brace, 134, 137
LCL reconstruction, 134–136
ligament repair, 133, 134
post-operative protocol, 136
Osborne and Cotterill technique, 127
Osteotomy, 117

P
Paratricipital approach, 28, 30
Pathoanatomy
medial instability, 181
PLRI, 180–181
Persistent elbow instability, 193–194, 196–200

CT scan, 192
evaluation, 191–192
head fracture, 194
nonoperative strategies and therapy protocols, 193
surgical management, 194
complications, 199–200
coronoid fracture (see Coronoid fracture)
coronoid prosthesis, 198–199
external fixation, 199
ligamentous injury, 193–194
preferred coronoid reconstruction technique, 196–198
radial head fracture, 193
treatment, 192
treatment algorithm, 201
Persistent instability, 70
Pivot shift test, 128, 129, 131
PLRI. See Posterolateral rotatory instability (PLRI)
Posterior bundle, 6
Posterior interosseous nerve (PIN), 32, 33, 36
Posterior midline skin incision, 45
Posterolateral rotatory instability (PLRI), 7, 9, 10, 17, 19,
43, 130, 179, 180
characteristics, 128
diagnosis, 128
elbow dislocation, 128
imaging, 129, 130
