## Index

**A**  
Active deflection, 21  
American Joint Committee on Cancer (AJCC) 
TNM Staging, 160–161  
AMS Ambicor, 111  
AMS Spectra™, 110, 111  
Antegrade stenting, 36  
Anticoagulants, 71  
Arteriotomy, 67  
Autologous graft, 126

**B**  
Balloon dilators, 23  
Bimanual palpation, 72  
Biochemical recurrence (BCR), 152, 153  
Biodegradable stents, 107  
Biopsy based genetic assays 
  decipher, 170, 171  
  oncotype DX assay, 165–167  
  Prolaris biopsy, 167, 168  
  ProMark, 169, 170  
Boari flap, 59  
Buck’s fascia, 126, 127

**C**  
CAPRA, 166  
Caval thrombectomy, 66  
Cell Cycle Progression Score (CCP), 167, 168  
Clopidogrel, 80  
Coagulation necrosis, 101  
Colchicine, 122  
Collagenase clostridium histolyticum (CCh), 122  
Coloplast Genesis, 110, 111  
Colour Doppler ultrasonography, 50  
Confirm MDx  
  gene based assays, 159  
  genes methylation, 159  
  MATLOCK study, 159  
  negative biopsy, 158  
  non-genomic biomarker assays, 159, 160  
  risk factors, 159  
  Contact Nd-YAG laser surgery, 101

**D**  
Danish population cohort study, 80  
Decipher, 170–172  
Deep vein thrombosis (DVT), 47  
Distal intramural ureter, 20  
16/24-dot technique, 125  
Dunhill haemostats, 60  
Dynamic Sentinel Node Biopsy, 179

**E**  
Epididymal cysts, 147  
Epididymectomy, 148–149  
Erectile dysfunction (ED), 110  
  cardiovascular disease, 109  
  medical treatment, 109  
  nerve innervation, 109  
  PDE5i, 109  
  Sildenafil, 109  
  surgical therapy (see Penile prosthesis (PP))  
  vascular circulation, 109  
  Essed-Schroeder technique, 125  
  Exaggerated deflections, 21  
  Extracellular matrix grafts, 126  
  Extracorporeal shock wave therapy (ESWT), 122, 123  
  Extracorporeal shockwave lithotripsy (ESWL), 24
