A
Acute proximal junctional collapse. See Proximal junctional failure (PJF)
Adolescent idiopathic scoliosis (AIS), 13
Adult spinal deformity (ASD)
  anterior intradiscal approach, 172
  anterior release and posterior fusion, 176–177
cage technology, 172
  complications checklist, 229, 230
coronal plane deformity, 171
CT, 14–15, 135
decompression, direct vs. indirect, 135–137
diagnosis, 259
diet and VTE prophylaxis, 248
etiology, 124
health-related impact, 282, 284
lateral minimally invasive approaches, 176
leg pain, disability, 133–134
mathematical methods, surgery, 83
MIS techniques, 142
MRI, 134
nonoperative care, 264
osteopenia and osteoporosis, 172
pathology and symptoms, 255
patient management, 256
pedicle subtraction osteotomies, 177–179
physical function, 78
posterior facetectomy, 175
posterior lumbar interbody fusion techniques, 175–176
posterior release, 174–175
postoperative pain, 248
predictive modeling, 286
preoperative planning, 261, 262
prevalence, 77
prevention strategies, 218
progressive neurological deficits, 3, 5–6, 78
pseudarthrosis, 114
rod breakage and pseudarthrosis, 178
sagittal plane, lumbar scoliosis, 173, 174
SRS-22, 39
subtype analysis, 6
surgical procedure, 85–86, 88

thoracolumbar/lumbar spinal fusion, 195
transforaminal lumbar interbody fusion techniques, 172
treatment, 172
Age-related asymmetric disc degeneration, 4–5
Anterior column realignment (ACR)
  classification of complications, 153, 154
  iliac artery tear, 154
  junctional kyphosis, 150
  mean estimated intraoperative blood loss, 152
  retractor aperture, 152
  sagittal plane correction, 150, 165
Anterior column reconstruction/release (ACR), 137
Anterior column support
  advantages, 159
  ALIF techniques, 163
  anterior approach, lower lumbar spine, 159–160
  blunt dissection, 159
  decision-making and methodology, 157
  indications, 158–159
interbody graft
  allograft bone, 165
  bone chips, 165
  cage/interbody designs, 165
  PEEK and carbon fiber cages, 166–167
  structural Harms cages, 166
  titanium, 166
  tricortical iliac crest, 165
lateral approach, 163–165
lordosis enhancement, 168
mechanical stability, 157
midline/paramedian approach, 159
posterior approach, lumbar spine, 160–162
thoracolumbar constructs, 157
Anterior longitudinal ligament release (ALL release), 150, 151, 155, 159, 168
Anterior lumbar interbody fusion
  (ALIF), 113, 137, 161, 163
  disadvantages, 160
  femoral ring allografts, 115
  intact posterior annulus, 159
  interbody fusion, 136, 142
  retrograde ejaculation, 116
**B**

Back pain
- causes, 4
  - curve progression, 5
  - etiology, 4
  - prevalence, 3–4
  - thoracolumbar/lumbar curves, 5

Beck Depression Inventory (BDI), 51, 56–57
