## Index

### A

**Algorithm**
- backpropagation, 66
- consecutive eliminations, 72
- consecutive merging, 75
- final tuning, 70
- fuzzy c-means, 63
- genetic-firework, 95
- genetic-imperialist, 106
- genetic programming, 192
- most favorable global eliminations, 81
- most favorable local eliminations, 80
- PID, 193

### C

**Classification error**, 21

**Computer numerically controlled machine**, 141

**Criterion**
- complexity evaluation, 110
- for assessing coverage of the data space by input fuzzy sets, 114
- for assessing fuzzy rules activity, 114
- for assessing similarity of fuzzy sets width, 113
- for assessing the defuzzification mechanism, 116
- for assessing the readability of operators, 115
- for assessing the readability of weight values, 115
- fuzzy set placement evaluation, 111

**Cross validation**, 21
- stratified, 21

### D

**Data clustering**, 17, 62

**Descriptors of rules**, 171, 183

**Dynamic object**, 133
- emulator, 192

### F

**Function**
- Gaussian, 50
- limitation, 65

**Fuzzy modelling**
- linguistic, 28
- precise, 28

**Fuzzy system**, 11
- defuzzification block, 13
- advantages, 1
- applications, 1
- flexibilisation, 37
- flexible, 49
- fuzzification block, 11
- fuzzy rules, 12
- hardware implementation, 192
- hierarchical, 192
- inference block, 12
- initialization, 62, 93
- learning, 94
- logical-type, 15
- Mamdani-type, 14
- merging, 75
- on-line, 192
- reduction, 72, 80, 81
- Takagi-Sugeno, 28
- tuning, 70
G
Gradient algorithms, 17, 61, 65
  initialization, 62
  merging, 75
  reduction, 72
  tuning, 70

I
Interpretability, 27
  basic criteria, 31, 110
  complexity, 29
  extended criteria, 52, 110
  readability, 29

J
Jaccard index, 76

L
Learning
  evolutionary, 91
  supervised, 17, 61, 65, 91
  unsupervised, 17

M
Method
  black-box, 27, 131
  center of area, 14
  gray-box, 27, 132
  white-box, 27
Multi-objective optimization, 21
  Pareto methods, 21

N
Negation, 15
  Zadeh, 15

P
Population algorithms, 17, 91
  advantages, 91
  evaluation, 98
  evolutionary, 19
  initialization, 93
  multi-population, 18, 106
  processing of the population, 106
  single-population, 18, 95
  swarm, 19
Precise operators
  aggregation, 38
  compromise operator, 44
  defuzzification, 48
  h-function, 44
  hybrid, 46
  inference, 38
  inference operators with weights, 43
  parameterized inference operators, 41
  parameterized triangular norms, 38
  switchable inference operator, 45
  switchable triangular norms, 44
  triangular norms with weights, 42

R
Root mean squared error, 20
